| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                  |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare | Not answered. |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                               |                                                                                                |
|----------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True                                                                                           |
| Please explain reason for why this event was beyond this operator's control                                                      | Well was hit by nearby completions activity. Nitrogen levels exceeded pipeline specifications. |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | Flaring will conclude once nitrogen levels are below pipeline specifications.                  |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | Flaring will conclude once nitrogen levels are below pipeline specifications.                  |
