Environmental Engineer Specialist  
Oil Conservation Division, District 2  
811 S. First Street  
Artesia, New Mexico 88210

**Re: Closure Report for the COG Operating LLC, Reposado 2 State #001H, Unit B, Section 02, Township 26 South, Range 29 East, Eddy County, New Mexico. 2RP-4245**

Mr. Bratcher:

Tetra Tech, Inc. (Tetra Tech) was contacted by COG Operating LLC., (COG) to assess a spill from the Reposado 2 State #001H, Unit B, Section 02, Township 26 South, Range 29 East, Eddy County, New Mexico. The spill site coordinates are N 32.0780182 °, W 103.9527893 °. The site location is shown on Figures 1 and 2.

## **Background**

According to the State of New Mexico C-141 Initial Report, the leak was discovered on June 6, 2017, and released approximately thirty (30) barrels of produced water and four (4) barrels of oil due to a gasket failure on a free water knockout. Approximately ten (10) barrels of produced water was recovered and none of the oil was recovered. The release occurred within the bermed facility and an overspray impacted an area in the adjacent pasture. The release area measured approximately 25' x 60' inside the berm and the overspray area in the pasture measures approximately 55' x 90'. The initial C-141 form is included in Appendix A

## **Groundwater**

No water wells were listed within Section 02 on the New Mexico Office of the State Engineer's website. According to the Chevron Texaco Groundwater Trend map, the average depth to groundwater in this area is between 150' and 175' below surface. The groundwater data is shown in Appendix B.

## **Regulatory**

A risk-based evaluation was performed for the Site in accordance with the New Mexico Oil Conservation Division (NMOCD) Guidelines for Remediation of Leaks, Spills and Releases, dated August 13, 1993. The guidelines require a risk-based evaluation of the site to determine recommended remedial action levels (RRAL) for benzene, toluene, ethylbenzene and xylene (collectively referred to as BTEX) and total petroleum hydrocarbons (TPH) in soil. The proposed RRAL for benzene was determined to be 10 parts per million (ppm) or milligrams per kilogram

(mg/kg) and 50 ppm for total BTEX (sum of benzene, toluene, ethylbenzene, and xylene). Based upon the depth to groundwater, the proposed RRAL for TPH is 5,000 mg/kg.

## **Soil Assessment and Analytical Results**

### Pasture Area Assessment

On June 6, 2017, COG personnel were onsite to evaluate and sample the overspray area in the pasture. Two (2) sample trenches (T-1 and T-2) were installed in the overspray area, to total depths of 12.0' and 14.0' below surface using a backhoe. Additionally, four (4) trenches were installed around the perimeter of the spill (North, South, East, and West) to a total depth of 1.0' below surface for horizontal extents. Selected samples were analyzed for TPH analysis by EPA method 8015 modified, BTEX by EPA Method 8021B and chloride by EPA method 300.0. Copies of laboratory analysis and chain-of-custody documentation are included in Appendix C. The results of the sampling are summarized in Table 1. The trench locations are shown in Figure 3.

Referring to Table 1, none of the collected samples exceeded the RRALs for TPH, benzene or total BTEX. The areas of trenches (T-1, T-2, North, South, East, and West) showed TPH highs of 2,620 mg/kg, 2,630 mg/kg, 91.0 mg/kg, <15.0 mg/kg, 1,190 mg/kg, and 39.8 mg/kg, at surface, respectively. The TPH concentrations further declined with depth and showed bottom trench concentrations ranging from <15.0 mg/kg to 231 mg/kg.

All the areas sampled showed results below the laboratory reporting limit for benzene. A trace of BTEX concentrations were detected at the surface with concentrations of 0.587 mg/kg (T-1) and 1.34 mg/kg (T-2). The samples collected at trenches (North, South, East, and West) showed total BTEX concentrations below laboratory reporting limit. Additionally, the areas of trenches (T-1 and T-2) did not show a significant chloride impact to the soils with chloride highs of 413 mg/kg (10') and 836 mg/kg (surface), respectively. Trenches (North, South, East, and West) also showed minimal chloride concentrations ranging from 4.87 mg/kg to 219 mg/kg.

### Inside Facility Berm

On November 20, 2017, Tetra Tech personnel returned to the site to evaluate and sample the impacted area inside the facility berm. Numerous above ground lines, as well as equipment, is located inside the berm causing access issues. Due to safety concerns, one borehole (BH-1) was installed along the interior edge of the berm to a total depth of 24'-25' below surface. Selected samples were analyzed for TPH analysis by EPA method 8015 modified, BTEX by EPA Method 8021B and chloride by EPA method 300.0. Copies of laboratory analysis and chain-of-custody documentation are included in Appendix C. The sampling results are summarized in Table 1. The borehole location is shown on Figure 3.

Referring to Table 1, the area of borehole (BH-1) showed a TPH concentration below the RRALs of 1,030 mg/kg at 0'-1', which declined with depth below the laboratory reporting limit at 14'-15' below surface. Additionally, none of the samples analyzed showed benzene or total BTEX concentrations above the laboratory reporting limits. In addition, the area of borehole (BH-1) showed minimal chloride concentrations in the shallow soils, with a chloride high of 1,410 mg/kg at 2'-3'. The chlorides declined with depth to 432 mg/kg at 4'-5' and showed a bottom hole concentration of 271 mg/kg at 24'-25' below surface.

## Conclusion and Recommendations

According to Chevron trend map, the depth to groundwater in the area is approximately 150' to 175' below surface. The areas of trenches (T-1 and T-2) and borehole (BH-1) showed TPH, benzene, and total BTEX concentrations below the RRALs. Additionally, no significant chloride concentrations were detected in the areas of trenches (T-1 and T-2). The area of borehole (BH-1) showed minimal chloride concentrations to the shallow soils, with a chloride high of 1,410 mg/kg at 2'-3' below surface, which does not appear to an environmental concern.

Based on the results, safety concerns and limited access, COG requests closure of this spill issue. The final C-141 is enclosed in Appendix A. If you have any questions or comments concerning the assessment activities for this site, please call at (432) 682-4559.

| Was a Watercourse Reached?<br><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No  | If YES, Volume Impacting the Watercourse.                 |   |

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

The release was due to a gasket failure on the free water knockout inside the battery. The gasket has been replaced.

Describe Area Affected and Cleanup Action Taken.\*

This release occurred within the bermed area of the battery and an overspray impacted the pasture. A vacuum truck was dispatched to remove all freestanding fluids. Concho will have the spill site sampled to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

# New Mexico Office of the State Engineer Water Column/Average Depth to Water

(A CLW##### in the POD suffix indicates the POD has been replaced & no longer serves a water right file.)

(R=POD has been replaced, O=orphaned, C=the file is closed) (quarters are 1=NW 2=NE 3=SW 4=SE) (quarters are smallest to largest) (NAD83 UTM in meters)

(In feet)

Project Address:

**Aaron Lieb:**

We are reporting to you the results of the analyses performed on the samples received under the project name referenced above and identified with the XENCO Report Number(s) 556913. All results being reported under this Report Number apply to the samples analyzed and properly identified with a Laboratory ID number. Subcontracted analyses are identified in this report with either the NELAC certification number of the subcontract lab in the analyst ID field, or the complete subcontracted report attached to this report.

Unless otherwise noted in a Case Narrative, all data reported in this Analytical Report are in compliance with NELAC standards. The uncertainty of measurement associated with the results of analysis reported is available upon request. Should insufficient sample be provided to the laboratory to meet the method and NELAC Matrix Duplicate and Matrix Spike requirements, then the data will be analyzed, evaluated and reported using all other available quality control measures.

The validity and integrity of this report will remain intact as long as it is accompanied by this letter and reproduced in full, unless written approval is granted by XENCO Laboratories. This report will be filed for at least 5 years in our archives after which time it will be destroyed without further notice, unless otherwise arranged with you. The samples received, and described as recorded in Report No. 556913 will be filed for 60 days, and after that time they will be properly disposed without further notice, unless otherwise arranged with you. We reserve the right to return to you any unused samples, extracts or solutions related to them if we consider so necessary (e.g., samples identified as hazardous waste, sample sizes exceeding analytical standard practices, controlled substances under regulated protocols, etc).

We thank you for selecting XENCO Laboratories to serve your analytical needs. If you have any questions concerning this report, please feel free to contact us at any time.

Respectfully,

**Mike Kimmel**  
Client Services Manager

# CASE NARRATIVE

*Client Name: COG Operating LLC*

*Project Name: Reposado 2 State #001*

Project ID:  
Work Order Number(s): 556913

Report Date: 12-JUL-17  
Date Received: 07/05/2017

**Sample receipt non conformances and comments:**

**Sample receipt non conformances and comments per sample:**

None

**Analytical non conformances and comments:**

Batch: LBA-3021836 BTEX by EPA 8021B

Soil samples were not received in Terracore kits and therefore were prepared by method 5030.

Lab Sample ID 556913-016 was randomly selected for Matrix Spike/Matrix Spike Duplicate (MS/MSD).

Ethylbenzene, m\_p-Xylenes , o-Xylene recovered below QC limits in the Matrix Spike and Matrix Spike Duplicate. Toluene recovered below QC limits in the Matrix Spike Duplicate. Outlier/s are due to possible matrix interference. Samples in the analytical batch are: 556913-001, -002, -003, -004, -008, -009, -010, -011, -012, -013, -016.

The Laboratory Control Sample for Toluene, Ethylbenzene, m\_p-Xylenes , o-Xylene is within laboratory Control Limits, therefore the data was accepted.

Batch: LBA-3021840 BTEX by EPA 8021B

Soil samples were not received in Terracore kits and therefore were prepared by method 5030.

Batch: LBA-3022031 Chloride by EPA 300

Lab Sample ID 556913-009 was randomly selected for Matrix Spike/Matrix Spike Duplicate (MS/MSD).

Chloride recovered above QC limits in the Matrix Spike and Matrix Spike Duplicate. Outlier/s are due to possible matrix interference. Samples in the analytical batch are: 556913-001, -002, -003, -004, -005, -006, -007, -008, -009, -010, -011, -012, -013, -014, -015, -016.

The Laboratory Control Sample for Chloride is within laboratory Control Limits, therefore the data was accepted.

# Flagging Criteria

- X** In our quality control review of the data a QC deficiency was observed and flagged as noted. MS/MSD recoveries were found to be outside of the laboratory control limits due to possible matrix /chemical interference, or a concentration of target analyte high enough to affect the recovery of the spike concentration. This condition could also affect the relative percent difference in the MS/MSD.
- B** A target analyte or common laboratory contaminant was identified in the method blank. Its presence indicates possible field or laboratory contamination.
- D** The sample(s) were diluted due to targets detected over the highest point of the calibration curve, or due to matrix interference. Dilution factors are included in the final results. The result is from a diluted sample.
- E** The data exceeds the upper calibration limit; therefore, the concentration is reported as estimated.
- F** RPD exceeded lab control limits.
- J** The target analyte was positively identified below the quantitation limit and above the detection limit.
- U** Analyte was not detected.
- L** The LCS data for this analytical batch was reported below the laboratory control limits for this analyte. The department supervisor and QA Director reviewed data. The samples were either reanalyzed or flagged as estimated concentrations.
- H** The LCS data for this analytical batch was reported above the laboratory control limits. Supporting QC Data were reviewed by the Department Supervisor and QA Director. Data were determined to be valid for reporting.
- K** Sample analyzed outside of recommended hold time.
- JN** A combination of the "N" and the "J" qualifier. The analysis indicates that the analyte is "tentatively identified" and the associated numerical value may not be consistent with the amount actually present in the environmental sample.

\*\* Surrogate recovered outside laboratory control limit.

**BRL** Below Reporting Limit.

**RL** Reporting Limit

**MDL** Method Detection Limit      **SDL** Sample Detection Limit      **LOD** Limit of Detection

**PQL** Practical Quantitation Limit      **MQL** Method Quantitation Limit      **LOQ** Limit of Quantitation

**DL** Method Detection Limit

**NC** Non-Calculable

+ NELAC certification not offered for this compound.

\* (Next to analyte name or method description) = Outside XENCO's scope of NELAC accreditation

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Xenco will be liable only for the cost of samples and shall not assume any responsibility for losses or expenses incurred by the Client if such losses are due to circumstances beyond the control of Xenco. A minimum charge of \$75 will be applied to each project. Xenco's liability will be limited to the cost of samples. Any samples received by Xenco but not analyzed will be invoiced at \$5 per sample. These terms will be enforced unless previously negotiated under a fully executed client contract.

# XENCO Laboratories Prelogin/Nonconformance Report- Sample Log-In

Client: COG Operating LLC

Date/ Time Received: 07/05/2017 11:45:00 AM

Work Order #: 556913

Acceptable Temperature Range: 0 - 6 degC  
Air and Metal samples Acceptable Range: Ambient  
Temperature Measuring device used : R8

| Sample Receipt Checklist                                   | Comments |
|--|----------|
| #1 *Temperature of cooler(s)?                              | 4.9      |
| #2 *Shipping container in good condition?                  | Yes      |
| #3 *Samples received on ice?                               | Yes      |
| #4 *Custody Seal present on shipping container/ cooler?    | Yes      |
| #5 *Custody Seals intact on shipping container/ cooler?    | Yes      |
| #6 Custody Seals intact on sample bottles?                 | Yes      |
| #7 *Custody Seals Signed and dated?                        | Yes      |
| #8 *Chain of Custody present?                              | Yes      |
| #9 Sample instructions complete on Chain of Custody?       | Yes      |
| #10 Any missing/extra samples?                             | No       |
| #11 Chain of Custody signed when relinquished/ received?   | Yes      |
| #12 Chain of Custody agrees with sample label(s)?          | Yes      |
| #13 Container label(s) legible and intact?                 | Yes      |
| #14 Sample matrix/ properties agree with Chain of Custody? | Yes      |
| #15 Samples in proper container/ bottle?                   | Yes      |
| #16 Samples properly preserved?                            | Yes      |
| #17 Sample container(s) intact?                            | Yes      |
| #18 Sufficient sample amount for indicated test(s)?        | Yes      |
| #19 All samples received within hold time?                 | Yes      |
| #20 Subcontract of sample(s)?                              | No       |
| #21 VOC samples have zero headspace?                       | N/A      |

\* Must be completed for after-hours delivery of samples prior to placing in the refrigerator

Project Address:

**Aaron Lieb:**

We are reporting to you the results of the analyses performed on the samples received under the project name referenced above and identified with the XENCO Report Number(s) 556914. All results being reported under this Report Number apply to the samples analyzed and properly identified with a Laboratory ID number. Subcontracted analyses are identified in this report with either the NELAC certification number of the subcontract lab in the analyst ID field, or the complete subcontracted report attached to this report.

Unless otherwise noted in a Case Narrative, all data reported in this Analytical Report are in compliance with NELAC standards. The uncertainty of measurement associated with the results of analysis reported is available upon request. Should insufficient sample be provided to the laboratory to meet the method and NELAC Matrix Duplicate and Matrix Spike requirements, then the data will be analyzed, evaluated and reported using all other available quality control measures.

The validity and integrity of this report will remain intact as long as it is accompanied by this letter and reproduced in full, unless written approval is granted by XENCO Laboratories. This report will be filed for at least 5 years in our archives after which time it will be destroyed without further notice, unless otherwise arranged with you. The samples received, and described as recorded in Report No. 556914 will be filed for 60 days, and after that time they will be properly disposed without further notice, unless otherwise arranged with you. We reserve the right to return to you any unused samples, extracts or solutions related to them if we consider so necessary (e.g., samples identified as hazardous waste, sample sizes exceeding analytical standard practices, controlled substances under regulated protocols, etc).

We thank you for selecting XENCO Laboratories to serve your analytical needs. If you have any questions concerning this report, please feel free to contact us at any time.

Respectfully,

**Mike Kimmel**

## Flagging Criteria

- X** In our quality control review of the data a QC deficiency was observed and flagged as noted. MS/MSD recoveries were found to be outside of the laboratory control limits due to possible matrix /chemical interference, or a concentration of target analyte high enough to affect the recovery of the spike concentration. This condition could also affect the relative percent difference in the MS/MSD.
- B** A target analyte or common laboratory contaminant was identified in the method blank. Its presence indicates possible field or laboratory contamination.
- D** The sample(s) were diluted due to targets detected over the highest point of the calibration curve, or due to matrix interference. Dilution factors are included in the final results. The result is from a diluted sample.
- E** The data exceeds the upper calibration limit; therefore, the concentration is reported as estimated.
- F** RPD exceeded lab control limits.
- J** The target analyte was positively identified below the quantitation limit and above the detection limit.
- U** Analyte was not detected.
- L** The LCS data for this analytical batch was reported below the laboratory control limits for this analyte. The department supervisor and QA Director reviewed data. The samples were either reanalyzed or flagged as estimated concentrations.
- H** The LCS data for this analytical batch was reported above the laboratory control limits. Supporting QC Data were reviewed by the Department Supervisor and QA Director. Data were determined to be valid for reporting.
- K** Sample analyzed outside of recommended hold time.
- JN** A combination of the "N" and the "J" qualifier. The analysis indicates that the analyte is "tentatively identified" and the associated numerical value may not be consistent with the amount actually present in the environmental sample.

\*\* Surrogate recovered outside laboratory control limit.

**BRL** Below Reporting Limit.

**RL** Reporting Limit

**MDL** Method Detection Limit      **SDL** Sample Detection Limit      **LOD** Limit of Detection

**PQL** Practical Quantitation Limit      **MQL** Method Quantitation Limit      **LOQ** Limit of Quantitation

**DL** Method Detection Limit

**NC** Non-Calculable

+ NELAC certification not offered for this compound.

\* (Next to analyte name or method description) = Outside XENCO's scope of NELAC accreditation

***Recipient of the Prestigious Small Business Administration Award of Excellence in 1994.***

*Certified and approved by numerous States and Agencies.*

# XENCO Laboratories Prelogin/Nonconformance Report- Sample Log-In

Client: COG Operating LLC

Date/ Time Received: 07/05/2017 11:45:00 AM

Work Order #: 556914

Acceptable Temperature Range: 0 - 6 degC  
Air and Metal samples Acceptable Range: Ambient  
Temperature Measuring device used : R8

| Sample Receipt Checklist                                   | Comments |
|--|----------|
| #1 *Temperature of cooler(s)?                              | 4.9      |
| #2 *Shipping container in good condition?                  | Yes      |
| #3 *Samples received on ice?                               | Yes      |
| #4 *Custody Seal present on shipping container/ cooler?    | Yes      |
| #5 *Custody Seals intact on shipping container/ cooler?    | Yes      |
| #6 Custody Seals intact on sample bottles?                 | Yes      |
| #7 *Custody Seals Signed and dated?                        | Yes      |
| #8 *Chain of Custody present?                              | Yes      |
| #9 Sample instructions complete on Chain of Custody?       | Yes      |
| #10 Any missing/extra samples?                             | No       |
| #11 Chain of Custody signed when relinquished/ received?   | Yes      |
| #12 Chain of Custody agrees with sample label(s)?          | Yes      |
| #13 Container label(s) legible and intact?                 | Yes      |
| #14 Sample matrix/ properties agree with Chain of Custody? | Yes      |
| #15 Samples in proper container/ bottle?                   | Yes      |
| #16 Samples properly preserved?                            | Yes      |
| #17 Sample container(s) intact?                            | Yes      |
| #18 Sufficient sample amount for indicated test(s)?        | Yes      |
| #19 All samples received within hold time?                 | Yes      |
| #20 Subcontract of sample(s)?                              | No       |
| #21 VOC samples have zero headspace?                       | N/A      |

\* Must be completed for after-hours delivery of samples prior to placing in the refrigerator
