Steps and Actions to Prevent Waste			
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True		
Please explain reason for why this event was beyond this operator's control	Durango shut our lines in for maintenance. DCP then sent us notification that we needed to shut in three facilities and Durango did not come on line prior to DCP maintenance.		
Steps taken to limit the duration and magnitude of vent or flare	Due to both midstream operators in our area being down at the same time we had to set pressure release valves to protect the integrity of the facilities which caused some flaring.		
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	We plumbed lines to both midstream providers to help with maintenance but when both go down we have to protect integrity of facility when the pressures are too high.
