UPSET FLARING EVENT SPECIFIC JUSTIFICATIONS FORM**Facility:** Cypress 33A CTB**Flare Date:** 08/03/2023**Duration of event:** 3 Hours 29 minutes**MCF Flared:** 105**Start Time:** 08:30 PM**End Time:** 11:59 PM**Cause:** Emergency Flare > Planned Maintenance > Prevention Purging > Gas Lift Scrubber Dump Lines**Method of Flared Gas Measurement:** Gas Flare Meter

1. Reason why this event was beyond Operator's control:

In this case, Lost Tank 18 CPF intermittently flared due to a planned maintenance work on the gas lift scrubber dump lines, in which the lines were purged to prevent oxygen ingress to the sales line. During every brief instance of flaring, Oxy production techs, who were on-site to assist, began to choke wells during this process to eliminate as much flaring as possible without causing too much harm to the processing equipment and wells.

2. Steps Taken to limit duration and magnitude of venting or flaring:

It is OXY's policy to route its stranded gas to a flare during an unforeseen and unavoidable emergency or malfunction, that is beyond Oxy's control to avoid, prevent or foresee, to minimize emissions as much as possible as part of the overall steps taken to limit duration and magnitude of flaring. The flare at this facility has a 98% combustion efficiency to lessen emissions as much as possible. In this case, Lost Tank 18 CPF intermittently flared due to a planned maintenance work on the gas lift scrubber dump lines, in which the lines were purged to prevent oxygen ingress to the sales line. During every brief instance of flaring, Oxy production techs, who were on-site to assist, began to choke wells during this process to eliminate as much flaring as possible without causing too much harm to the processing equipment and wells.

3. Corrective Actions taken to eliminate the cause and reoccurrence of venting or flaring:

Oxy is limited in its action to eliminate the cause and recurrence of flaring during a planned maintenance repair, as there will be times where intermittent flaring shall occur as a safety measure for personnel, equipment and operations. The only actions that Oxy can take is to minimize emissions as much as possible during these planned equipment maintenance periods.
