AKM MEASUREMENT SERVICES,LLC. Natural Gas Analysis Report GPA 2172-09/API 14.5 Report with GPA 2145-16 Physical Properties

	Sample Information
Sample Name	RED TANK CPF 26 PROD 3
Technician	ANTHONY DOMINGUEZ
Analyzer Make & Model	INFICON MICRO GC
Last Calibration/Validation Date	01-18-2024
Meter Number	16611P
Air temperature	25
Flow Rate (MCF/Day)	10617
Heat Tracing	HEATED HOSE & GASIFIER
Sample description/mtr name	RED TANK CPF 26 PROD 3
Sampling Method	FILL & EMPTY
Operator	OCCIDENTAL PETROLEUM, OXY USA INC
State	NEW MEXICO
Region Name	PERMIAN_RESOURCES
Asset	NEW MEXICO
System	RED TANK
FLOC	OP-L2281-BT001
Sample Sub Type	СТВ
Sample Name Type	METER
Vendor	AKM MEASUREMENT
Cylinder #	38943
Sampled by	SCOTT
Sample date	1-19-2024
Analyzed date	1-23-2024
Method Name	C9
Injection Date	2024-01-23 14:31:21
Report Date	2024-01-23 14:35:34
EZReporter Configuration File	1-16-2023 OXY GPA C9+ H2S #2.cfgx
Source Data File	bf855204-fd71-4367-9dea-215dddff4faa
NGA Phys. Property Data Source	GPA Standard 2145-16 (FPS)
Data Source	INFICON Fusion Connector

UPSET FLARING EVENT SPECIFIC JUSTIFICATIONS FORM

Facility: Red Tank 26 CPF Flaring Date: 04/29/2024

Duration of Event: 3 Hour 9 Minutes **MCF Flared:** 293

Start Time: 08:50 PM End Time: 11:59 PM

Cause: Emergency Flare > Third Party Energy Power Provider > Xcel Energy > Power Outage > Transformer Fault

Method of Gas Measurement: Gas Flare Meter

1. Reason why this event was beyond Operator's control:

This emission was caused by the sudden, unavoidable breakdown of equipment or process that was beyond the owner/operator's control and did not stem from activity that could have been foreseen and avoided, and could not have been avoided by good design, operation, and maintenance practices. In this case, Xcel Energy, experienced a power glitch on their end, when their transformer had an internal fault and had to be replaced, which in turn caused a power outage at Oxy's Red Tank 27 CGL, forcing its gas to cease offloading to MPLX and instead some of its gas to flare at the Red Tank 26 CPF, until power was restored to the transformer and the facility. This event could not have been foreseen, avoided, or prevented as this event occurred with no advance notice or warning. OXY made every effort to control and minimize emissions as much as possible during this event and ensured all its operational equipment was back to normal and running efficiently.

2. Steps Taken to limit duration and magnitude of venting or flaring:

This emission was caused by the sudden, unavoidable breakdown of equipment or process that was beyond the owner/operator's control and did not stem from activity that could have been foreseen and avoided, and could not have been avoided by good design, operation, and maintenance practices. In this case, Xcel Energy, experienced a power glitch on their end, when their transformer had an internal fault and had to be replaced, which in turn caused a power outage at Oxy's Red Tank 27 CGL, forcing its gas to cease offloading to MPLX and instead some of its gas to flare at the Red Tank 26 CPF, until power was restored to the transformer and the facility. Once flaring was triggered at the Red Tank 26 CPF, Oxy field personnel were able to shut in high GOR wells. Once Xcel Energy restored power to the area, all emission control devices and the facility's equipment were brought back online at the Red Tank 27 CGL, and flaring ceased shortly thereafter. This event could not have been foreseen, avoided, or prevented as this event occurred with no advance notice or warning. OXY made every effort to control and minimize emissions as much as possible during this event.

3. Corrective Actions taken to eliminate the cause and reoccurrence of venting or flaring:

Oxy is limited in the corrective actions to eliminate this type of cause and potential reoccurrence of flaring resulting from third party provider power outages, whether scheduled or unscheduled, as Oxy is unable to decree how long a power outage can continue. Oxy continually strives to maintain and operate all its facility locations equipment in a manner consistent with good practices for minimizing emissions and reducing the number of emission events, when possible. Only thing OXY can do for these types of situations is to support and constant communicate with the third-party companies.

DEFINITIONS

For the sake of brevity and completeness, please allow for the following in all groups of questions and for the rest of this application:

- this application's operator, hereinafter "this operator";
- · venting and/or flaring, hereinafter "vent or flare";
- any notification or report(s) of the C-129 form family, hereinafter "any C-129 forms";
- the statements in (and/or attached to) this, hereinafter "the statements in this";
- and the past tense will be used in lieu of mixed past/present tense questions and statements.

Q	UESTIONS		
Operator: OXY USA INC P.O. Box 4294 Houston, TX 772104294		OGRID: 16696 Action Number: 344501 Action Type: [C-129] Venting and/or Flaring (C-129)	
QUESTIONS		[O-123] Venting diluter Harring (O-123)	
Prerequisites			
Any messages presented in this section, will prevent submission of this application. Please resolve	these issues before continuing with	th the rest of the questions.	
Incident Well	Unavailable.		
Incident Facility	[fAPP2322359755] Red Ta	nk 26 Central Processing Facility	
Determination of Reporting Requirements			
Answer all questions that apply. The Reason(s) statements are calculated based on your answers a	and may provide addional guidance		
Was this vent or flare caused by an emergency or malfunction	Yes		
Did this vent or flare last eight hours or more cumulatively within any 24-hour period from a single event	No		
Is this considered a submission for a vent or flare event	Yes, minor venting and/or	flaring of natural gas.	
An operator shall file a form C-141 instead of a form C-129 for a release that, includes liquid during v	venting and/or flaring that is or may	v be a major or minor release under 19.15.29.7 NMAC.	
Was there at least 50 MCF of natural gas vented and/or flared during this event	Yes		
Did this vent or flare result in the release of ANY liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water	No		
Was the vent or flare within an incorporated municipal boundary or withing 300 feet from an occupied permanent residence, school, hospital, institution or church in existence	No		
F to			
Equipment Involved	1		
Primary Equipment Involved	Other (Specify)		
Additional details for Equipment Involved. Please specify	Emergency Flare > Third Pa Transformer Fault	arty Energy Power Provider > Xcel Energy > Power Outage >	
Representative Compositional Analysis of Vented or Flared Natural Gas			
Please provide the mole percent for the percentage questions in this group. Methane (CH4) percentage	72		
Nitrogen (N2) percentage if greater than one percent	2		
Thirdgen (112) percentage, it greater than one percent	4

QUESTIONS (continued)

Operator:	OGRID:
OXY USA INC	16696
P.O. Box 4294	Action Number:
Houston, TX 772104294	344501
	Action Type:
	[C-129] Venting and/or Flaring (C-129)
QUESTIONS	

Date(s) and Time(s)		
Date vent or flare was discovered or commenced	04/29/2024	
Time vent or flare was discovered or commenced	08:50 PM	
Time vent or flare was terminated	11:59 PM	
Cumulative hours during this event	3	

Measured or Estimated Volume of Vented or Flared Natural Gas				
Natural Gas Vented (Mcf) Details	Not answered.			
Natural Gas Flared (Mcf) Details	Cause: Other Other (Specify) Natural Gas Flared Released: 293 Mcf Recovered: 0 Mcf Lost: 293 Mcf.			
Other Released Details	Not answered.			
Additional details for Measured or Estimated Volume(s). Please specify	Gas Flare Meter			
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.			

Venting or Flaring Resulting from Downstream Activity		
Was this vent or flare a result of downstream activity	No	
Was notification of downstream activity received by this operator	Not answered.	
Downstream OGRID that should have notified this operator	Not answered.	
Date notified of downstream activity requiring this vent or flare	Not answered.	
Time notified of downstream activity requiring this vent or flare	Not answered.	

Steps and Actions to Prevent Waste				
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True			
Please explain reason for why this event was beyond this operator's control	This emission was caused by the sudden, unavoidable breakdown of equipment or process that was beyond the owner/operator's control and did not stem from activity that could have been foreseen and avoided, and could not have been avoided by good design, operation, and maintenance practices. In this case, Xcel Energy, experienced a power glitch on their end, when their transformer had an internal fault and had to be replaced, which in turn caused a power outage at Oxy's Red Tank 27 CGL, forcing its gas to cease offloading to MPLX and instead some of its gas to flare at the Red Tank 26 CPF, until power was restored to the transformer and the facility. This event could not have been foreseen, avoided, or prevented as this event occurred with no advance notice or warning. OXY made every effort to control and minimize emissions as much as possible during this event and ensured all its operational equipment was back to normal and running efficiently.

ACKNOWLEDGMENTS

V	I acknowledge that I am authorized to submit a Venting and/or Flaring (C-129) report on behalf of this operator and understand that this report can be a complete C-129 submission per 19.15.27.8 and 19.15.28.8 NMAC.
V	I acknowledge that upon submitting this application, I will be creating a new incident file (assigned to this operator) to track any C-129 forms, pursuant to 19.15.27.7 and 19.15.28.8 NMAC and understand that this submission meets the notification requirements of Paragraph (1) of Subsection G and F respectively.
V	I hereby certify the statements in this report are true and correct to the best of my knowledge and acknowledge that any false statement may be subject to civil and criminal penalties under the Oil and Gas Act.
V	I acknowledge that the acceptance of any C-129 forms by the OCD does not relieve this operator of liability should their operations have failed to adequately investigate, report, and remediate contamination that poses a threat to groundwater, surface water, human health, or the environment.
✓	I acknowledge that OCD acceptance of any C-129 forms does not relieve this operator of responsibility for compliance with any other applicable federal, state, or local laws and/or regulations.
