Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	high scrubber level on fuel skid shut down fuel skid which then shut down compressors resulting in flaring.
Steps taken to limit the duration and magnitude of vent or flare	Production cut back to mitigate flaring while fuel skid was brought back online, and compressors then brought online to stabilize pressures. All of the facilities and emissions control devices at this site are operating as designed and, where applicable, are authorized. Chevron field personnel will execute practicable measures to minimize emissions.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Corrective measures focused on reducing gas production as quickly and safely as possible to minimize the duration and volume of gas flared
