| Steps and Actions to Prevent Waste   |  |
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True   |
| Please explain reason for why this event was beyond this operator's control  | Silverback could not have anticipated the current event which was caused by high pressure in Enterprise's pipeline. Enterprise has a back pressure valve installed on their sales meter run that closes and diverts our gas to flare when their pressure increases above a set amount. |
| Steps taken to limit the duration and magnitude of vent or flare   | We documented the incident in order to send a notification to Enterprise to resolve the high line pressure issue.  |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare  | Enterprise needs to install more compression so back up compression is available.  |
