Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	We had a reportable release at the Sandra Jean East CTB. The Operator arrived on location and found fluid inside the lined containment. After further inspection, a hole in the produced water tanks suction nozzle was discovered. This resulted in an estimated release of 12.7 barrels produced water into the lined containment. All fluids have since been recovered with a vac truck. The containment is scheduled to be washed, and a liner inspection will be scheduled in the coming weeks.

Remediation Plan		
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.		
Requesting a remediation plan approval with this submission	No	
The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.		

Not answered.
