

# Gas Composition and Properties

Effective May 1, 2025 00:00 - January 18, 2038 21:14

Source #: 198423

Name: SANDRA JEAN 501H ALLOC

| Component              | Mole %   | Liquid Content | Mass %   | Property               | Total Sample |
|------------------------|----------|----------------|----------|------------------------|--------------|
| Carbon Dioxide (CO2)   | 0.7710   |                | 1.4222   | Pressure Base          | 14.73        |
| Nitrogen (N2)          | 3.5420   |                | 4.1589   | Temperature Base       | 60           |
| Methane (C1)           | 67.5180  |                | 45.3997  | HCDP @ Sample Pressure |              |
| Ethane (C2)            | 14.2300  | 3.8219         | 17.9343  | Cricondentherm         |              |
| Propane (C3)           | 8.2970   | 2.2956         | 15.3348  | HV, Dry @ Base P, T    | 1361.19      |
| Isobutane (IC4)        | 0.9370   | 0.3079         | 2.2827   | HV, Sat @ Base P, T    | 1337.50      |
| n-Butane (NC4)         | 2.4670   | 0.7811         | 6.0100   | HV, Sat @ Sample P, T  | 1351.48      |
| Isopentane (IC5)       | 0.5190   | 0.1906         | 1.5695   | Relative Density       | 0.8272       |
| n-Pentane (NC5)        | 0.5460   | 0.1988         | 1.6511   |                        |              |
| Hexanes Plus (C6+)     | 1.1730   | 0.4844         | 4.2368   |                        |              |
| Argon (Ar)             |          |                |          |                        |              |
| Carbon Monoxide (CO)   |          |                |          |                        |              |
| Hydrogen (H2)          | 0.0000   |                | 0.0000   |                        |              |
| Oxygen (O2)            | 0.0000   |                | 0.0000   |                        |              |
| Helium (He)            | 0.0000   |                | 0.0000   |                        |              |
| Water (H2O)            |          |                |          |                        |              |
| Hydrogen Sulfide (H2S) | 0.0000   |                | 0.0000   | C6+: 100               |              |
| Totals                 | 100.0000 | 8.0810         | 100.0000 |                        |              |

## Sample

Date: 04/07/2025 Type: Spot  
Tech: GILBERTO LAZO  
Pressure: 124.0 psi Temp.: 101 °F  
Gauge: Gauge H2O:  
Atm. Pressure: 13.1 psi H2S: 3 ppm

Remarks: Sandra Jean 501 Prod

## Analysis

Date: 04/16/2025 Instrument:  
Cylinder: 1439  
Tech: System Administrator

Remarks: OK

| <b>Determination of Reporting Requirements</b><br><i>Answer all questions that apply. The Reason(s) statements are calculated based on your answers and may provide additional guidance.</i>                                                                                               |                                                   |
| Was this vent or flare caused by an emergency or malfunction                                                                                                                                                                                                                               | Yes                                               |
| Did this vent or flare last eight hours or more cumulatively within any 24-hour period from a single event                                                                                                                                                                                 | Yes                                               |
| Is this considered a submission for a vent or flare event                                                                                                                                                                                                                                  | Yes, minor venting and/or flaring of natural gas. |
| <i>An operator shall file a form C-141 instead of a form C-129 for a release that, includes liquid during venting and/or flaring that is or may be a major or minor release under 19.15.29.7 NMAC.</i>                                                                                     |                                                   |
| Was there <b>at least 50 MCF</b> of natural gas vented and/or flared during this event                                                                                                                                                                                                     | Yes                                               |
| Did this vent or flare result in the release of <b>ANY</b> liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water | No                                                |
| Was the vent or flare within an incorporated municipal boundary or within 300 feet from an occupied permanent residence, school, hospital, institution or church in existence                                                                                                              | No                                                |

|                                                           |               |
|-----------------------------------------------------------|---------------|
| <b>Equipment Involved</b>                                 |               |
| Primary Equipment Involved                                | Not answered. |
| Additional details for Equipment Involved. Please specify | Not answered. |

|                                                                                                                                                                    |               |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>Representative Compositional Analysis of Vented or Flared Natural Gas</b><br><i>Please provide the mole percent for the percentage questions in this group.</i> |               |
| Methane (CH4) percentage                                                                                                                                           | 68            |
| Nitrogen (N2) percentage, if greater than one percent                                                                                                              | 4             |
| Hydrogen Sulfide (H2S) PPM, rounded up                                                                                                                             | 0             |
| Carbon Dioxide (CO2) percentage, if greater than one percent                                                                                                       | 0             |
| Oxygen (O2) percentage, if greater than one percent                                                                                                                | 1             |
| <i>If you are venting and/or flaring because of Pipeline Specification, please provide the required specifications for each gas.</i>                               |               |
| Methane (CH4) percentage quality requirement                                                                                                                       | Not answered. |
| Nitrogen (N2) percentage quality requirement                                                                                                                       | Not answered. |
| Hydrogen Sulfide (H2S) PPM quality requirement                                                                                                                     | Not answered. |

**QUESTIONS**

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 06/27/2025 |
| Time vent or flare was discovered or commenced | 12:00 AM   |
| Time vent or flare was terminated              | 12:00 AM   |
| Cumulative hours during this event             | 24         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                                   |
|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                                     |
| Natural Gas Flared (Mcf) Details                                          | Cause: Equipment Failure   Separator   Natural Gas Flared   Released: 197 Mcf   Recovered: 0 Mcf   Lost: 197 Mcf. |
| Other Released Details                                                    | Not answered.                                                                                                     |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                     |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                        |

| Venting or Flaring Resulting from Downstream Activity             |               |
|-------------------------------------------------------------------|---------------|
| Was this vent or flare a result of downstream activity            | No            |
| Was notification of downstream activity received by this operator | Not answered. |
| Downstream OGRID that should have notified this operator          | Not answered. |
| Date notified of downstream activity requiring this vent or flare | Not answered. |
| Time notified of downstream activity requiring this vent or flare | Not answered. |

| Steps and Actions to Prevent Waste                                                                                               |                                     |
|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | True                                |
| Please explain reason for why this event was beyond this operator's control                                                      | Dump Valve Malfunction              |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | MINIMIZE EVENT DURATION             |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | MIDSTREAM AND MARKETING TO EVALUATE |

|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="checkbox"/> | I acknowledge that I am authorized to submit a <i>Venting and/or Flaring</i> (C-129) report on behalf of this operator and understand that this report can be a <b>complete</b> C-129 submission per 19.15.27.8 and 19.15.28.8 NMAC.                                                                                      |
| <input checked="" type="checkbox"/> | I acknowledge that upon submitting this application, I will be creating a new incident file (assigned to this operator) to track any C-129 forms, pursuant to 19.15.27.7 and 19.15.28.8 NMAC and understand that this submission meets the notification requirements of Paragraph (1) of Subsection G and F respectively. |
| <input checked="" type="checkbox"/> | I hereby certify the statements in this report are true and correct to the best of my knowledge and acknowledge that any false statement may be subject to civil and criminal penalties under the Oil and Gas Act.                                                                                                        |
| <input checked="" type="checkbox"/> | I acknowledge that the acceptance of any C-129 forms by the OCD does not relieve this operator of liability should their operations have failed to adequately investigate, report, and remediate contamination that poses a threat to groundwater, surface water, human health, or the environment.                       |
| <input checked="" type="checkbox"/> | I acknowledge that OCD acceptance of any C-129 forms does not relieve this operator of responsibility for compliance with any other applicable federal, state, or local laws and/or regulations.                                                                                                                          |
