Lea County, New Mexico

ESRR Project No. 2825/ VP-21510

To Whom It May Concern:

Earth Systems Response & Restoration (ESRR), on behalf of Marathon Petroleum (MPLX), presents the following Closure Request Report (CRR) detailing excavation activities and subsequent soil sampling events associated with an inadvertent release of crude oil at the CTB-317 (SW Crude 6in) (Site). Based on completed remedial actions and laboratory analytical results from recent soil sampling events, MPLX is requesting No Further Action (NFA) at the Site.

Site Location & Incident Description

The Site was originally reported by MPLX to be located in Unit N, Section 13, Township 26 South, Range 33 East, in Lea County, New Mexico (32.05°, -103.53°) and associated with oil and gas exploration and production operations on Private Land. Upon further investigation by ESRR, the location should be updated to Unit N, Section 12, Township 26 South, Range 33 East, in Lea County, New Mexico (32.053941°, -103.527440°), associated with oil and gas exploration and production operations on Federal Land managed by the Bureau of Land Management (BLM) (**Figure 1**).

On November 5, 2024, a faulty piece of equipment ruptured, causing the release of approximately 33 barrels (bbl) of crude oil overlying a Devon operated production pad with no fluids reported as recovered. MPLX conducted initial site assessment activities and mapped the observed footprint hereafter referred to as the Area of Concern (AOC) (**Figure 2**). MPLX gave notice to the New Mexico Oil Conservation Division (NMOCD) on November 6, 2024, by Notification of Release (NOR) and was subsequently assigned Incident Number nAPP2431159375.

ESRR was contracted on January 17, 2025, to complete remediation activities at the Site, guided by MPLX prerequisites.

On February 5, 2025, MPLX requested an extension to the February 3, 2025, due date in which NMOCD revealed that the Corrective Action Form C-141 (Form C-141) submitted on January 23, 2025, was rejected for non-payment. MPLX successfully submitted a Form C-141 on this same day.

CTB-317 (SW Crude 6in) - Closure Request Report
 Incident Number: nAPP2431159375
 GPS: 32.053941°, -103.527440°

NMOCD granted the extension on February 5, 2025, for a due date of May 6, 2025, stating the following:

"The initial C-141 needs to be filled out and uploaded to the payment portal within 15 days of discovery of the release. Additionally, A Remediation Plan was due on 2/3/2025. An extension needs to be requested before the 90-day Remediation Deadline has expired. If this happens again, the incident may generate enforcement actions as soon as an operator is out of compliance. Please don't let this happen again. The Extension Request is Approved. Include this e-mail correspondence in the Remediation and/or Closure Report."

Site Characterization

ESRR characterized the Site according to Table I, Closure Criteria for Soils Impacted by a Release, of Title 19, Chapter 15, Part 29, Section 12 (19.15.29.12) of the New Mexico Administrative Code (NMAC). The following proximities were estimated:

- Between 1 and 5 miles of any continuously flowing watercourse or any other significant watercourse;
- Between 500 and 1,000 feet of any lakebed, sinkhole or playa lake (measured from the ordinary high-water mark);
- Between ½ and 1 mile of any occupied permanent residence, school, hospital, institution or church;
- Between ½ and 1 mile of any spring or a private, domestic fresh water well used by less than five households for domestic or stock watering purposes;
- Between 1 and 5 miles of any other freshwater well or spring;
- Greater than 5 miles of any incorporated municipal boundary or a defined municipal fresh water well field covered under a municipal ordinance;
- Between 500 and 1,000 feet of any wetland;
- Greater than 5 miles of any subsurface mine;
- Overlying or within unstable area (i.e. critical/ high/ or medium karst potential); and
- Greater than 5 miles of a 100-year floodplain.

Receptor details used to determine the Site characterization are included in **Figure 1A** and **Figure 1B**. **Referenced Well Record** is attached.

Based on the results from the desktop review, no depth to water wells were found within ½ mile with logged data no greater than 25 years old and the Site is designated with medium karst potential. The following Closure Criteria was applied:

Constituents of Concern (COCs)	Closure Criteria [‡]
Chloride	600 milligram per kilogram (mg/kg)
Total Petroleum Hydrocarbon (TPH)	100 mg/kg
Benzene	10 mg/kg
Benzene, Toluene, Ethylbenzene, Total Xylenes (BTEX)	50 mg/kg

[‡]The reclamation concentration requirements of 600 mg/kg Chloride and 100 mg/kg TPH apply to the top 4 feet of areas to be immediately reclaimed following remediation pursuant to NMAC 19.15.17.13.

TPH= Gasoline Range Organics + Diesel Range Organics + Oil Range Organics

Laboratory Analytical Methods used: Environmental Protection Agency (EPA) 300.0, EPA 8015 NM, EPA 8021 B

Remediation Activities

During February 2025, ESRR performed excavation activities of identified impacts via mechanical equipment based on MPLX instruction. Excavation activities were driven by field screening soil for chloride utilizing QuanTab® test strips and visual observation. The excavation was vertically advanced to an approximate depth of 1-foot below ground surface (bgs).

Incident Number: nAPP2431159375
GPS: 32.053941°, -103.527440°

Following the removal of soil, ESRR collected 5-point composite soil samples at a sampling frequency of 200 square feet from the excavation floor (CS-1 through CS-27) and sidewalls (SW-1 through SW-3). The 5-point composite soil samples were comprised of five equivalent aliquots homogenized in a 1-gallon resealable plastic bag. Confirmation soil samples were placed directly into pre-cleaned jars, packed with minimal void space, labeled, and placed on ice. The confirmation soil samples were transported under strict chain-of-custody procedures, to Eurofins in Carlsbad, New Mexico, for analysis of the COCs.

Laboratory analytical results for confirmation soil samples (CS-24 through CS-27 and SW-2) were compliant with Site Closure Criteria and/or the reclamation standard.

Laboratory analytical results for confirmation soil samples (CS-1 through CS-23, SW-1, SW-3), indicated TPH-GRO+TPH-DRO/TPH was above the Site Closure Criteria and/or the reclamation standard. Elevated TPH-GRO+TPH-DRO/TPH concentrations were characterized by concentrations ranging from 179 to 4,930 mg/kg, specifically for TPH-GRO and TPH-DRO at 1-foot bgs.

During April 2025, ESRR performed additional excavation activities in the proximities to confirmation soil samples (CS-1 through CS-23, SW-1, SW-3), vertically advanced to depths ranging from 1.5 to 3-feet bgs. Following the removal of additional soil, ESRR collected, handled, transported, and analyzed the final confirmation soil samples as previously described. **Photographic Documentation** of all activities are attached.

Laboratory analytical results indicated that concentrations of COCs for all final confirmation soil samples were below the applicable Site Closure Criteria and/or reclamation standard. Laboratory results are summarized in **Table 1**, included in the attachments. The locations of all final confirmation soil samples are shown in **Figure 3**.

Approximately 740 cubic yards (CY) of impacted soil was removed from the Site and transported to Northern Delaware Basin Disposal in Jal, New Mexico under MPLX approved manifests. Upon receipt of the final confirmation soil samples results, the excavation was backfilled with clean, locally sourced soil and the Site was restored to "as close to its original state" as possible. The final soil cover was contoured to match the Site's pre-existing grade to prevent ponding of water and erosion.

Closure Request

Based on laboratory analytical results for all final confirmation soil samples, MPLX believes that residual soil impacts associated with the inadvertent release have been excavated and removed from the Site in accordance with Site Closure Criteria. MPLX believes the completed remedial actions meet the requirements set forth in NMAC 19.15.29.13 regulations in order to be protective of human health, the environment, and groundwater. As such, NFA appears warranted at this time, and MPLX respectfully requests Closure of this CRR associated with Incident Number nAPP2431159375.

If you have any questions or comments, please do not hesitate to contact Gilbert Moreno at (832) 541-7719 or gmoreno@earthsyst.net. Documentation and correspondence notifications and Executed chain-of-custody forms and laboratory analytical reports are attached.

Mr. Krakow and Mr. Moreno,

The initial C-141 needs to be filled out and uploaded to the payment portal within 15 days of discovery of the release. Additionally, A Remediation Plan was due on 2/3/2025. An extension needs to be requested before the 90-day Remediation Deadline has expired. If this happens again, the incident may generate enforcement actions as soon as an operator is out of compliance. Please don't let this happen again. The Extension Request is Approved. Include this e-mail correspondence in the Remediation and/or Closure Report.

Hi Rob,

I am forwarding this to you as you are the reviewer and I had them submit an initial C-141 first which should be in your queue. They were requesting an extension.

Hi Gilbert,

I resubmitted the C-141 for CTB 317, not sure why the payment didn't go through on the last one.

Hi Gilbert,

Before an extension can even be considered, an initial C-141 needs to be submitted. The initial C-141 submitted on 1/23/25 was rejected for non payment.

Kind regards,

Shelly

Hello,

Earth Sytems R & R (ESRR) on behalf of Marathon Petroleum (MPLX) is requesting an extension to the current deadline for a report required in 19.15.29.12.B(1) NMAC at the CTB-317 (SW Crude 6in) (Site).

A crude oil release was discovered on November 5th, 2024, and was subsequently assigned Incident Number nAPP2431159375. ESRR was assigned to this incident by MPLX on January 17th, 2025, and anticipates remediation activities to commence the week of February 10th, 2025.

MPLX requests an extension of the February 3rd, 2025, deadline for the release associated with Incident Number nAPP2431159375, to allow additional time for remediation activities and for ESRR to complete a subsequent corrective action closure report upon completion.

Thanks,

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt

The samples were received on 2/14/2025 3:20 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.6°C.

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt

The samples were received on 2/14/2025 3:20 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.6°C.

REVISION

The report being provided is a revision of the original report sent on 4/16/2025. The report (revision 1) is being revised due to Revised to correct sample IDs.

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt

The samples were received on 4/10/2025 4:13 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was -6.6°C.

Receipt Exceptions

The following samples were received and analyzed from an unpreserved bulk soil jar: CS - 1 (890-7926-1), CS - 2 (890-7926-2), CS - 3 (890-7926-3), CS - 4 (890-7926-4), CS - 5 (890-7926-5), CS - 6 (890-7926-6), CS - 7 (890-7926-7), CS - 8 (890-7926-8), CS - 9 (890-7926-9), CS - 10 (890-7926-10), CS - 11 (890-7926-11), CS - 12 (890-7926-12), CS - 13 (890-7926-13), CS - 14 (890-7926-14), CS - 15 (890-7926-15), CS - 16 (890-7926-16), CS - 17 (890-7926-17), CS - 18 (890-7926-18), CS - 19 (890-7926-19), CS - 20 (890-7926-20), CS - 21 (890-7926-21), CS - 22 (890-7926-22), CS - 23 (890-7926-23), CS - 28 (890-7926-24), CS - 29 (890-7926-25), CS - 30 (890-7926-26) and CS - 31 (890-7926-27).

GC VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics

Method 8015MOD_NM: Surrogate recovery for the following sample was outside control limits: CS - 2 (890-7926-2). Evidence of matrix interferences is not obvious.

Method 8015MOD_NM: Surrogate recovery for the following samples were outside control limits: (LCS 880-107581/2-A) and (LCSD 880-107581/3-A). Evidence of matrix interferences is not obvious.

Method 8015MOD_NM: Surrogate recovery for the following sample was outside control limits: (LCS 880-107583/2-A). Evidence of matrix interferences is not obvious.

Method 8015MOD_NM: The laboratory control sample (LCS) associated with preparation batch 880-107583 and analytical batch 880-107708 was outside acceptance criteria. Re-extraction and/or re-analysis could not be performed; therefore, the data have been reported. The batch matrix spike/matrix spike duplicate (MS/MSD) was within acceptance limits and may be used to evaluate matrix performance.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC

Method 300_ORGFM_28D - Soluble: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 880-107438 and analytical batch 880-107465 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt

The samples were received on 4/10/2025 4:13 PM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was -6.6°C.

Receipt Exceptions

The following samples were received and analyzed from an unpreserved bulk soil jar: SW-1 (890-7925-1), SW-3 (890-7925-2), SW-4 (890-7925-3) and SW-5 (890-7925-4).

GC VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics

Method 8015MOD_NM: Surrogate recovery for the following samples were outside control limits: (LCS 880-107581/2-A) and (LCSD 880-107581/3-A). Evidence of matrix interferences is not obvious.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

QUESTIONS

Nature and Volume of Release (continued)	
Is this a gas only submission (i.e. only significant Mcf values reported)	No, according to supplied volumes this does not appear to be a "gas only" report.
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	Yes
Reasons why this would be considered a submission for a notification of a major release	From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more.

With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.

Initial Response	
<i>The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.</i>	
The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	<i>Not answered.</i>

Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Was this release entirely contained within a lined containment area	No
Soil Contamination Sampling: (Provide the highest observable value for each, in milligrams per kilograms.)	
Chloride (EPA 300.0 or SM4500 Cl B)	393

These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.

The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.

Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Matt Krakow Title: Environmental Professional Email: mjkrakow@marathonpetroleum.com Date: 05/02/2025

The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

michael.buchanan	The reclamation report will need to include: Executive Summary of the reclamation activities; Scaled Site Map including sampling locations; Analytical results including, but not limited to, results showing that any remaining impacts meet the reclamation standards and results to prove the backfill is non-waste containing; At least one (1) representative 5-point composite sample will need to be collected from the backfill material that will be used for the reclamation of the top four feet of the excavation. The OCD reserves the right to request additional sampling if needed; pictures of the backfilled areas showing that the area is back, as nearly as practical, to the original condition or the final land use and maintain those areas to control dust and minimize erosion to the extent practical; pictures of the top layer, which is either the background thickness of topsoil or one foot of suitable material to establish vegetation at the site, whichever is greater; and a revegetation plan.	8/15/2025
michael.buchanan	A reclamation report will not be accepted until reclamation of the release area, including areas reasonably needed for production or drilling activities, is complete and meet the requirements of 19.15.29.13 NMAC. Areas not reasonably needed for production or drilling activities will still need to be reclaimed and revegetated as early as practicable.	8/15/2025
