Lab Source Description

| Component          | Normalized Mol % | Un-Normalized Mol % | GPM    |
|--------------------|------------------|---------------------|--------|
| H2S (H2S)          | 0.0030           | 0.003               |        |
| Nitrogen (N2)      | 0.9060           | 0.90587             |        |
| CO2 (CO2)          | 1.0900           | 1.08966             |        |
| Methane (C1)       | 82.7450          | 82.7476             |        |
| Ethane (C2)        | 7.6970           | 7.69766             | 2.0580 |
| Propane (C3)       | 3.4460           | 3.44613             | 0.9490 |
| I-Butane (IC4)     | 0.5820           | 0.58219             | 0.1900 |
| N-Butane (NC4)     | 1.2440           | 1.24427             | 0.3920 |
| I-Pentane (IC5)    | 0.4460           | 0.44575             | 0.1630 |
| N-Pentane (NC5)    | 0.4060           | 0.4062              | 0.1470 |
| Hexanes Plus (C6+) | 1.4350           | 1.43466             | 0.6230 |
| TOTAL              | 100.0000         | 100.0030            | 4.5220 |

Method(s): Gas C6+ - GPA 2261, Extended Gas - GPA 2286, Calculations - GPA 2172

## Analyzer Information

Device Type: Gas Chromatograph      Device Make: Shimadzu  
Device Model: GC-2014      Last Cal Date: Jul 14, 2025

## Gross Heating Values (Real, BTU/ft³)

|                        |           |                       |           |
|------------------------|-----------|-----------------------|-----------|
| 14.696 PSI @ 60.00 Å°F |           | 14.73 PSI @ 60.00 Å°F |           |
| Dry                    | Saturated | Dry                   | Saturated |
| 1,230.2                | 1,210.1   | 1,233.0               | 1,212.9   |

## Calculated Total Sample Properties

GPA2145-16 \*Calculated at Contract Conditions

|                       |                        |
|-----------------------|------------------------|
| Relative Density Real | Relative Density Ideal |
| 0.7224                | 0.7202                 |
| Molecular Weight      |                        |
| 20.8561               |                        |

## C6+ Group Properties

Assumed Composition

|              |              |              |
|--------------|--------------|--------------|
| C6 - 60.000% | C7 - 30.000% | C8 - 10.000% |
|--------------|--------------|--------------|

Field H2S  
30 PPM

## PROTREND STATUS:

Passed By Validator on Aug 26, 2025

## DATA SOURCE:

Imported

## PASSED BY VALIDATOR REASON:

First sample taken @ this point, composition looks reasonable

## VALIDATOR:

Alexus Sepeda

## VALIDATOR COMMENTS:

OK

**Claire 33 34 Fee #201H – Flared Volumes**

These gas volumes were metered from the test separator at the Claire wellhead, flaring occurring in the flowback period only.

**QUESTIONS**

| Date(s) and Time(s)                            |            |
|------------------------------------------------|------------|
| Date vent or flare was discovered or commenced | 09/04/2025 |
| Time vent or flare was discovered or commenced | 12:00 AM   |
| Time vent or flare was terminated              | 11:59 PM   |
| Cumulative hours during this event             | 24         |

| Measured or Estimated Volume of Vented or Flared Natural Gas              |                                                                                                              |
|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                          | Not answered.                                                                                                |
| Natural Gas Flared (Mcf) Details                                          | Cause: Liquids Unloading   Well   Natural Gas Flared   Released: 897 Mcf   Recovered: 0 Mcf   Lost: 897 Mcf. |
| Other Released Details                                                    | Not answered.                                                                                                |
| Additional details for Measured or Estimated Volume(s). Please specify    | Not answered.                                                                                                |
| Is this a gas only submission (i.e. only significant Mcf values reported) | Yes, according to supplied volumes this appears to be a "gas only" report.                                   |

| Venting or Flaring Resulting from Downstream Activity             |                                        |
|-------------------------------------------------------------------|----------------------------------------|
| Was this vent or flare a result of downstream activity            | Yes                                    |
| Was notification of downstream activity received by this operator | Yes                                    |
| Downstream OGRID that should have notified this operator          | [332978] Kinetik NM Gas Gathering, LLC |
| Date notified of downstream activity requiring this vent or flare | 08/25/2025                             |
| Time notified of downstream activity requiring this vent or flare | 08:00 AM                               |

| Steps and Actions to Prevent Waste                                                                                               |                                                                                                                                                                      |
|----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control. | False                                                                                                                                                                |
| Please explain reason for why this event was beyond this operator's control                                                      | Not answered.                                                                                                                                                        |
| Steps taken to limit the duration and magnitude of vent or flare                                                                 | Kinetik is commissioning a new compressor station to reduce line pressure and increase sales. Tascosa is unloading the well and flaring gas produced up the annulus. |
| Corrective actions taken to eliminate the cause and reoccurrence of vent or flare                                                | Line pressure is expected to be reduced on 9/12. If not, Tascosa will shut in the backside production.                                                               |

|                                     |                                                                                                                                                                                                                                                                                                                           |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="checkbox"/> | I acknowledge that I am authorized to submit a <i>Venting and/or Flaring</i> (C-129) report on behalf of this operator and understand that this report can be a <b>complete</b> C-129 submission per 19.15.27.8 and 19.15.28.8 NMAC.                                                                                      |
| <input checked="" type="checkbox"/> | I acknowledge that upon submitting this application, I will be creating a new incident file (assigned to this operator) to track any C-129 forms, pursuant to 19.15.27.7 and 19.15.28.8 NMAC and understand that this submission meets the notification requirements of Paragraph (1) of Subsection G and F respectively. |
| <input checked="" type="checkbox"/> | I hereby certify the statements in this report are true and correct to the best of my knowledge and acknowledge that any false statement may be subject to civil and criminal penalties under the Oil and Gas Act.                                                                                                        |
| <input checked="" type="checkbox"/> | I acknowledge that the acceptance of any C-129 forms by the OCD does not relieve this operator of liability should their operations have failed to adequately investigate, report, and remediate contamination that poses a threat to groundwater, surface water, human health, or the environment.                       |
| <input checked="" type="checkbox"/> | I acknowledge that OCD acceptance of any C-129 forms does not relieve this operator of responsibility for compliance with any other applicable federal, state, or local laws and/or regulations.                                                                                                                          |
