SITE RECLAMATION REPORT
INEX #3
32.724228, -104.346278
UNIT A, SECTION 26, TOWNSHIP 18S, RANGE 26E
EDDY COUNTY, NEW MEXICO
INCIDENT # NAPP2110635348
RANGER REFERENCE NO. 5375

1.0 SITE LOCATION AND BACKGROUND

The Inex #3 well pad (Site) is located approximately 8.7 miles southeast of Artesia within Eddy County, New Mexico. The facility is situated in Unit A, Section 26, T18S-R26E at GPS coordinates 32.724228, -104.346278. In May 2019, the Inex #3 well was plugged and abandoned. During reclamation activities at the Site, an area of concern related to an apparent unknown historic produced water spill was discovered in the vicinity of the former well head location.

To address the impacted soils, an area measuring approximately 85 feet by 60 feet was reportedly initially excavated to a depth of approximately three feet below ground surface (bgs) and then backfilled. Due to events associated with the initial soil removal operations at the Site, EOG Resources, Inc. (EOG) subsequently engaged Ranger Environmental Services, LLC (Ranger) to assist in the assessment and remediation of the site conditions. Assessment activities were conducted at the Site between June 2021 and March 2023. Six phases of assessment (and six associated reports/work plans) were ultimately required to delineate the horizontal and vertical extent of the site soil impacts. The assessment activities included the installation and sampling of test pits, two vertical delineation soil boring investigations, an electromagnetic (EM) survey, and background soil conditions assessment.

Due to the complex nature of the impacts at the Site, numerous phases of assessment, as well as discussion between EOG and NMOCD representatives on site remediation goals, multiple variations of proposed remediation plans were submitted to the NMOCD. Ultimately, on December 26, 2023, the NMOCD approved of the utilization of site-specific soil chloride cleanup criteria for the soils below a depth of four feet. From December 12, 2023 to December 30, 2024, remediation activities were completed at the Site.

Upon completion of remediation activities, a Ranger prepared "*Site Remediation and Closure Report,"* dated February 6, 2025 was submitted to the NMOCD. The report contained full details of the completed remedial efforts at the Site and requested incident closure status. On May 28, 2025, the NMOCD approved the *Site Remediation and Closure Report.*

A *Topographic Map* and *Area Map* noting the location of the Site and surrounding areas are provided in the Figures section. A copy of the February 6, 2025 Ranger "*Site Remediation and Closure Report*" is included in Appendix D.

2.0 SITE REMEDIATION

Below is a summary of the final, NMOCD-approved site closure criteria:

NMOCD APPROVED SITE CLOSURE CRITERIA

REGULATORY STANDARD	CHLORIDE	TPH (GRO+DRO +MRO)	BTEX	BENZENE
O'- 4' BGS SOILS 19.15.29.12 NMAC Table 1 Closure Criteria for Soils Impacted by a Release (GW ≤50') & 19.15.29.13 NMAC Restoration, Reclamation and Re-Vegetation (Soils 0'-4')	600	100[1]	50[1]	10[1]
>4' BGS SOILS *BTEX & TPH*: 19.15.29.12 NMAC Table 1 Closure Criteria for Soils Impacted by a Release (GW ≤50') *Chloride*: NMOCD Approved Site-Specific Background	1,242[2]	100	50	10

All Values Presented in Parts Per Million (mg/Kg)

1. *Value derived from the State of New Mexico Energy, Minerals and Natural Resources Department document Procedures for the Implementation of Digital C-141 and the release rule (19.15.29 NMAC) dated December 1, 2023.*
2. *Value derived from site-specific soil background study as summarized in Ranger's Nov. 14, 2023 "Background Soil Chloride Investigation Report."*

2.1 Impacted Soil Removal and Remediation Summary

Remedial operations at the Site were conducted from December 12, 2023 to December 30, 2024. Full details of the completed remedial efforts for the subject incident were provided in the "*Remediation and Closure Report*," dated February 6, 2025, previously submitted to the NMOCD. A complete copy of the report is provided in Appendix D.

During the excavation process, Ranger personnel collected field readings utilizing an OVM and field chloride titration kit to guide the excavation boundaries and depths. Upon completion of the soil removal operations, the excavation had maximum dimensions of approximately 320 feet by 250 feet. The majority of the excavation was primarily completed to depths of four feet below ground surface (bgs) to five feet bgs. The deep excavation area located in the southwestern portion of the excavation had a maximum depth of 31 feet bgs.

During the remediation process, numerous cleanup confirmation soil sampling events were conducted to verify the field readings and confirm whether or not the site closure criteria had been attained. In the event that the cleanup confirmation soil sampling results indicated that the site closure criteria had not been attained, additional over-excavation and re-sampling of those areas were conducted. In total, 545 cleanup confirmation soil samples were collected and analyzed which finally confirmed the vertical and horizontal attainment of the site closure criteria.

The cleanup confirmation soil samples were collected as five-part composite samples in accordance with NMAC 19.15.29.12 with each sample representing less than 200 square feet. Upon collection, the soil samples were submitted to Eurofins Albuquerque in Albuquerque, New Mexico (formerly Hall Environmental Laboratories) or Cardinal Labs in Hobbs New Mexico for analysis of total petroleum hydrocarbons (TPH) using EPA Method 8015; and benzene, toluene, ethylbenzene and xylenes (BTEX) using EPA Method 8021, and total chloride. The chloride analysis of samples submitted to Eurofins/Hall were completed using EPA Method 300, and the samples submitted to Cardinal Labs were analyzed using Method SM 4500. Copies of the laboratory analytical reports including chain-of-custody documentation are attached.

The cleanup confirmation soil samples were collected and managed using standard QA/QC and chain-of-custody procedures. Ranger personnel wore new nitrile gloves while handling each sample in order to prevent cross-contamination of samples. The collected soil samples were containerized in sterile, laboratory-suppled containers and were subsequently sealed in one or more zip lock bags and stored in a sample shuttle containing ice until arrival at the laboratory for chemical analysis. All sample containers were labeled with the project name, sample identification, date and time of sample collection, and samplers' initials. Chain-of-custody forms were completed to document sample transport to the analytical laboratory.

2.2 Final Excavation and Cleanup Confirmation Soil Sample Results

The final cleanup confirmation soil sample results documented attainment of the applicable Table 1 Criteria for samples collected in the surface to four foot depth interval, and attainment of the NMOCD-approved site closure criteria for samples collected from depths at four foot and greater. Figures illustrating the completed excavation boundaries and the locations of the final cleanup confirmation soil samples are included in the attached "*Site Remediation and Closure Report*." This report also contains comprehensive analytical summary tables which provide a summary of all laboratory analytical results.

2.3 Waste Disposal

The soils generated during the excavation process were transported to disposal at either the Lea Land disposal facility in Eddy County, New Mexico or the Gandy Marley disposal facility located in Chavez County, New Mexico. In total approximately 29,878 cubic yards of material were excavated and transported to disposal during the course of the Site remediation activities.

3.0 SITE RECLAMATION

3.1 Remediation Area Backfill

Upon NMOCD approval of the "*Site Remediation and Closure Report*" backfill operations at the Site were commenced. The excavated area was backfilled in accordance with NMAC 19.15.29.12 and NMAC 19.15.29.13.

On June 3, 2025, Ranger personnel collected three five-part composite samples of the material designated for use as backfill at the Site. Upon collection, the samples were submitted to Cardinal Laboratories in Hobbs, New Mexico for analysis of TPH, BTEX and total chloride using the aforementioned laboratory methods. Upon review of the laboratory analytical results, the samples collected from the backfill source were documented to contain BTEX, TPH, and chloride

concentrations within the concentrations as outlined in NMAC 19.15.29.13 and the *State of New Mexico Energy, Minerals and Natural Resources Department document Procedures for the Implementation of Digital C-141 and the release rule (19.15.29 NMAC),* dated December 1, 2023.

Copies of the laboratory analytical reports and associated chain-of-custody documentation are attached.

3.2 Revegetation

In order to re-establish vegetation in the remediation area, the site was re-seeded with a site-specific altered version of the BLM Seed Mixture 1 for Loamy Sites using the directed application rate. Seeding was completed during the week of August 25, 2025. The revegetation efforts will target a life-form ratio of plus or minus fifty percent of pre-disturbance levels and a total percent plant cover of at least seventy percent of pre-disturbance levels, excluding noxious weeds.

4.0 SITE MONITORING AND CLOSURE

To monitor the progress of the reclamation efforts, periodic site inspections will be conducted. The reclaimed areas will be evaluated for vegetation growth, site security measures, and erosional controls. If any issues are observed, additional actions will be implemented to appropriately address the issues.

When the target vegetation cover appears to have been achieved, a confirmation survey by a third-party consultant will be conducted to confirm that the area is in attainment of the target vegetative cover. Once confirmed that the target vegetative cover has been achieved, a revegetation report will be prepared and submitted in accordance with the criteria outlined in the State of New Mexico Energy, Minerals and Natural Resources Department document *"Procedures for the Implementation of Digital C-141 and the release rule (19.15.29 NMAC)"* dated December 1, 2023.

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 06/04/25 14:33.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

APPENDIX C –SEED MIXTURE

INEX #3 SEED MIXTURE (Altered BLM Seed Mixture 1 for Loamy Sites)

Holder shall seed all disturbed areas with the seed mixture listed below. The seed mixture shall be planted in the amounts specified in pounds of pure live seed (PLS)* per acre. There shall be no primary or secondary noxious weeds in the seed mixture. Seed shall be tested and the viability testing of seed will be done in accordance with State law(s) and within nine (9) months prior to purchase. Commercial seed shall be either certified or registered seed. The seed container shall be tagged in accordance with State law(s) and available for inspection by the Authorized Officer.

Seed shall be planted using a drill equipped with a depth regulator to ensure proper depth regulator to ensure proper depth of planting where drilling is possible. The seed mixture shall be evenly and uniformly planted over the disturbed area (small/heavier seeds have a tendency to drop the bottom of the drill and are planted first). Holder shall take appropriate measures to ensure this does not occur. Where drilling is not possible, seed shall be broadcast and the area shall be raked or chained to cover the seed. When broadcasting the seed, the pounds per acre shall be doubled. The seeding shall be repeated until a satisfactory stand is established as determined by the Authorized Officer. Evaluation of growth may not be made before completion of at least one full growing season after seeding.

Species to be planted in pounds of pure live seed* per acre:

Species	lb/acre
Blue Gramma (Bouteloua gracilis)	1.0
Sand dropseed (Sporobolus cryptandrus)	1.0
Sideoats grama (Bouteloua curtipendula)	5.0
Plains bristlegrass (Setaria macrostachya)	2.0

*Pounds of pure live seed:

Pounds of seed **x** percent purity **x** percent germination = pounds pure live seed

SITE REMEDIATION AND CLOSURE REPORT
INEX #3
UNIT A, SECTION 26, TOWNSHIP 18S, RANGE 26E
EDDY COUNTY, NEW MEXICO
32.724228, -104.346278

1.0 SITE LOCATION AND BACKGROUND

The Inex #3 well pad (Site) is located approximately 8.7 miles southeast of Artesia within Eddy County, New Mexico. The facility is situated in Unit A, Section 26, T18S-R26E at GPS coordinates 32.724228, -104.346278. In May 2019, the Inex #3 well was plugged and abandoned. During reclamation activities at the Site, an area of concern related to an apparent unknown historic produced water spill was discovered in the vicinity of the former well head location. To address the impacted soils, an area measuring approximately 85 feet by 60 feet was reportedly initially excavated to a depth of approximately three feet below ground surface (bgs) and then backfilled.

Due to events associated with the initial soil removal operations at the Site, EOG Resources, Inc. (EOG) subsequently engaged Ranger Environmental Services, LLC (Ranger) to assist in the assessment and remediation of the site conditions. Assessment activities were conducted at the Site between June 2021 and March 2023. Six phases of assessment (and six associated reports/work plans) were ultimately required to delineate the horizontal and vertical extent of the site soil impacts. The assessment activities included the installation and sampling of test pits, two vertical delineation soil boring investigations, and an electromagnetic (EM) survey.

The initial site remediation plan was submitted to the NMOCD in April 2022. On June 13, 2022, the NMOCD denied the remediation plan and requested the performance of additional vertical soil delineation activities. A remediation plan update was subsequently submitted to the NMOCD in November 2022 which was conditionally approved by the NMOCD on January 6, 2023. The conditional approval included the stipulation that "*as much of the contaminated soil is removed as possible*." Due to the uncertainties associated with this stipulation, and what level of remediation would be considered satisfactory to the NMOCD, various communications and meetings were subsequently held with the NMOCD in order to attempt to clarify the site remediation goals. Included in Appendix A is a "*Site Assessment, NMOCD Communication, and Remediation Plan Development Chronology*" which provides a detailed chronology and summary of the above site assessment and remediation plan development activities.

Due to the presence of a high-pressure gas line in the southern portion of the remediation area, coordination with the pipeline operator was necessary in order to gain approval for the soil remediation activities in the area of the line. Coordination with the pipeline operator, Centurion Pipeline L.P. (Centurion), was completed in February 2023. Due to a change of operator, additional coordination with the new pipeline operator, Energy Transfer LP ("Energy Transfer"), was subsequently required. The proposed pipeline area remedial strategy was ultimately approved by Energy Transfer representatives in May 2024.

In November 2023, Ranger completed a background soil chloride investigation to determine if naturally occurring elevated soil chloride concentrations were present in the area of the Site. The findings of the investigation confirmed that naturally elevated soil chloride concentrations were present in the project area. Full details of the background investigation were presented to the NMOCD in the November 14, 2023 *"Background Soil Chloride Investigation Report."* This report also included a proposal for the utilization of alternative soil chloride cleanup criteria in lieu of the NMAC 19.15.29.12 Table 1 Criteria. On December 26, 2023, the NMOCD approved of the utilization of site-specific soil chloride cleanup criteria for the soils below a depth of four feet, as summarized in Section 2.1, below.

Remediation activities at the Site were initiated on December 12, 2023. Since the NMOCD had not yet approved of the proposed site-specific soil chloride cleanup criteria, and since Energy Transfer had not yet approved of the proposed remedial strategy for the soils in the area of the high-pressure gas line, the initial soil removal operations were completed in the surface to four-foot below ground surface (bgs) depth interval in areas located away from the high-pressure gas line. The remainder of the soil remedial operations were completed following receipt of these approvals. The soil remediation activities were ultimately completed on December 30, 2024. This report has been prepared to provide the NMOCD with the results of the site remediation and cleanup confirmation soil sampling activities and attainment of the approved site closure criteria. Based on the completed activities, the Site has been addressed pursuant to the NMOCD approved criteria and EOG respectfully requests closure of the incident.

A *Topographic Map* and *Area Map* are attached which illustrate the location of the subject site and surrounding areas. *Final Excavation Area and Confirmation Sample Location Maps* are also attached which depict the final excavated areas and the cleanup confirmation soil sample locations.

2.0 SITE REMEDIATION

2.1 Closure Criteria

Below is a summary of the final, NMOCD-approved site closure criteria:

NMOCD APPROVED SITE CLOSURE CRITERIA

REGULATORY STANDARD	CHLORIDE	TPH (GRO+DRO +MRO)	BTEX	BENZENE
O'- 4' BGS SOILS 19.15.29.12 NMAC Table 1 Closure Criteria for Soils Impacted by a Release (GW ≤50') & 19.15.29.13 NMAC Restoration, Reclamation and Re-Vegetation (Soils 0'-4')	600	100[1]	50[1]	10[1]

>4' BGS SOILS *BTEX & TPH*: 19.15.29.12 NMAC Table 1 Closure Criteria for Soils Impacted by a Release (GW ≤50') *Chloride*: NMOCD Approved Site-Specific Background	1,242[2]	100	50	10

All Values Presented in Parts Per Million (mg/Kg)

1. *Value derived from the State of New Mexico Energy, Minerals and Natural Resources Department document Procedures for the Implementation of Digital C-141 and the release rule (19.15.29 NMAC) dated December 1, 2023.*
2. *Value derived from site-specific soil background study as summarized in Ranger's Nov. 14, 2023 "Background Soil Chloride Investigation Report."*

2.2 Cleanup Chronology

As summarized above, the site remediation activities were initiated on December 12, 2023 on those portions of the 0'-4' bgs depth interval that would have to have been removed regardless of whether the NMOCD approved of the background soil report or not. Following NMOCD conditional approval of the "*Background Soil Chloride Investigation Report"*, the excavation activities were continued to boundaries within the approved site-specific soil chloride cleanup concentration.

By early February 2024, excavation at the site was on-going in the area north of the Centurion/Energy Transfer high-pressure gas line to a depth of four feet bgs. As detailed above, it was determined that the former Centurion assets were now being operated by Energy Transfer. As such, communications were initiated with Energy Transfer to determine whether there would be any protocol changes that would affect EOG's ability to conduct remediation activities in the vicinity of the high-pressure gas line.

Continued excavation and cleanup confirmation soil sampling activities were completed through May 2024 in the 0'-4' depth interval. Vertical excavation beyond four feet had not yet been conducted as a response to Ranger's updated pipeline area remediation plan had not yet been received from Energy Transfer. However, on May 6, 2024, EOG was notified that Energy Transfer had approved of Ranger's plan.

The first step of the pipeline area remediation plan involved hydrovac spotting of the line followed by mechanical excavation. Due to the need for an Energy Transfer representative to be on-site, the hydrovac spotting activities were not able to be initiated until May 13, 2024. Following this, excavation of soils was initiated in areas north of the Energy Transfer line. By May 17, 2024, the hydrovac activities had successfully spotted the line across the anticipated excavation area and soil excavation activities towards and below the line were ongoing.

By mid-June 2024, the horizontal extent of the excavation in the surface to four-foot depth interval had been completed, including all required excavation activities in the vicinity of the Energy Transfer line. Cleanup confirmation soil sample analytical results had documented attainment of the site closure criteria in the surface to four-foot depth interval and in all excavation base samples collected in the immediate vicinity of the Energy Transfer line. As such, the area around the line was ready for backfilling. However, prior to backfilling, Energy Transfer representatives had to conduct an inspection of the line and perform any necessary maintenance activities.

Based on the site remedial progress, by late June to early July, 2024, the focus of the cleanup operations were shifted to the deeper (>4' bgs) soil impacts at the site. By July 12, 2024, areas of the excavation had been completed to depths of approximately 11 feet bgs. On July 26, 2024, the backfilling of the Energy Transfer line area was completed. During the process, the backfill material was inspected and any debris or rock was removed from the material in accordance with Energy Transfer requirements. After the Energy Transfer line area had been backfilled, the deep (>4' bgs) excavation activities were able to be expanded to the south.

By early August 2024, cleanup confirmation soil sample analytical results indicated that a majority of the excavation base in the deep area of the excavation remained in exceedance of the site closure criteria at a depth of approximately 15 feet bgs. As such, vertical excavation activities in the deep excavation area continued. By late August, the deep area of the excavation had been completed to approximately 18 feet bgs. Due to wet weather in the area and shutdowns at the disposal facility, the excavation progress had not been as fast as expected during this timeframe.

Remedial progress remained slow through early September 2024 due to additional precipitation events which prohibited the work crew from being able to safely access the excavation. Because of this, the material designated for disposal was not able to be removed leading to limited excavation. Accessible areas of the excavation were deepened by an additional 0.5' - 1' pushing the maximum depth of the excavation to approximately 19 feet bgs. By mid-September, excavation progress was back to normal and by September 20, 2024, the excavation had reached a depth of approximately 23 feet bgs.

Between late September 2024 to late November 2024, multiple excavation and cleanup confirmation soil sampling events were conducted as the excavation appeared to be nearing attainment of the site closure criteria. By late November 2024, soil removal had been completed to a depth of approximately 29 feet bgs. During this period, additional excavation wall samples were collected from various locations in the deep excavation area including interior wall locations where there were variations in the depth of the excavation base.

By mid-December 2024, the deep excavation area had been completed to a maximum depth of approximately 31 feet bgs and the cleanup confirmation sample results had documented attainment of the approved closure criteria within the deep excavation. Based on these results, the final remedial efforts were shifted to the ramped area used for access to the deep excavation. On December 30, 2024, the final site soil removal operations were completed in the ramped area and the final site cleanup confirmation soil sample results documented attainment of the approved closure criteria within the entire site excavation. In total, approximately 29,878 cubic yards of material were excavated and transported to disposal during the course of the Site remediation activities.

2.3 Impacted Soil Removal and Cleanup Confirmation Sampling Methodologies

As detailed above, site remedial operations were conducted at the Site from December 12, 2023 to December 30, 2024. Field readings were continuously collected throughout the excavation process to guide the horizontal and vertical extents of the excavation and assess the cleanup progress. During this time period, numerous cleanup confirmation soil sampling events were conducted to verify the field readings and confirm whether or not the site closure criteria had been attained. In the event that the cleanup confirmation soil sampling results indicated that the site closure criteria had not been attained, additional over-excavation and re-sampling of those areas were conducted. In total, 545 cleanup confirmation soil samples were collected and analyzed which finally confirmed the vertical and horizontal attainment of the site closure criteria.

The field screening activities conducted by Ranger personnel during the soil excavation process involved the usage of an organic vapor monitor (OVM) and field chloride titration kit to assist in guiding the excavation to appropriate boundaries. Upon reaching boundaries in an area which appeared to have attained the site closure criteria based upon the field screening results, cleanup confirmation soil samples were then collected for laboratory analysis in accordance with the approved Remediation Plan. Prior to each cleanup confirmation soil sampling event, appropriate notice was provided to the NMOCD in accordance with NMAC 19.15.29.12 (D). Copies of the notifications are attached.

The cleanup confirmation soil samples were collected in accordance with NMAC 19.15.29.12 Subsection D as representative five-point composite samples from the sidewalls and base where each composite sample was not representative of more than 200 square feet. Upon collection, the soil samples were submitted to Eurofins Albuquerque in Albuquerque, New Mexico (formerly Hall Environmental Laboratories) or Cardinal Labs in Hobbs New Mexico for analysis of total petroleum hydrocarbons (TPH) using EPA Method 8015; and benzene, toluene, ethylbenzene and xylenes (BTEX) using EPA Method 8021, and total chloride. The chloride analysis of samples submitted to Eurofins/Hall were completed using EPA Method 300, and the samples submitted to Cardinal Labs were analyzed using Method SM 4500. Copies of the laboratory analytical reports including chain-of-custody documentation are attached.

The cleanup confirmation soil samples were collected and managed using standard QA/QC and chain-of-custody procedures. Ranger personnel wore new nitrile gloves while handling each sample in order to prevent cross-contamination of samples. The collected soil samples were containerized in sterile, laboratory-suppled containers and were subsequently sealed in one or more zip lock bags and stored in a sample shuttle containing ice until arrival at the laboratory for chemical analysis. All sample containers were labeled with the project name, sample identification, date and time of sample collection, and samplers' initials. Chain-of-custody forms were completed to document sample transport to the analytical laboratory.

2.4 Final Excavation Area and Cleanup Confirmation Soil Sample Results

A *Final Excavation Area and Confirmation Sample Location Map (0'-5' Area) and Final Excavation Area and Confirmation Sample Location Map (Deep Excavation Area)* are provided in the Figures section which illustrate the completed excavation boundaries, depths and the locations of the final cleanup confirmation soil samples. The attached "*Confirmation Soil Sample BTEX, TPH & Chloride Analytical Data*" table provides a comprehensive summary of the laboratory analytical results for the cleanup confirmation soil samples collected during the remediation process. On this table, any result presented with a strikethrough means that cleanup confirmation soil sample was found to exceed the site closure criteria and as such that area was subsequently over-excavated and resampled.

As illustrated on the excavation and confirmation sample location figures, the final excavation area had maximum dimensions of approximately 320 feet by 250 feet. The majority of the excavation was primarily completed to depths of four feet bgs to five feet bgs. The deep excavation area located in the southwestern portion of the excavation had a maximum depth of 31 feet bgs. The final cleanup confirmation soil samples documented attainment of the NMOCD-approved site closure criteria summarized in Section 2.1.

2.5 Waste Disposal

The soils generated during the excavation were transported to disposal at either the Lea Land disposal facility in Eddy County, New Mexico or the Gandy Marley disposal facility located in Chavez County, New Mexico. In total approximately 29,878 cubic yards of material were excavated and transported to disposal during the course of the Site remediation activities.

3.0 SITE CLOSURE

3.1 Site Completion, Backfill & Revegetation

Upon NMOCD site closure approval, the excavated area will be backfilled with clean fill material in accordance with NMAC 19.15.29.12 and NMAC 19.15.29.13. It is estimated that the backfilling operations will require approximately one month to complete. Upon completion of the backfilling activities, the remediated area will undergo reclamation and re-seeding in accordance with NMAC 19.15.29.13.

3.2 Closure Request

Based on the completed site remediation and cleanup confirmation soil sampling activities, the site has been properly addressed pursuant to NMAC 19.15.29 and EOG respectfully requests closure of the incident.

Notes:

1. Results exceeding the NMOCD approved closure criteria are presented in bold red type.

2. Value derived from the State of New Mexico Energy, Minerals and Natural Resources Department document Procedures for the Implementation of Digital C-141 and the release rule (19.15.29 NMAC) dated December 1, 2023.

3. Any result presented with a strikethrough means that cleanup confirmation soil sample was found to exceed the approved site closure criteria and as such that area was subsequently over-excavated and resampled.

APPENDIX A

Site Assessment, NMOCD Communication, And Remediation Plan Development Chronology

APPENDIX A

SITE ASSESSMENT, NMOCD COMMUNICATION, AND REMEDIATION PLAN DEVELOPMENT CHRONOLOGY

June 2021:

Prior to the initiation of assessment activities at the Site, a Ranger prepared "*Proposed Site Assessment Plan*" was developed and submitted to the New Mexico Oil Conservation Division (NMOCD). The proposed plan received preliminary approval by the NMOCD on June 9, 2021. The approved initial assessment activities were completed in June 2021.

July 2021:

Based on the findings of the June 2021 assessment activities, further assessment was deemed necessary, and a "*Project Update and Proposed Additional Assessment*" plan (dated July 14, 2021) was prepared and submitted to the NMOCD. The plan included details to allow for further assessment of the soil impacts at the Site. On July 21 and 22, 2021, the additional assessment activities proposed in the July 14, 2021 plan were conducted at the Site.

September 2021:

The results of the July 2021 assessment activities were presented in the "*Site Assessment Update and Work Plan*" report (dated September 13, 2021). Due to the extent of impacts documented at the Site, the September 13, 2021 report also contained a work plan for proposed additional horizontal and vertical soil delineation activities.

December 2021:

The additional horizontal and vertical delineation activities detailed in the September 13, 2021 proposal were approved by the NMOCD, with conditions, on December 16, 2021.

January – February 2022:

The approved horizontal and vertical delineation activities detailed in the NMOCD approved September 13, 2021 work plan were completed in January-February 2022.

March - April 2022:

The results of the January-February 2022 assessment activities were presented in the March 9, 2022 "*Site Assessment Update*" report.

A "*Proposed Remediation Plan*" dated April 26, 2022 was prepared and submitted to the NMOCD. The remediation plan summarized the completed assessment efforts and detailed a proposed remedial strategy to address the conditions documented at the Site. Due to the extensive soil impacts at the Site, the proposed plan requested a variance to NMAC 19.15.29.12 to allow for limited soil removal operations and the installation of a 20-mil synthetic liner.

RANGER ENVIRONMENTAL SERVICES, LLC

June - October 2022:

On June 13, 2022, the NMOCD denied the April 26, 2022 remediation plan for reasons primarily concerning depth-to-groundwater in the area and requested the performance of additional vertical delineation activities to document the vertical extent of the site soil impacts.

In June and July 2022, Ranger personnel and representatives of EOG conducted additional vertical soil delineation activities at the Site. The results of these activities were summarized in Ranger's August 26, 2022 "*Site Update and Additional Assessment Plan*." As summarized in the report, further vertical delineation activities were determined to be necessary in order to delineate the site soil chloride concentrations to the 600 mg/Kg target concentration. As such, the report included a work plan for the installation of four additional test excavations and two additional soil borings at the Site. These proposed activities were completed at the site during September-October, 2022.

November 2022:

The findings of the September-October, 2022 vertical delineation activities were presented in the "*Site Assessment and Remediation Plan Update*" (dated November 17, 2022) submitted to the NMOCD. In addition, this report also requested NMOCD reconsideration of the usage of limited soil removal operations and the installation of a 20-mil synthetic liner for the remediation of the subject site since the vertical extent of the soil impacts at the site had been delineated to 600 mg/Kg chloride prior to reaching groundwater.

January 2023:

On January 6, 2023, the NMOCD provided conditional approval of the November 17, 2022 "*Site Assessment and Remediation Plan Update.*" Since the NMOCD concurred that the soil impacts had been vertically delineated prior to reaching groundwater, the NMOCD approved of a liner installation with the stipulation that "*as much of the contaminated soil is removed as possible*." The NMOCD suggested that a meeting might be needed to discuss excavation depths. As such, Ranger contacted the NMOCD on January 18, 2023 to set up the suggested meeting and held a video conference meeting with the NMOCD on January 24, 2023. Below is a summary of the major topics discussed:

- ***Excavation Depth***: While the NMOCD accepted utilization of a liner at the Site, they stated that they wanted as much of the "chloride mass" removed as safely possible. However, limited guidance/directives were provided in regards to the limits of safety and what the NMOCD would consider adequate remediation.

- ***High Pressure Gas Line***: The NMOCD was in agreement that excavation below the high-pressure gas line in the proposed remediation area posed a significant safety issue. As such, they understood that this would take coordination with the operator and stated that they would potentially need correspondence from the operator stating what remedial options would be allowed in the area of the line.

- ***Liner Installation***: The NMOCD was in approval of the installation of a liner; however, the NMOCD stated that they preferred installation of a liner at a depth of 6 feet below ground surface (bgs).

Based upon the results of the January 24, 2023 meeting, it remained unclear as to what would be considered safe versus unsafe in regards to excavation depth, and what level of remediation would be considered acceptable to the NMOCD.

To determine what remedial options would be allowed in the area of the high-pressure gas line, Ranger began communications with Centurion Pipeline L.P. (Centurion) representatives, the high-pressure gas line owner/operator.

February 2023:

Based on Centurion internal policy and communications with Centurion representatives, a conceptual remedial plan for the pipeline area was developed. At Centurion's request, Ranger submitted to Centurion a February 24, 2023 "*Proposed Remediation Activities*" work plan which detailed proposed line location, excavation, line support and backfilling procedures. Based on Ranger/Centurion communications, Centurion internal policy, and the NMOCD directive that the chloride-affected soils at the site be excavated to a minimum depth of six feet bgs, the plan proposed that excavation below the high-pressure gas line and within 15 feet of the line would be limited to a depth of six feet bgs for safety and line integrity reasons.

March - April 2023:

On March 7, 2023, Centurion representatives approved of the proposed remedial work plan for the area of the high-pressure gas line.

On March 8, 2023, Ranger conducted an electromagnetic (EM) survey at the subject Site to better define the boundaries of the "chloride mass" to assist in targeting these areas for removal as directed by the NMOCD during the January 24, 2023 Ranger/NMOCD meeting. Based upon the EM survey results, the "chloride mass" showed strong evidence of being associated with a historic drill pit as opposed to impacts from a release at the Site. The shape, size, and position of the area exhibiting elevated concentrations were indicative of a former drilling pit likely from the installation of the Inex #3 well in 1988.

Ranger contacted the NMOCD on March 27, 2023 to request a meeting to discuss the EM survey results and determine what the NMOCD remediation requirements would be for the suspected pit. A videoconference meeting was subsequently held with the NMOCD on April 12, 2023. During the meeting, Ranger updated the NMOCD about Centurion's approval of Ranger's plan to excavate up to six feet deep in the vicinity of their line, and presented the NMOCD with the EM survey results and historic aerial photographs of the subject site. The NMOCD did not feel that the EM survey results conclusively demonstrated that the main area of chloride mass was a former pit. The NMOCD stated that regardless of the potential that the "chloride mass" area was associated with a former drill pit, the area would be required to be addressed under the current spill rule (NMAC 19.15.29). During the April 12, 2023 meeting, the NMOCD discussed whether or not the subject site would have to be excavated until the Table 1 closure criteria were attained,

or whether limited excavation (and a liner) would be allowed. Ranger was informed that the option of limited removal was still possible, but further internal NMOCD review would be required prior to any final decisions being made. The NMOCD stated that they would conduct further review of the matter and provide a response detailing their final decision.

July - August 2023:

On July 26, 2023, as no further communications from the NMOCD had been received, Ranger contacted NMOCD representatives to determine whether they had made any final decisions yet in regard to the remediation requirements for the Site. Ranger was informed that no final decision had been made yet. As such, on July 27, 2023, Ranger provided the NMOCD with additional copies of the previously submitted April 26, 2022 "*Proposed Remediation Plan"*, and the November 17, 2022 "*Site Assessment and Remediation Plan Update"* report for review. On August 2, 2023, Ranger contacted the NMOCD to check on the progress of their project review and remediation decision. The NMOCD replied via email and a formal response on August 2, 2023 and stated that the variance for limited soil removal was denied, and that a liner was approved with the stipulation that as much of the contaminated soil is safely removed as possible. Details regarding what level of excavation the NMOCD would consider safe versus unsafe, and what would be deemed acceptable, were not included.

Based upon the August 2, 2023 NMOCD response, EOG remained unclear as to what level of excavation was considered by the NMOCD to be safe versus unsafe. Proceeding with remediation with an unknown target depth would drastically reduce the ability to plan and accomplish the removal operations in a safe manner. Not knowing whether the completed remedial activities would meet the subjective NMOCD cleanup guidelines, EOG would either have to leave the excavation open until receipt of the NMOCD closure letter or would have to backfill at their own risk. Leaving a deep excavation open for an extended period of time would pose safety issues and could result in rainwater accumulation in the excavation. Leaving the active high-pressure gas line open for an extended period of time would also create a safety concern and a possible environmental issue, and would not be approved by Centurion. Additionally, backfilling of the excavation would be a significant risk due to the subjective closure guidelines and the possibility of denial of closure and request for additional remediation.

Due to the lack of clear guidance as to what the NMOCD considered to be a safe excavation depth, and not knowing if NMOCD would approve of the site closure if EOG excavated to depths they considered safe, EOG legal counsel contacted NMOCD multiple times after August 2, 2023 and requested a call/meeting with the Energy, Minerals and Natural Resource (EMNRD) Environmental Bureau representatives to discuss the site cleanup standards so that EOG would have clear standards/guidance on how to proceed with the remediation of the site.

November 2023:

While awaiting a response/meeting with EMNRD representatives, a background soil chloride study was completed. The background study included the installation of test excavations and collection of soil samples for laboratory analysis from areas outside of the impacted area at the Site. The findings of the study were detailed in the Ranger prepared *"Background Soil Chloride Investigation Report"* dated November 14, 2023.

A videoconference meeting between EMNRD, NMOCD, EOG and Ranger representatives was ultimately held on November 15, 2023. During the November 15, 2023 meeting, the NMOCD emphasized that their prior directive to "dig down to a safe depth to remediate" was clear and that "safe" was dependent on OSHA factors related to "benching out" and what kinds of equipment can be safely brought to the site to remediate. The NMOCD stated that in their view the best way to understand what was safe and needed was to simply mobilize to the Site, begin remediation and determine what level of remediation could be safely accomplished. The issue of the recent background soil study conducted by EOG was also discussed, and the NMOCD requested that the background soil study report be submitted for their review.

Ranger subsequently submitted the "*Background Soil Chloride Investigation Report"* to the NMOCD following the meeting on November 15, 2023. As presented in the report, site-specific background levels were recommended to be utilized in the delineation and remediation of the subject site in lieu of the default 600 mg/Kg 19.15.29.12 NMAC Table 1 Closure Criteria and 19.15.29.13 NMAC Reclamation Criteria for chloride since the upper range of background soil chloride concentrations documented at the site were significantly higher than this default cleanup level.

December 2023:

On December 15, 2023, Ranger contacted the NMOCD to inquire if the background soil report had been reviewed yet. Ranger was informed that it had not yet been reviewed and was requested to resubmit it. The report was resubmitted to the NMOCD by EOG on December 18, 2023.

On December 26, 2023, the NMOCD conditionally approved of the background soil chloride report. The variance request for a background chloride level of 1,751 mg/Kg in the 0'-4' bgs depth interval was not approved. The variance request for a background chloride level of 1,242 mg/Kg in the >4' bgs depth interval was approved.

The site remediation activities were initiated on December 12, 2023 prior to receiving the NMOCD response on the background soil report. EOG initiated excavation of those portions of the 0'-4' bgs depth interval that would have to be removed regardless of whether the NMOCD approved of the background soil report or not.

January – May 2024:

Due to the length of time from Centurion's March 2023 approval of Ranger's *"Proposed Remediation Activities"* work plan and the start of the site remedial operations in December 2023, and the changes to the site remediation requirements, communications with Centurion were re-opened to confirm their approval of the planned remedial operations. Ranger was informed that ownership/operation of the high-pressure line had been transferred to Energy Transfer LP (Energy Transfer) and that approval for the planned activities would have to be obtained from Energy Transfer. Communications with Energy Transfer were subsequently completed and in May 2024 Energy Transfer approved of the proposed site remediation activities.

May – December 2024:

With Energy Transfer approval of the proposed remedial strategy for the area of the high-pressure gas line, remedial operations to the necessary depths and extent were initiated. From May to December 2024, soil removal operations and cleanup confirmation sampling activities were completed at the Site.

APPENDIX B

Photographic Documentation

PHOTOGRAPH NO. 1 – A general view of the site during the initiation of soil removal operations in December 2023. The view is towards the west.

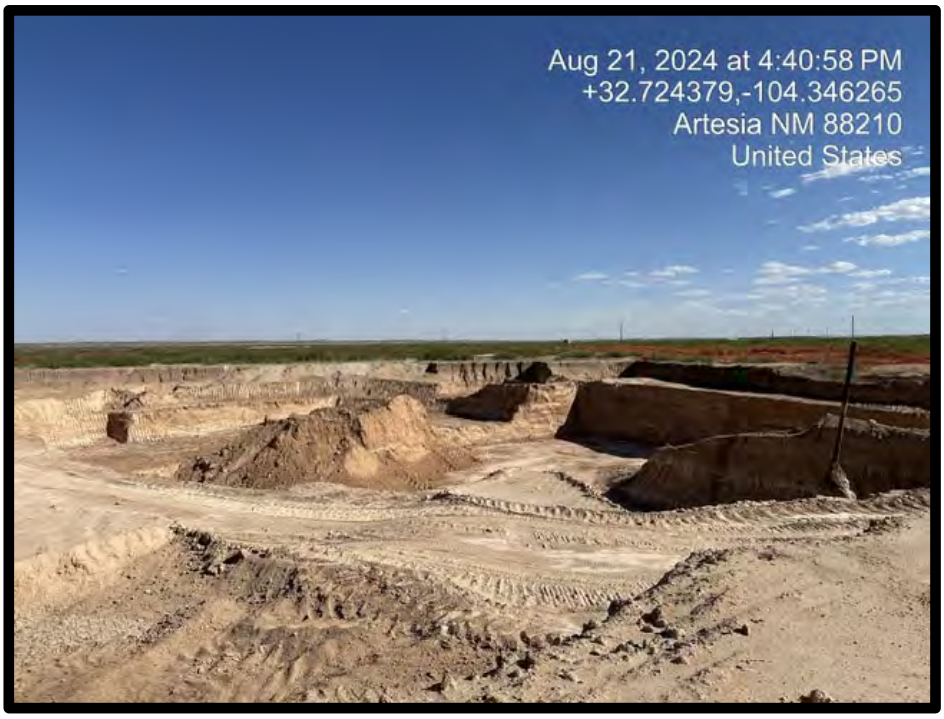

PHOTOGRAPH NO. 2 – An additional view of the Site during the initial removal operations in April 2024. The view is towards the south.

PHOTOGRAPH NO. 3 – A view hydrovac activities in the vicinity of the Energy Transfer Line. The view is towards the north.

PHOTOGRAPH NO. 4 – A view of the excavation activities in July 2024 with the exposed portion of the Energy Transfer line visible. The view is towards the southeast.

PHOTOGRAPH NO. 5 – A view of the deep excavation area in August 2024. The view is towards the south.

PHOTOGRAPH NO. 6 – A view of the Deep Excavation Area during over-excavation activities in September 2024. The view is towards the south-southwest.

PHOTOGRAPH NO. 7 – A view of Deep Excavation Area in December 2024. The view is towards the south.

PHOTOGRAPH NO. 8 – A view of Deep Excavation Area during the final over-excavation activities. The view is towards the south.

PHOTOGRAPH NO. 9 – A view of the area excavated upon completion on December 30, 2024. The view is towards the northeast.

PHOTOGRAPH NO. 10 – A view of the Site upon completion on December 30, 2024. The view is towards the east.

RE: Inex 3 OrderNo.: 2402A53

Dear Will Kierdorf:

Eurofins Environment Testing South Central, LLC received 41 sample(s) on 2/22/2024 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please do not hesitate to contact Eurofins Albuquerque for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

Andy Freeman
Laboratory Manager
4901 Hawkins NE
Albuquerque, NM 87109

Diesel Range Organics (DRO)	ND	10								
Motor Oil Range Organics (MRO)	ND	50								

Qualifiers:

*	Value exceeds Maximum Contaminant Level.
D	Sample Diluted Due to Matrix
H	Holding times for preparation or analysis exceeded
ND	Not Detected at the Reporting Limit
PQL	Practical Quanitative Limit
S	% Recovery outside of standard limits. If undiluted results may be estimated.
B	Analyte detected in the associated Method Blank
E	Above Quantitation Range/Estimated Value
J	Analyte detected below quantitation limits
P	Sample pH Not In Range
RL	Reporting Limit

RE: Inex 3 OrderNo.: 2402C65

Dear Will Kierdorf:

Eurofins Environment Testing South Central, LLC received 11 sample(s) on 2/27/2024 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to www.hallenvironmental.com or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please do not hesitate to contact Eurofins Albuquerque for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

Andy Freeman
Laboratory Manager
4901 Hawkins NE
Albuquerque, NM 87109

Sample Log-In Check List

Client Name: EOG Work Order Number: 2402C65 RcptNo: 1

Received By: Steve McQuiston 2/27/2024 7:27:00 AM

Completed By: Tracy Casarrubias 2/27/2024 8:04:06 AM

Reviewed By: M 2/27/24

Chain of Custody

1. Is Chain of Custody complete?	Yes ☑	No ☐	Not Present ☐
2. How was the sample delivered?	Courier		

Log In

3. Was an attempt made to cool the samples?	Yes ☑	No ☐	NA ☐
4. Were all samples received at a temperature of >0° C to 6.0°C	Yes ☑	No ☐	NA ☐
5. Sample(s) in proper container(s)?	Yes ☑	No ☐	
6. Sufficient sample volume for indicated test(s)?	Yes ☑	No ☐	
7. Are samples (except VOA and ONG) properly preserved?	Yes ☑	No ☐	
8. Was preservative added to bottles?	Yes ☐	No ☑	NA ☐
9. Received at least 1 vial with headspace <1/4" for AQ VOA?	Yes ☐	No ☐	NA ☑
10. Were any sample containers received broken?	Yes ☐	No ☑	
11. Does paperwork match bottle labels? (Note discrepancies on chain of custody)	Yes ☑	No ☐	
12. Are matrices correctly identified on Chain of Custody?	Yes ☑	No ☐	
13. Is it clear what analyses were requested?	Yes ☑	No ☐	
14. Were all holding times able to be met? (If no, notify customer for authorization.)	Yes ☑	No ☐	

# of preserved bottles checked for pH: _____ (<2 or >12 unless noted)

Adjusted? _____

Checked by: 2/27/24

Special Handling (if applicable)

15. Was client notified of all discrepancies with this order? Yes ☐ No ☐ NA ☑

ANALYTICAL REPORT

PREPARED FOR

Attn: Will Kierdorf
Ranger Environmental Services, Inc
7215 McNeil Drive
PO BOX 201179
Austin, Texas 78729

Generated 4/3/2024 8:17:59 PM

JOB DESCRIPTION

Inex #3

JOB NUMBER

885-1338-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.

Released to Imaging: 12/18/2025 8:30:18 AM

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits

HPLC/IC

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
F2	MS/MSD RPD exceeds control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc Job ID: 885-1338-1
Project: Inex #3

Job ID: 885-1338-1 Eurofins Albuquerque

Job Narrative
885-1338-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 3/16/2024 8:05 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 0.1°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-2085 recovered outside acceptance criteria, low biased, for Di-n-octyl phthalate (Surr). Samples with high chloride may degrade the inlet liner, resulting in a low surrogate recovery. Samples with low surrogate will be re-ran; reporting all associated with passing surrogate. The following samples are associated B-49 (885-1338-9), B-50 (885-1338-10), B-51 (885-1338-11), B-52 (885-1338-12), B-54 (885-1338-14), B-58 (885-1338-18), B-59 (885-1338-19), B-60 (885-1338-20), B-62 (885-1338-22), B-63 (885-1338-23), B-64 (885-1338-24), B-65 (885-1338-25), B-66 (885-1338-26), B-67 (885-1338-27), B-68 (885-1338-28), (LCS 885-1905/2-A), (LCS 885-1959/2-A), (MB 885-1905/1-A), (885-1321-A-1-C), (885-1321-A-1-D MS), (885-1321-A-1-E MSD) and (885-1338-A-9-F MSD).

Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-2016 recovered outside acceptance criteria, low biased, for Di-n-octyl phthalate (Surr). Reporting all associated samples with passing surrogate; re-running any with low surrogate. The following samples are associated B-45 (885-1338-5), B-46 (885-1338-6), B-47 (885-1338-7), B-48 (885-1338-8), B-89 (885-1338-49), B-90 (885-1338-50), (CCV 885-2016/28), (CCV 885-2016/42), (LCS 885-1985/2-A), (MB 885-1985/1-A), (885-1341-A-6-C), (885-1341-A-6-D MS) and (885-1341-A-6-E MSD).

Method 8015D_DRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-1905 and analytical batch 885-2245 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
Method 300_OF_28D_PREC: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 885-2057 and analytical batch 885-2095 were outside control limits for one or more analytes. See QC Sample Results for detail. Spike concentration was diluted out.

Method 300_OF_28D_PREC: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for 885-1902 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 300_OF_28D_PREC: Due to the high concentration of Chloride, the matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 885-1977 and analytical batch 885-2031 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Qualifiers

HPLC/IC

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc Job ID: 885-2006-1
Project: Inex #3

Job ID: 885-2006-1 Eurofins Albuquerque

Job Narrative
885-2006-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 3/29/2024 7:55 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 0.3°C and 0.4°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-2597 recovered outside acceptance criteria, low biased, for Di-n-octyl phthalate (Surr). Reporting samples that have passing surrogate. DRO recovery acceptable. The following samples are associated B-111 (885-2006-21), B-112 (885-2006-22), B-113 (885-2006-23), B-114 (885-2006-24) and B-115 (885-2006-25).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
Method 300_OF_28D_PREC: Due to the high concentration of Chloride, the matrix spike (MS) for preparation batch 885-2558 and analytical batch 885-2590 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Method 300_OF_28D_PREC: Due to the high concentration of Chloride, the matrix spike duplicate (MSD) for preparation batch 885-2558 and analytical batch 885-2590 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
TCEQ Mtd 1005 soil sample was frozen/delivered for prep within 48H of sampling.	N/A

Qualifiers

GC Semi VOA

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits

HPLC/IC

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc Job ID: 885-3401-1
Project: Inex #3

Job ID: 885-3401-1 Eurofins Albuquerque

Job Narrative
885-3401-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 4/25/2024 8:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.0°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-3919 and analytical batch 885-4043 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

Method 8015D_DRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-3969 and analytical batch 885-4095 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

Method 8015D_DRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-3969 and analytical batch 885-4165 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
Method 300_ORGFM_28D - Soluble: The Chloride matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 880-79936 and 880-79936 and analytical batch 880-79948 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

B-110A (885-3401-51), B-111A (885-3401-52), B-113A (885-3401-53), B-115A (885-3401-54), B-116A (885-3401-55), B-117A (885-3401-56), B-118A (885-3401-57), B-119A (885-3401-58), B-120A (885-3401-59), B-121A (885-3401-60), (885-3401-B-51-B MS) and (885-3401-B-51-C MSD)

Method 300_ORGFM_28D - Soluble: The Chloride matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 880-79936 and 880-79936 and analytical batch 880-79948 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Accreditation/Certification Summary

Client: Ranger Environmental Services, Inc
Project/Site: Inex #3

Job ID: 885-3401-1

Laboratory: Eurofins Albuquerque

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Oregon	NELAP	NM100001	02-26-25

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
8015D	5030C	Solid	Gasoline Range Organics (GRO)-C6-C10
8015D	SHAKE	Solid	Diesel Range Organics [C10-C28]
8015D	SHAKE	Solid	Motor Oil Range Organics [C28-C40]
8021B	5030C	Solid	Benzene
8021B	5030C	Solid	Ethylbenzene
8021B	5030C	Solid	Toluene
8021B	5030C	Solid	Xylenes, Total

Laboratory: Eurofins Midland

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

Authority	Program	Identification Number	Expiration Date
Texas	NELAP	T104704400-23-26	06-30-24

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc Job ID: 885-5132-1
Project: INEX #3

Job ID: 885-5132-1 Eurofins Albuquerque

Job Narrative
885-5132-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/25/2024 7:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.4°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 885-5721 and analytical batch 885-5938 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	N/A	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
TCEQ Mtd 1005 soil sample was frozen/delivered for prep within 48H of sampling.	N/A

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

HPLC/IC

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc Job ID: 885-5138-1
Project: INEX #3

Job ID: 885-5138-1 Eurofins Albuquerque

Job Narrative
885-5138-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 5/25/2024 7:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.4°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-5939 recovered outside acceptance criteria, low biased, for Di-n-octyl phthalate (Surr). Samples with Di-n-octyl phthalate (Surr) in normal range will still be reported. . The following samples are associated (CCV 885-5939/57), (CCV 885-5939/58) and (CCV 885-5939/59).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc
Project: INEX #3

Job ID: 885-5890-1

Job ID: 885-5890-1 Eurofins Albuquerque

Job Narrative
885-5890-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 6/10/2024 6:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 22.8°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-6505 recovered above the upper control limit for Di-n-octyl phthalate (Surr). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	False	Cooler temperature outside required temperature criteria.
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
TCEQ Mtd 1005 soil sample was frozen/delivered for prep within 48H of sampling.	N/A

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc Job ID: 885-6177-1
Project: Inex #3

Job ID: 885-6177-1 Eurofins Albuquerque

Job Narrative
885-6177-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 6/13/2024 8:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.7°C.

Gasoline Range Organics
Method 8015D_GRO: Surrogate recovery for the following sample is outside the upper control limit: B-176A (885-6177-2). Possible double injection from autosampler.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
Method 8021B: Surrogate recovery for the following sample is outside the upper control limit: B-176A (885-6177-2). Possible double injection from autosampler

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
TCEQ Mtd 1005 soil sample was frozen/delivered for prep within 48H of sampling.	True

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.

HPLC/IC

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc
Project: INEX#3

Job ID: 885-10469-1

Job ID: 885-10469-1 Eurofins Albuquerque

Job Narrative
885-10469-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 8/23/2024 8:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 0.8°C.

Gasoline Range Organics
Method 8015D_GRO: The closing continuing calibration verification (CCVC) associated with batch 885-11174 recovered above the upper control limit for Gasoline Range Organics (GRO)-C6-C10. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-11100 recovered above the upper control limit for Diesel Range Organics [C10-C28]. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: B-205 (885-10469-14) and B-214 (885-10469-15).

Method 8015D_DRO: The continuing calibration verification (CCV) associated with batch 885-11205 recovered above the upper control limit for Diesel Range Organics [C10-C28]. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: B-150 (885-10469-16), W-20 (885-10469-17), W-21 (885-10469-18), W-22 (885-10469-19), W-24 (885-10469-21), W-25 (885-10469-22), W-26 (885-10469-23), W-27 (885-10469-24), W-28 (885-10469-25), W-29 (885-10469-26), W-30 (885-10469-27), W-31 (885-10469-28), B-91/W1 (885-10469-29) and B-91/W2 (885-10469-30).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Creator: Casarrubias, Tracy

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
TCEQ Mtd 1005 soil sample was frozen/delivered for prep within 48H of sampling.	True

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: Ranger Environmental Services, Inc Job ID: 885-11662-1
Project: INEX #3

Job ID: 885-11662-1 Eurofins Albuquerque

Job Narrative
885-11662-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 9/12/2024 7:55 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.5°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
Method 8021B: Surrogate recovery for the following samples is outside the upper control limit: W-40 (885-11662-14), W-41 (885-11662-15), W-42 (885-11662-16), W-43 (885-11662-17), W-44 (885-11662-18), W-45 (885-11662-19), W-46 (885-11662-20), W-47 (885-11662-21), W-48 (885-11662-22), W-49 (885-11662-23), W-50 (885-11662-24), W-51 (885-11662-25), (CCV3 885-12376/16), (LCS 885-12264/3-A), (MB 885-12264/1-A), (885-11662-A-15-B MS) and (885-11662-A-15-C MSD). <EXPLANATION_REQUIRED> All samples run on Aphrodite 9-16-24 for 8021B are ND and reportable

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
TCEQ Mtd 1005 soil sample was frozen/delivered for prep within 48H of sampling.	N/A

JOB DESCRIPTION

INEX#3

JOB NUMBER

885-13083-1

Eurofins Albuquerque
4901 Hawkins NE
Albuquerque NM 87109

See page two for job notes and contact information.

Released to Imaging: 12/18/2025 8:30:18 AM

my EOL

Eurofins Albuquerque

Job Notes

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing South Central, LLC Project Manager.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Job ID: 885-13083-1

Job ID: 885-13083-1 Eurofins Albuquerque

Job Narrative
885-13083-1

REVISION

The report being provided is a revision of the original report sent on 10/11/2024. The report (revision 2) is being revised due to The COC was added to this report.

Report revision history
Revision 1 - 10/22/2024 - Reason - The COC has been added to this report.

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable.

- Matrix QC may not be reported if insufficient sample is provided or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method.
- Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Receipt
The samples were received on 10/3/2024 7:45 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.3°C.

Gasoline Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC VOA
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Diesel Range Organics
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC
No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Creator: Casarrubias, Tracy

Question	Answer	Comment
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
TCEQ Mtd 1005 soil sample was frozen/delivered for prep within 48H of sampling.	N/A

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 10/11/24 11:12.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising whether based in contract or tort, shall be limited to the amount paid by the client for the analyses. All claims including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within 30 days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising whether based in contract or tort, shall be limited to the amount paid by the client for the analyses. All claims including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within 30 days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequental damages, including without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise.

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 11/04/24 10:58.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 11/27/24 11:33.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Notes and Definitions

QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 12/12/24 14:19.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 12/12/24 14:19.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 12/20/24 12:04.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: INEX #3

Enclosed are the results of analyses for samples received by the laboratory on 12/20/24 12:04.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C24-00112. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Notes and Definitions

S-05	The surrogate recovery is outside of lab established statistical control limits but still within method limits. Data is not adversely affected.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C
	Samples reported on an as received basis (wet) unless otherwise noted on report

APPENDIX D

NMOCD Correspondence

From: OCDOnline@state.nm.us <OCDOnline@state.nm.us>
Sent: Tuesday, December 26, 2023 11:17 AM
To: Tina Huerta <Tina_Huerta@eogresources.com>
Subject: The Oil Conservation Division (OCD) has approved the application, Application ID: 297524

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern (c/o Tina Huerta for EOG RESOURCES INC),

The OCD has approved the submitted *Internal Manual Incident File Supporting Documentation (ENV)* (IM-BNF), for incident ID (n#) nAPP2110635348, with the following conditions:

- **The Remediation Plan is Conditionally Approved. The majority of the BTVs (background threshold values) are less than 600 mg/Kg for chlorides. Also, it appears some of the background soil sample locations were taken in or around a pipeline ROW. The variance for background chloride numbers of 1,751 mg/Kg in the (0'-4' Soils) is not approved. A large portion of the chloride impacted soils are in the (>4'-20' Soils) interval. A variance for background chloride numbers equal to or less than 1,242 mg/Kg in the (>4'-20' Soils) interval is approved. All samples must be analyzed for all constituents listed in Table I of 19.15.29.12 NMAC. Confirmation samples will need to be taken every 200 ft2. Sidewall/Edge samples should be delineated/excavated to 600 mg/kg for chlorides and 100 mg/kg for TPH to define the edge of the release. All sidewall samples should be taken from the sidewall of the excavation. Please make sure that the edge of the release extent is accurately defined.**
- **All areas no longer reasonably needed for production or drilling must meet reclamation standards set forth in the OCD Spill Rule. The work will need to occur in 90 days after the report has been reviewed.**

The signed IM-BNF can be found in the OCD Online: Imaging under the incident ID (n#).

If you have any questions regarding this application, please contact me.

Thank you,

To whom it may concern (c/o James Kennedy for EOG RESOURCES INC),

The OCD has received the submitted *Notification for (Final) Sampling of a Release* (C-141N), for incident ID (n#) nAPP2110635348.

The sampling event is expected to take place:

When: 02/19/2024 @ 08:00
Where: A-26-18S-26E 660 FNL 660 FEL (32.72415,-104.34635)

An OCD representative may be available onsite at the date and time reported. In the absence or presence of an OCD representative, sampling pursuant to 19.15.29.12.D NMAC is required. Sampling must be performed following an approved sampling plan or pursuant to 19.15.29.12.D.(1).(c) NMAC. Should there be a change in the scheduled date and time of the sampling event, then another notification should be resubmitted through OCD permitting as soon as possible.

- **Failure to notify the OCD of sampling events including any changes in date/time per the requirements of 19.15.29.12.D.(1).(a) NMAC, may result in the remediation closure samples not being accepted.**

If you have any questions regarding this application, or don't know why you have received this email, please contact us.

An OCD representative may be available onsite at the date and time reported. In the absence or presence of an OCD representative, sampling pursuant to 19.15.29.12.D NMAC is required. Sampling must be performed following an approved sampling plan or pursuant to 19.15.29.12.D.(1).(c) NMAC. Should there be a change in the scheduled date and time of the sampling event, then another notification should be resubmitted through OCD permitting as soon as possible.

- **Failure to notify the OCD of sampling events including any changes in date/time per the requirements of 19.15.29.12.D.(1).(a) NMAC, may result in the remediation closure samples not being accepted.**

If you have any questions regarding this application, or don't know why you have received this email, please contact us.

QUESTIONS

Operator: EOG RESOURCES INC 5509 Champions Drive Midland, TX 79706	OGRID: 7377
	Action Number: 515333
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

QUESTIONS

Prerequisites	
Incident ID (n#)	**nAPP2110635348**
Incident Name	**NAPP2110635348 INEX #3 @ 30-015-25916**
Incident Type	**Produced Water Release**
Incident Status	**Reclamation Report Received**
Incident Well	**[30-015-25916] INEX #003**

Location of Release Source	
Please answer all the questions in this group.	
Site Name	INEX #3
Date Release Discovered	09/17/2019
Surface Owner	Private

Incident Details	
Please answer all the questions in this group.	
Incident Type	Produced Water Release
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	No
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

Nature and Volume of Release	
Material(s) released, please answer all that apply below. Any calculations or specific justifications for the volumes provided should be attached to the follow-up C-141 submission.	
Crude Oil Released (bbls) Details	*Not answered.*
Produced Water Released (bbls) Details	Cause: Other | Unknown | Produced Water | Released: 0 BBL (Unknown Released Amount) | Recovered: 0 BBL | Lost: 0 BBL.
Is the concentration of chloride in the produced water >10,000 mg/l	Yes
Condensate Released (bbls) Details	*Not answered.*
Natural Gas Vented (Mcf) Details	*Not answered.*
Natural Gas Flared (Mcf) Details	*Not answered.*
Other Released Details	*Not answered.*
Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	Historical impacts discovered during P&A of well. Release volume and date are unknown.

QUESTIONS (continued)

Operator: EOG RESOURCES INC 5509 Champions Drive Midland, TX 79706	OGRID: 7377
	Action Number: 515333
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

QUESTIONS

Nature and Volume of Release (continued)	
Is this a gas only submission (i.e. only significant Mcf values reported)	**No, according to supplied volumes this does not appear to be a "gas only" report.**
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	**Yes**
Reasons why this would be considered a submission for a notification of a major release	**From paragraph A. "Major release" determine using:** **(1) an unauthorized release of a volume, excluding gases, of 25 barrels or more.**

With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.

Initial Response	
The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.	
The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	*Not answered.*

Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Chase Settle Title: Safety & Environmental Rep II Email: chase_settle@eogresources.com Date: 10/15/2025

Operator: EOG RESOURCES INC 5509 Champions Drive Midland, TX 79706	OGRID: 7377
	Action Number: 515333
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

QUESTIONS

Site Characterization	
Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs)	Between 26 and 50 (ft.)
What method was used to determine the depth to ground water	Estimate or Other
Did this release impact groundwater or surface water	No
What is the minimum distance, between the closest lateral extents of the release and the following surface areas:	
A continuously flowing watercourse or any other significant watercourse	Between 1 and 5 (mi.)
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)	Between 1 and 5 (mi.)
An occupied permanent residence, school, hospital, institution, or church	Between ½ and 1 (mi.)
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes	Between 1000 (ft.) and ½ (mi.)
Any other fresh water well or spring	Between 1000 (ft.) and ½ (mi.)
Incorporated municipal boundaries or a defined municipal fresh water well field	Greater than 5 (mi.)
A wetland	Between ½ and 1 (mi.)
A subsurface mine	Greater than 5 (mi.)
An (non-karst) unstable area	Greater than 5 (mi.)
Categorize the risk of this well / site being in a karst geology	Medium
A 100-year floodplain	Between ½ and 1 (mi.)
Did the release impact areas not on an exploration, development, production, or storage site	Yes

Remediation Plan		
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.		
Requesting a remediation plan approval with this submission		Yes
Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.		
Have the lateral and vertical extents of contamination been fully delineated		Yes
Was this release entirely contained within a lined containment area		No
Soil Contamination Sampling: (Provide the highest observable value for each, in milligrams per kilograms.)		
Chloride	(EPA 300.0 or SM4500 Cl B)	21000
TPH (GRO+DRO+MRO)	(EPA SW-846 Method 8015M)	434
GRO+DRO	(EPA SW-846 Method 8015M)	130
BTEX	(EPA SW-846 Method 8021B or 8260B)	0
Benzene	(EPA SW-846 Method 8021B or 8260B)	0
Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.		
On what estimated date will the remediation commence		12/12/2023
On what date will (or did) the final sampling or liner inspection occur		12/30/2024
On what date will (or was) the remediation complete(d)		12/30/2024
What is the estimated surface area (in square feet) that will be reclaimed		49539
What is the estimated volume (in cubic yards) that will be reclaimed		29878
What is the estimated surface area (in square feet) that will be remediated		49539
What is the estimated volume (in cubic yards) that will be remediated		29878
These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.		
The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.

QUESTIONS

Remediation Plan (continued)	
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.	
This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:	
(Select all answers below that apply.)	
(Ex Situ) Excavation and **off-site** disposal (i.e. dig and haul, hydrovac, etc.)	Yes
Which OCD approved facility will be used for **off-site** disposal	fEEM0112342028 LEA LAND LANDFILL
OR which OCD approved well (API) will be used for **off-site** disposal	*Not answered.*
OR is the **off-site** disposal site, to be used, out-of-state	No
OR is the **off-site** disposal site, to be used, an NMED facility	No
(Ex Situ) Excavation and **on-site** remediation (i.e. On-Site Land Farms)	No
(In Situ) Soil Vapor Extraction	No
(In Situ) Chemical processing (i.e. Soil Shredding, Potassium Permanganate, etc.)	No
(In Situ) Biological processing (i.e. Microbes / Fertilizer, etc.)	No
(In Situ) Physical processing (i.e. Soil Washing, Gypsum, Disking, etc.)	No
Ground Water Abatement pursuant to 19.15.30 NMAC	No
OTHER (Non-listed remedial process)	No
Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. QUESTIONS (continued)

Operator: EOG RESOURCES INC 5509 Champions Drive Midland, TX 79706	OGRID: 7377
	Action Number: 515333
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

QUESTIONS

Sampling Event Information	
Last sampling notification (C-141N) recorded	**414974**
Sampling date pursuant to Subparagraph (a) of Paragraph (1) of Subsection D of 19.15.29.12 NMAC	**12/30/2024**
What was the (estimated) number of samples that were to be gathered	**7**
What was the sampling surface area in square feet	**1400**

Remediation Closure Request	
Only answer the questions in this group if seeking remediation closure for this release because all remediation steps have been completed.	
Requesting a remediation closure approval with this submission	Yes
Have the lateral and vertical extents of contamination been fully delineated	**Yes**
Was this release entirely contained within a lined containment area	**No**
All areas reasonably needed for production or subsequent drilling operations have been stabilized, returned to the sites existing grade, and have a soil cover that prevents ponding of water, minimizing dust and erosion	Yes
What was the total surface area (in square feet) remediated	49539
What was the total volume (cubic yards) remediated	29878
All areas not reasonably needed for production or subsequent drilling operations have been reclaimed to contain a minimum of four feet of non-waste contain earthen material with concentrations less than 600 mg/kg chlorides, 100 mg/kg TPH, 50 mg/kg BTEX, and 10 mg/kg Benzene	Yes
What was the total surface area (in square feet) reclaimed	49539
What was the total volume (in cubic yards) reclaimed	29878
Summarize any additional remediation activities not included by answers (above)	Please see attached closure request report

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

I hereby agree and sign off to the above statement	Name: Chase Settle Title: Safety & Environmental Rep II Email: chase_settle@eogresources.com Date: 10/15/2025

QUESTIONS (continued)

Operator: EOG RESOURCES INC 5509 Champions Drive Midland, TX 79706	OGRID: 7377
	Action Number: 515333
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

QUESTIONS

Reclamation Report	
Only answer the questions in this group if all reclamation steps have been completed.	
Requesting a reclamation approval with this submission	Yes
What was the total reclamation surface area (in square feet) for this site	49539
What was the total volume of replacement material (in cubic yards) for this site	35218
Per Paragraph (1) of Subsection D of 19.15.29.13 NMAC the reclamation must contain a minimum of four feet of non-waste containing, uncontaminated, earthen material with chloride concentrations less than 600 mg/kg as analyzed by EPA Method 300.0, or other test methods approved by the division. The soil cover must include a top layer, which is either the background thickness of topsoil or one foot of suitable material to establish vegetation at the site, whichever is greater.	
Is the soil top layer complete and is it suitable material to establish vegetation	Yes
On what (estimated) date will (or was) the reseeding commence(d)	08/25/2025
Summarize any additional reclamation activities not included by answers (above)	All reclamation details are included in the attached Reclamation Report.
The responsible party must attach information demonstrating they have complied with all applicable reclamation requirements and any conditions or directives of the OCD. This demonstration should be in the form of attachments (in .pdf format) including a scaled site map, any proposed reseeding plans or relevant field notes, photographs of reclaimed area, and a narrative of the reclamation activities. Refer to 19.15.29.13 NMAC.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. QUESTIONS

Revegetation Report	
Only answer the questions in this group if all surface restoration, reclamation and re-vegetation obligations have been satisfied.	
Requesting a restoration complete approval with this submission	No
Per Paragraph (4) of Subsection (D) of 19.15.29.13 NMAC for any major or minor release containing liquids, the responsible party must notify the division when reclamation and re-vegetation are complete.
