Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	We had a major reportable release at the Alpha State Com 301H Facility due to a failed SWD valve. On Monday, April 6th, the facility was shut in to perform safety system and automation upgrades. During this process, all pumps were secured, the main discharge valve was closed and locked out, and all wells were shut in and locked at the wellheads. When the Operations Team arrived on site Tuesday morning, they found the produced water tank overflowing. As a result, approximately 409 barrels of produced water was released into the lined containment. All fluids inside the lined containment were recovered by vac trucks. The containment will be washed, and a liner inspection scheduled in the coming days.

QUESTIONS

Nature and Volume of Release (continued)	
Is this a gas only submission (i.e. only significant Mcf values reported)	No, according to supplied volumes this does not appear to be a "gas only" report.
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	Yes
Reasons why this would be considered a submission for a notification of a major release	From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more.
<i>With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.</i>	

Initial Response

The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
