

Cory – I wanted to make sure you were aware of the planned New Mexico Gas Company (NMGC) gas line that NMGC plans to install across portions of the Artesia Refinery. Shanna was aware of it but I am unsure how much she may have communicated to you. It is included in our quarterly updates and Shanna also requested that we use this form for the last notification update (if you prefer something different let me know). It was originally planned for earlier in 2025 but was delayed. They recently contacted me to let me know they have a planned start date of 18 May. The line will cross portions of the two RO fields and we have been working with NMGC to make sure any impacts to the phytoremediation pilot test are mitigated. NMED is also aware of the planned line. I'm happy to answer any questions that you may have and will keep you posted on the project.

Thanks,
Mike
