13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

The VPR D 167H was originally completed as a single zone horizontal lateral in the lower Vermejo coal.

There are no open hole logs due to this well being drilled as an extended reach with a held angle of 70° from 1174' to 2974'.

The proposed plan will be to run Cement Bond Log on wireline skates. Pick perf intervals in the middle and upper Vermejo coals. Perforate the middle and upper Vermejo via tubing conveyed gun.

Acidize then fracture stimulate with nitrogen foam gel and approximately 42,000 lbs of brown sand.

Clean out well bore, install production equipment, and return to production.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
