# Permit Conditions of Approval

Operator: EOG RESOURCES INC , 7377

Well: SAN SABA A 12 FEE #001H

API: 30-015-34476

| OCD<br>Reviewer | Condition                                                                                                                                             |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| BArrant         | Will require a directional survey with the C-104                                                                                                      |
| BArrant         | Pit construction and closure must satisfy all requirements of your approved plan, O.C.D. Rule 19.15.2.50, and the Pit and Below-Grade Tank Guidelines |
| BArrant         | Please notify OCD time of spud and time to witness the cementing to surface the 'water protection' string of casing.                                  |
| BArrant         | If by case another well drilling to produce from the same formation in this proration unit is proposed, an approval from Santa Fe for SP is required. |
| BArrant         | As noted 'fresh water mud/spud mud' is to be used in drilling the surface hole.                                                                       |
