**Date:** Monday, April 9, 2018 10:36:00 AM

---

Hello Mr. Ronald Rutherford,  
Good Morning Ron,

Please send us a new C-103 Sundry form with an update on the condition and plans for the following two wells:

30-053-20017 NAT Well No. 1

30-053-20118 NAT Well No. 2

**Please also let us know the status of Twining Drilling Corporation and whether it is active in the oil business.**

You stated the following in your last Sundry Notice dated May 1, 2014.

“Progress and specific details of intended use will continue to be submitted to NMOCD in a timely manner.”

The OCD is missing the following required data – it should be available in your records on these wells:

Completion Report Form C-105 and final Completion C-103 with the following data:

- a. Deviation survey
- b. Mudlogs/Electric Logs
- c. Formation Tops
- d. Spud Dates
- e. Casing and Drilling Details
- f. Completion Attempts and Production Tests

Many Regards,  
Will Jones
