Will – our landman that handled our New Mexico lands has since moved on from the company. We have been looking and looking for a consolidation code so we can get this completed but to no avail. We did find where some areas were consolidated but there is no code. We have feverously looked in land agreements, filings, archived drives and emails from previous employee. Could you please advise how to handle or where to find this within the NMOCD?

William – needing your help. On the C-102 submitted (and requested below) you asked for a consolidation code. Could you please explain what you are needing? Our NM landman is not sure what to look for.

Thanks,  
Charlotte

Wow  
Thanks much!  
You are awesome.

Will

Will – yes, we are working on getting the logs to you ASAP. Frac Focus is being loaded by C&J Services and notifying us as soon as it has been completed.

C-105 - The geo did provide the tops for the San Andres, Glorieta, Tubb and Granite.

C-102 – I corrected the acreage dedication however I cannot provide the consolidation code till sometime next week. Our land guy for that area is out for surgery.

Hope this will resolve everything that I can for now. Please let me know if you need anything else.

Hi Charlotte,

Thanks for the forms. 😊

Just a few questions;

- a. Are you sending the logs by thumb drive or diskette? We don't have them on the OCD web site.
- b. Would you ask a geologist to pick the formation tops? You could call the Geo and write in the tops on the back of the C-105 – or send them to me by email.
- c. Did the fracing company file the fracturing data on the "Frac Focus" web site?

On the C-102.

Please add the following or just confirm these to me:

- a. 640 acre spacing dedication
- b. Consolidation Code – which?

Thanks again,

You seem very fast with your paperwork, I appreciate it.

Regards,  
Will
