13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Dugan Production intends to close the separator pit at this location. Once the pit has been removed, soil samples will be collected and analyzed to ensure the soils below the pit area are in good condition. Once the soil samples are deemed acceptable, the pit hole will be filled in. The bare soils will be reclaimed and seeded when the well is plugged and abandoned.

14. I hereby certify that the foregoing is true and correct.
