13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

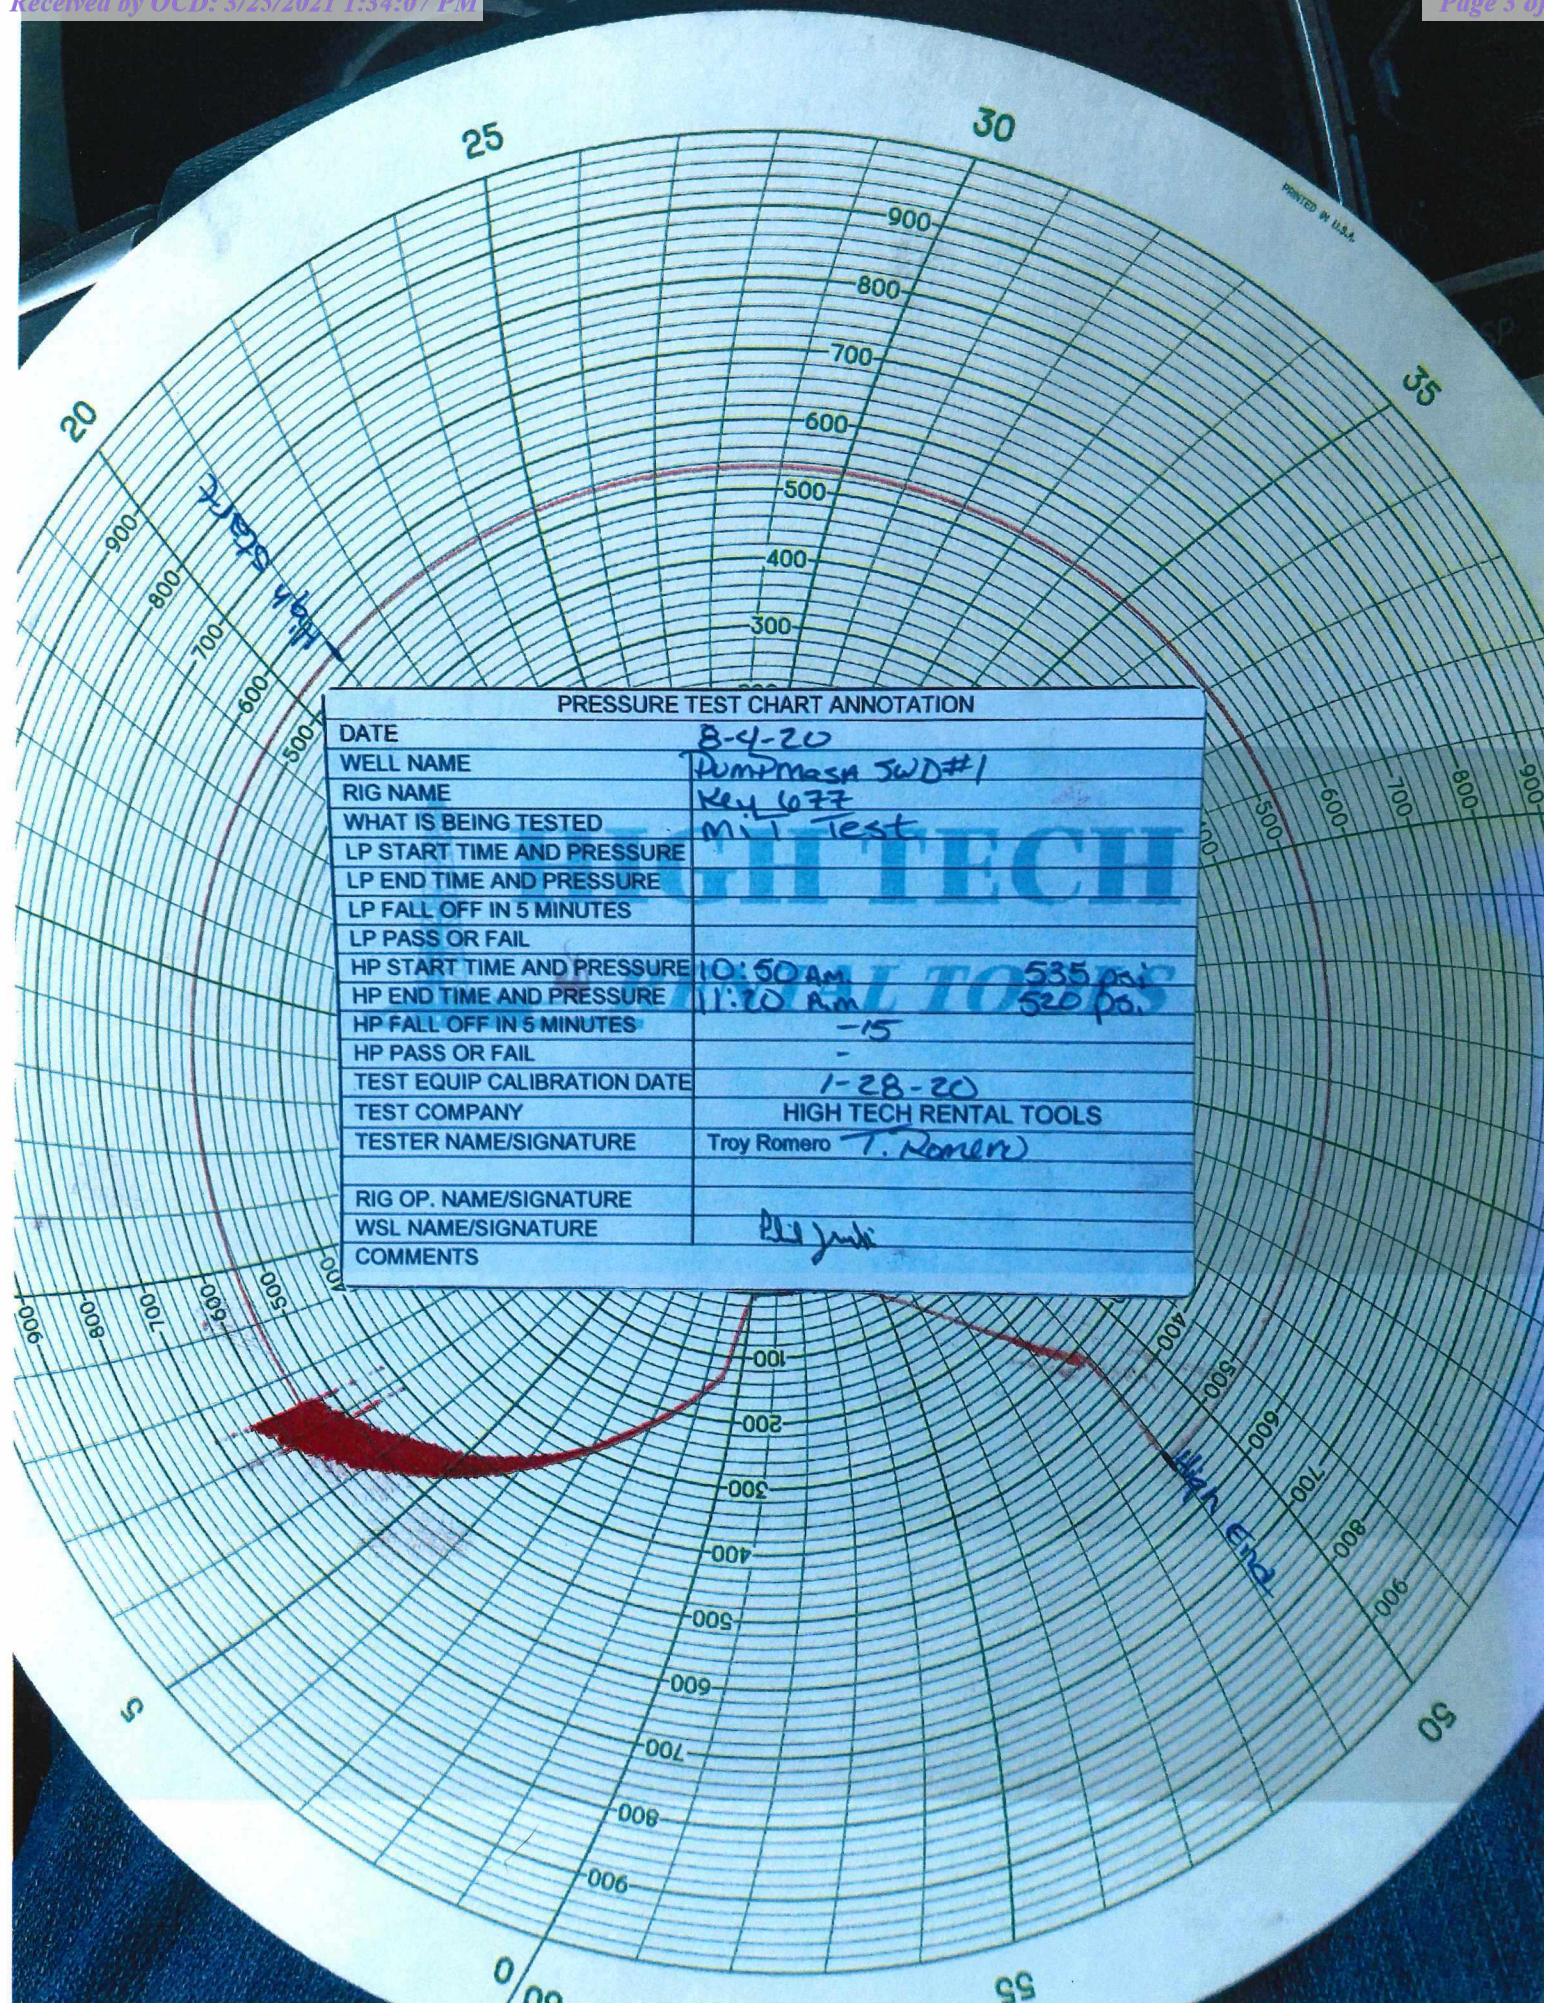

SIMCOE LLC (BP as contractor operator) restored integrity to the referenced well per the procedure below:

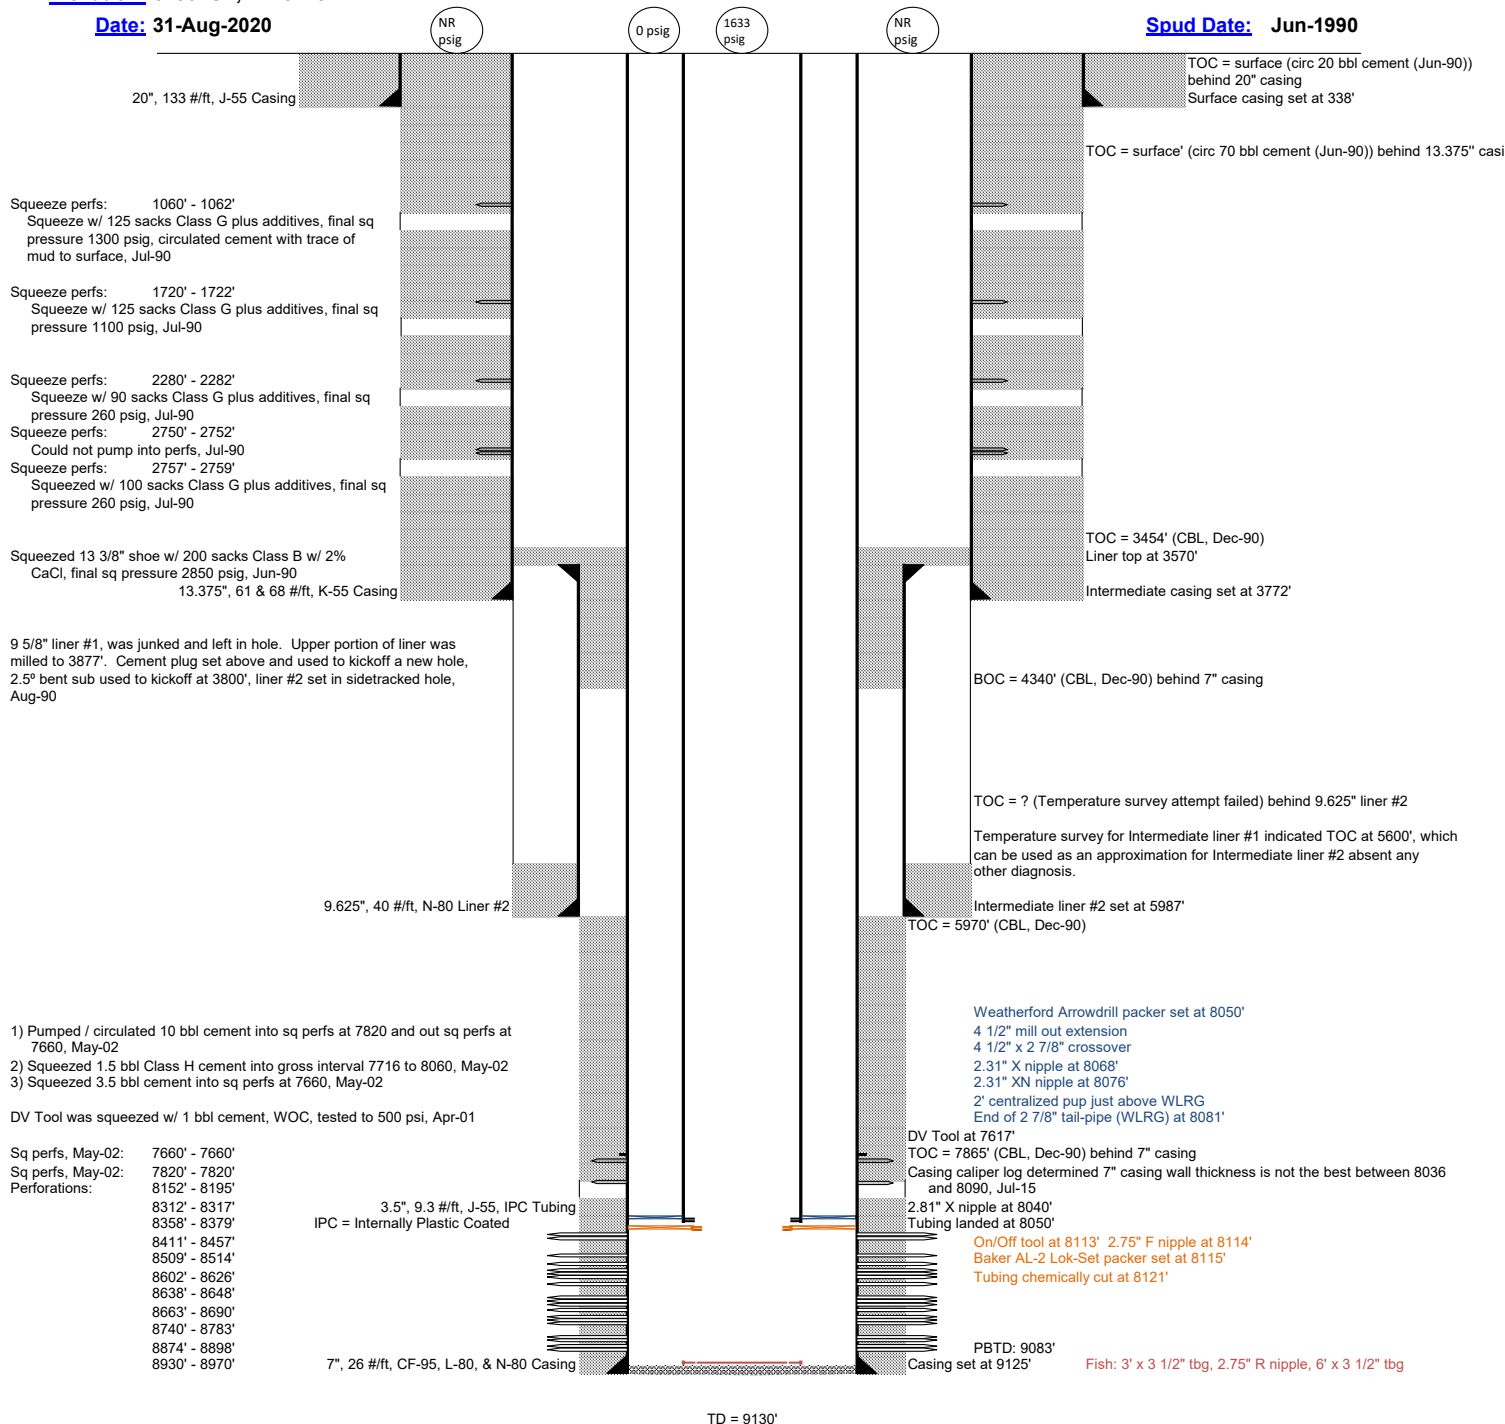

- 1 Rig up service unit on 6/18/2020
- 2 Perforate the tubing from 8005' to 8011' (just above the upper packer at 8020') with 13 holes sized at .40" and circulated kill weight fluid, 12.3 ppg, to surface on both tubing and annulus until well showed no pressure or flow.
- 3 Removed the upper packer (Baker Hornet) at 8032'.
- 4 Recovered the fish sitting on top of the lower packer.
- 5 Unable to remove the lower packer (Baker Lok Set) T 8114', packer remains in the well.
- 6 Set a new permanent packer at 8050'.
- 7 Circulated out kill weight fluid.
- 8 Installed new 3 1/2", J-55 plastic lined tubing string and seal assembly, tie/seal into new permanent packer at 8050'.
- 9 Placed packer fluid within the casing tubing annulus from 8110' to surface.
- 10 Performed and chart a witnessed MIT to 500 psi on the casing tubing annulus on 8/4/2020 (attached).
- 11 Rigged down service unit 8/10/2020.
- 12 Received approval for the MIT from NMOCD on 8/4/2020.
- 13 A kill check was performed on all three injection pumps on site and all 3 tested satisfactorily.
- 14 Returned well to disposal.

Attached is the successful MIT chart and current wellbore diagram.
