Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Epic Energy, LLC, has filed and received approval to permanently P&A the Lindrieth 110E. A subsequent review of the well file indicates that a Model D production packer that was reported to be set at 6590', may still be in the well. EPIC is requesting, that at the time of the P&A operations if the Model D is still in the well, that it be allowed to combine Plugs #1 & #2 and forego the CICR that was to be set above the Dakota. The combined plug would consist of setting a CICR at 5822' and then pumping a total of 112 sx (128 cf) of cement below the CICR to plug the Dakota and Gallup and leave 50' of cement on top of the CICR. The remainder of the P&A plan will be followed as approved with COA's.
