Remarks - Please state for each string (A,V,C,D,E) pertinent information regarding bleed down or continuous build up if applies.

Arrived at well location and installed gauge on surface interm valve, opened valve and recorded pressure of 0 (zero) psi. I then bled down the pressure that was only a puff of gas. Finally, I closed the valve and waited 15 minutes, checked the pressure gauge, and observed another 0 (zero) psi reading. Additionally, the tubing and casing gauges also registered 0 (zero) psi.
