Solaris respectfully requests to extend the MIT from 8/31/21 to 9/30/21. As part of our diagnostic review of the well, Solaris recently injected 35 bbls into the well along with attempting a pressure test on the annulus. Both tests confirm an issue with the tubing string. Solaris would like the additional time such that the company can determine whether to T&A, P&A, or repair this well. The well will remain shut in until such time that Solaris can provide a passing MIT. Solaris will provide the NMOCD the forward plan once a decision is made such that Solaris can get approval for our preferred course of action.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
