Notice of Intent

Sundry ID: 2667031

Type of Submission: Notice of Intent	Type of Action: APD Change
Date Sundry Submitted: 04/14/2022	Time Sundry Submitted: 10:01
Date proposed operation will begin: 04/12/2022	

Procedure Description: OXY USA Inc. received verbal approval for a second sidetrack while drilling the subject well production hole. Previous sidetrack #1 sundry ID for reference (2665395). After two unsuccessful attempts to sidetrack off of cement plugs in openhole, it was decided to set a cased hole whipstock 60' above the intermediate casing shoe. Plan forward is to bring cement 500' inside the window for isolation. See the attached verbal email communication with corresponding wellbore diagram for the plan forward for reference.

Mandela,

See wellbore diagram below. As mentioned, the two sidetracks off of cement plugs were unsuccessful. Our plan was to tie back production cement 500' into the sidetrack window to isolate both wellbores.

I have no problem with this, the only difference between my email and Chris's is as the approving engineer I am just requesting the required documents for the approval of the procedure.

Long,

After two unsuccessful attempts to sidetrack off of cement plugs in openhole, it was decided to set a cased hole whipstock ~60' above the intermediate casing shoe (Still in 3rd Bone Spring Lime). We will plan to bring production cement 500' inside window for isolation. Please provide verbal approval, or let us know if you need any more information. I'm assuming we will need to submit another sundry with this updated plan.

Original hole TD: 11,193'

Top of fish: 9,940'

7-5/8" shoe depth (previous casing): 9,688'

Bottom of sidetrack window: 9628'

Subject: Tails 35H Sidetrack Plan

Long,

As discussed, we left a fish in the 6-3/4" production curve on the Tails CC 10_3 Fed Com 35H, API: 30-015-48965. We could not retrieve the fish or move it down during the fishing attempt.

Original hole TD: 11,193'

Top of fish: 9,940'

7-5/8" shoe depth (previous casing): 9,688'

Plan:

- Pump 400' cement plug from top of fish back into the 7-5/8" shoe.
- Drill out cement and sidetrack below the 7-5/8" casing shoe at 9708' MD.

Can we get verbal approval to move forward with the proposed plan? We will follow up with a sundry within 5 days.

Regards,

Calen Collins
