Purpose of Step Rate Program

- The purpose of the WBDU step rate tests is to seek a fieldwide Injection Pressure Increase approved.
- We would like to increase the injection pressure for reserve acceleration and increased EUR for the entirety of the WBDU lease.
- The NEDU (IPI-185) has permitted injection pressure of 1,375 psi and the EBDU (IPI-292) has permitted injection pressure of 2,100 psi. Both were increased based on submitted injection pressure tests.

WBDU Step Rate Targets

- 22 targets selected for:
 - Total coverage of depth on structure
 - Total areal coverage
 - Including wells with Blinebry & Tubb perfs

Prep Planned Before Step Rate Tests

- Each injector's injection profile and workover history was reviewed, and the following wells will need IPLs
- As of 5/1/2022, 11 of the 22 step rate targets had had IPLs in the past 3 years confirming no out-of-zone losses, leaks, or integrity issues
- 11 of the 22 step rate targets had not had an IPL in the past three years confirming zonal isolation, so an IPL program was undertaken with Renegade Wireline
 - IPL program was completed on 7/14/2022
 - Wellbore integrity and injection zones have now been verified
 - Apache is happy to provide IPLs to NMOCD
