Actual Procedure: On February 26, 2022 at approximately 07:30hrs the Federal D #6 had an increase in pressure (1200 psi). Suspect that pressure was a result of the hydraulic stimulation that was being performed on the Nageezi Unit by DJR. Due to the proximity of the laterals and prior to DJR initiating their completion, measures were taken to ensure that any abnormal pressure would not affect the wellhead or related surface equipment. Currently, the well is being monitored for excessive pressure and if necessary being directed to flowback tanks to lower the surface pressure on the wellhead equipment. Attached is the gas analysis report.
