10,760.00'

Annotations

While running with full drift casing scrapper (4.001") and 3.875"bit . we tagged solid @ 11,133 MD. Full weight of string (40 K) was put on top of it and it did not fell through. We think, it is cement from previously set plug.

Upon consultation with NMOCD supersivor, we were allowed to set a CIBP above hard tag @ 11,052 MD top it with cement , test it and proceed to uphole to set 2nd plug @ 10,760 MD.

All depths are wireline based and correlated to top of liner @ 10,389'
