Grant, my field guys told me it is on their list. My understanding is that we will remove our meter run, meter house, and cut and cap the 2" steel line. Please let me know if you have any other questions.

Dustin – we have another (hopefully final) plugged out well site where the NM OCD has declined our request for release, in part due to midstream equipment needing to be removed -- NMOCD specifies “meter run, meter house, and 2” steel lines with connections”.

The site in question is the former well site of the Bewitched 12 State Com #001 in Lea County, NM

Would you be able to help me out on this one similar to the Tucker wells we corresponded about recently. I think I need some sort of email/letter stating Targa will schedule the removal of this midstream equipment in order for the NM OCD to release and for Mammoth to get its bonds released.

Thank you,

Grant Hawkins
