Subject: [EXTERNAL] P&A Revision for Hilcorp's NV NAVAJO 20 4 (API # 3004531056)

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Good afternoon Kenny & Monica,

Hilcorp is planning to move to the NV NAVAJO 20 4 (API # 3004531056) for P&A tomorrow.

Attached is the CBL run on 1/26/2006. This shows cement nearly to surface at ~23'.

Additionally, based on the COAs outlined in the attached approved NOI, Hilcorp plans to make the following adjustments PLUG #1:

- Set a 5.5" CICR @ 869' (As stated in approved NOI)
- TIH w/ work string to 869'
- **PLUG #1: 41sx of Class G Cement (15.8 PPG, 1.15 yield); FRD Perfs @ 919' | FRD Top @ 618':**
 - Pump a 41 sack balanced inside plug (Estimated TOC @ 518', Estimated BOC @ 869')

The remainder of the NOI will remain the same, with exception of pumping Class G cement as opposed to Class III. We will top off cement as needed.

Please let me know if there are any questions or concerns with this plan.

Thanks,

John LaMond
