13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Currently have a rig over the hole. Kerry Fortner and Gary Robinson have been in constant contact with our team. Pulled tbg/pkr then identified small casing leak at 1145'. Remaining casing above and below has no integrity issues.

Requesting to set RBP slightly below leak and pump 50 sack Class C balanced plug across leak. WOC 48 hours then drill out and test casing. Continue w/ squeeze work until leak is sealed off and will hold pressure to pass MIT. Once completed RIH w/ tbg/pkr. Run NMOCD witnessed MIT. If successful RDMO WSU then return well to production.

Spud Date: []

Rig Release Date: []

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
