Kenny/Loren

Attached is the updated procedure based on the COA's. The changes made are; modified plug 2 to cover BLM's El Vado top, modified plug 6 to include BLM's Ojo Alamo pick, updated the cement behind pipe based on yesterday's CBL (no changes were made to plugs based on this).

Please let us know if you approve or have any questions/concerns.

Thanks,

- Joe Z.

Subject: Request to Expedite P&A Approval for NEWSOM B 9E (API: 3004525054)

Good afternoon,

Kenny, as discussed, we moved to the **NEWSOM B 9E (API: 3004525054)** today to set a plug and TA the well, and unfortunately after setting the CIBP, the well will not pass an MIT. We are going to pivot to plugging the well, and are requesting a quick approval on the NOI so we can continue to P&A ops without having to rig down and move.

I've attached the NOI that was just submitted online to the BLM. As soon as we get BLM approval, we will submit it asap to the State. Please let us know if there is anything we can do to speed this process up. I appreciate your time and help on this.

Thank you,

Joe Zimmerman

Hello Joe,

Attached is the geology report, the BLM geologist is still looking at the procedure before official approval.

We do have an El Vado pick at 5100 that is possible gas, so for plug 2 we will be requesting the TOC be 5000. And we do have Ojo Alamo at 980, so we will request the TOC for plug 6 be 880.

Let us know if you need clarification.

The BLM approves the work up to the Gallup/ plug 2. Let us know if an approval is indeed needed in AFMSS, the conditions will be that work is only approved to Gallup/ plug 2. A complete geology report from the BLM will be needed for work above.
