Good evening Ward,

I tried calling the OCD on call number but was unable to get ahold of Gilbert.

Looking through the APD info and realized we didn't submit a alternate procedure in the 9-5/8" intermediate section to run a DV tool and pump a 2 stage cement job if full returns are not maintained through the capitan reef formation. Can we extend the approval granted during our Little Betty 701H, 702H, 703H, and 704H to cover the 4 wells we are currently drilling in that section?

Thank you,
Ryan Harris
