(Instructions on page 2)

GENERAL INSTRUCTIONS

This form is designed for submitting proposals to perform certain well operations and reports of such operations when completed as indicated on Federal and Indian lands pursuant to applicable Federal law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local area or regional procedures and practices, are either shown below, will be issued by or may be obtained from the local Federal office.

SPECIFIC INSTRUCTIONS

Item 4 - Locations on Federal or Indian land should be described in accordance with Federal requirements. Consult the local Federal office for specific instructions.

Item 13: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by the local Federal office. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to the top of any tubing left in the hole; method of closing top of well and date well site conditioned for final inspection looking for approval of the abandonment. If the proposal will involve **hydraulic fracturing operations**, you must comply with 43 CFR 3162.3-3, including providing information about the protection of usable water. Operators should provide the best available information about all formations containing water and their depths. This information could include data and interpretation of resistivity logs run on nearby wells. Information may also be obtained from state or tribal regulatory agencies and from local BLM offices.

NOTICES

The privacy Act of 1974 and the regulation in 43 CFR 2.48(d) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et seq., 351 et seq., 25 U.S.C. 396; 43 CFR 3160.

PRINCIPAL PURPOSE: The information is used to: (1) Evaluate, when appropriate, approve applications, and report completion of subsequent well operations, on a Federal or Indian lease; and (2) document for administrative use, information for the management, disposal and use of National Resource lands and resources, such as: (a) evaluating the equipment and procedures to be used during a proposed subsequent well operation and reviewing the completed well operations for compliance with the approved plan; (b) requesting and granting approval to perform those actions covered by 43 CFR 3162.3-2, 3162.3-3, and 3162.3-4; (c) reporting the beginning or resumption of production, as required by 43 CFR 3162.4-1(c) and (d) analyzing future applications to drill or modify operations in light of data obtained and methods used.

ROUTINE USES: Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions in connection with congressional inquiries or to consumer reporting agencies to facilitate collection of debts owed the Government.

EFFECT OF NOT PROVIDING THE INFORMATION: Filing of this notice and report and disclosure of the information is mandatory for those subsequent well operations specified in 43 CFR 3162.3-2, 3162.3-3, 3162.3-4.

The Paperwork Reduction Act of 1995 requires us to inform you that:

The BLM collects this information to evaluate proposed and/or completed subsequent well operations on Federal or Indian oil and gas leases.

Response to this request is mandatory.

The BLM would like you to know that you do not have to respond to this or any other Federal agency-sponsored information collection unless it displays a currently valid OMB control number.

BURDEN HOURS STATEMENT: Public reporting burden for this form is estimated to average 8 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of this form to U.S. Department of the Interior, Bureau of Land Management (1004-0137), Bureau Information Collection Clearance Officer (WO-630), 1849 C St., N.W., Mail Stop 401 LS, Washington, D.C. 20240

The procedure stipulations from Keith in the July 26th email are adequate for the bradenhead remediations for the below wells. Please reach out if you have any questions. Thanks.

Reg Staff – Please submit a NOI – Cement Remediation for the below three wells with a PDF of the email chain to show approval was granted prior to operations.

Sincerely,
Allison Morency

Subject: Fwd: -EXTERNAL- RE: [EXTERNAL] Kangaroo 12 Fed Com 133H 2nd Intermediate Bradenhead Job

Allison,

As per our phone conversation we have H&P 489 slated to drill their second intermediate section this weekend. Our recent offset pad (also named the Kangaroo) encountered severe losses and were unable to circulate cement to surface during the primary job. We are asking for the same approval below for the following wells for a bradenhead job / top out if we do not circulate cement to surface on the primary job.

Kangaroo 12 Fed Com 132H - API# 30-015-47595
Kangaroo 12 Fed Com 201H - API# 30-015-48214
Kangaroo 12 Fed Com 202H - API# 30-015-47597

Please let me know if this is proposal is approved.

Thank You,
Ben Taylor

Subject: -EXTERNAL- RE: [EXTERNAL] Kangaroo 12 Fed Com 133H 2nd Intermediate Bradenhead Job

WARNING: The sender of this email could not be validated and may not match the person in the "From" field.

Reviewed and is mostly OK, please review the additional comments:

1. Please limit flush volume to 1bbl (instead of the 5bbls proposed)
2. To clarify, the TOC requirement for this interval will still be to surface. A top-out if bradenhead top is 1000' or less is OK.
3. If doing top out, verification OK based on required volume(from echo-meter) and visual verification to surface
4. Procedure OK as contingency for operations over the weekend.

Regards,

Keith Immatty

Subject: [EXTERNAL] Kangaroo 12 Fed Com 133H 2nd Intermediate Bradenhead Job

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Good Afternoon,

As discussed over the phone, we lost full returns on the Kangaroo 12 Fed Com 133H (API# 30-015-47598) We are proposing pumping a bradenhead squeeze to the top of where first losses were encountered at ~1740' with 100 sx of 14.5 ppg Thixotropic, 1.45 yld. & 425 sx of class C 14.8 ppg, 1.34 yld. The cement top after the squeeze job will be verified by Echo-meter. Permian Resources will report the Echo-meter verified fluid top and volume of fluid (limited to 5 bbls) used to flush intermediate casing valves following backside cementing procedures. The two-stage cement job will be conducted offline as per approved APD. If the bradenhead cement top is 1000' or less we will top out with class C cement.

I would also like to propose this same procedure for our two additional well on this pad, Kangaroo 12 Fed Com 203H (API: 30-015-47599), Kangaroo 12 Fed Com 204H (API: 30-015-47497) as a contingency in the event we don't circulate cement to surface.

Please let me know if this proposal is approved.

Thanks,

Ben Taylor | Drilling Engineer | Permian Resources
