Ed,
Attached are the lab results on the pit contents at WBDU 1929-322K. All results, except chlorides and DRO, meet the minimum levels identified in the pit permit. Chloride level is 15,400 mg/kg and DRO is 630. We propose to bury these contents in place per our permit by mixing 4:1 with clean soil before deep bury. With your approval, we would like to close this pit beginning this week. Please advise.
