**If this is a pit closure:** (1) Attach a diagram of the facility showing the pit's relationship to other equipment and tanks. (2) Indicate disposal location: (check the onsite box if you are burying in place) onsite ☐ offsite ☐ If offsite, name of facility       . (3) Attach a general description of remedial action taken including remediation start date and end date. (4) Groundwater encountered: No ☐ Yes ☐ If yes, show depth below ground surface        ft. and attach sample results.  
(5) Attach soil sample results and a diagram of sample locations and excavations.

**Additional Comments:** The working pit contents were transferred to the back reserve pit and the deep bury trench was dug in the working pit area. The deep bury trench was then lined with a 12 mil. liner. All pit contents were then transferred into the lined bury pit and capped with a 20 mil. liner. Bury pit was backfilled and contoured with 3' of soil capable of supporting native plant growth to prevent erosion and the ponding of rainwater. No ground water was encountered during this pit closure.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that the above-described pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐, or an (attached) alternative OCD-approved plan ☐.
