Dear Mr. McGraw,

In reference to the above application I just wanted to inform you that this location is non-standard for a Atoka gas well completion and will need a NSL approval administratively or through a hearing (which ever applies) from Santa Fe before we can issue an approval for the re-entry.

In addition, please submit a h2s contingency plan if this intended re-completion meets the requirements of NMOCD Rule 118.

If not, please submit a letter stating so in detail.

I will also need a C-102 completely filled out.

This location is just west of the Bear Grass Draw; Atoka, West Gas Pool, Code # 71688.

Please call 505-748-1283 ext 103 if you have any ??s

Yours truly,
Bryan Arrant
