Re: Application of EOG Resources, Inc. administrative approval of an unorthodox well location for its Sibyl "1" Federal Com Well No. 1 (**API No. 30-015-31276**) in the Bone Spring formation at a location 1980 feet from the North line and 1134 feet from the East line of Section 1, Township 18 South, Range 30 East, N.M.P.M., Eddy County, New Mexico.

Dear Mr. Fesmire:

EOG Resources, Inc. hereby seeks administrative approval pursuant to the provisions of Division Rule 104 F (2)-(4) adopted on August 12, 1999, of an unorthodox well location for its Sybil "1" Federal Com Well No. 1 at an unorthodox oil well location in the Bone Spring formation, Undesignated North Shugart-Bone Spring Pool at a point 1980 feet from the North line and 1134 feet from the East line of Section 1, Township 18 South, Range 30 East, N.M.P.M., Eddy County, New Mexico. The well was originally drilled to test the Morrow formation at a standard location on a N/2 spacing unit. However, after having produced in the Morrow formation, the well has been re-completed in the Bone Spring formation. A standard 40-acre spacing and proration unit comprised of the SE/4 NE/4 of Section 1 will be dedicated to the well.

This location in the Bone Spring formation is unorthodox because it is governed by the Division's statewide rules that provide for wells on 40-acre spacing units to be located no closer than 330 feet to the outer boundary of the quarter section on which the well is located. The proposed well location is unorthodox because it is only 186 feet from an outer boundary of the 40-acre quarter-quarter section being the SE/4 NE/4 of said Section 1.

Attached hereto as Exhibit A is a plat that shows the subject area, the 40-acre spacing unit comprised of the SE/4 NE/4 of Section 1 and the proposed unorthodox well location. Since this well encroaches on offsetting acreage to the west, a copy of this application, including a copy of the plat described above has been sent to all working interest owners in this offsetting spacing unit by certified mail-return receipt requested in accordance with Rule 1207 (A)(5). These owners are identified on Exhibit B to this application and have been advised that if they have an objection to this application it must be filed in writing with the Division's Santa Fe office within twenty days from the date this notice was sent. The offset operators indicated by an asterisk are part of the Read & Stevens group and Read & Stevens has recommended that these owners not oppose this location in exchange for a like waiver from EOG Resources, Inc. for an unorthodox location for an offsetting well in Section 1.

Your attention to this application is appreciated.

Very truly yours,
