Celeste:

This was done and approved with number: PC-1123 on 10/6/04.

According to the new surface commingle rules for identically owned pool commingles, all we do here is sign the C-103 and assign a number to it. It was scanned into our web site and is available there if the mail did not arrive with a hard copy. I just looked at it online and in our database.

I still need all the API numbers involved in order to complete our records....  
Please send by email if possible,

Regards,  
Will Jones
