Test Method

HISTORICAL X FIELD TEST ☐ PROJECTED ☐ OTHER ☐

FORMATION	GAS	PERCENT	OIL	PERCENT
Pictured Cliffs	137.25 MMCF	37%		
Mesaverde	230.2 MMCF	63%		100%

JUSTIFICATION OF ALLOCATION

The referenced well was commingled and a PC restimulation was completed in August, 2000. These percentages are based upon reserves assigned to each formation before and after workover operations. The Pictured Cliffs did not produce any oil prior to the commingle therefore; all oil should be allocated to the Mesaverde.
