RECEIVED

JAN 18 2005

Oil Conservation Division
 1220 S. St. Francis Drive
 Santa Fe, NM 87505

REQUEST FOR ADMINISTRATIVE APPROVAL FOR NONSTANDARD LOCATION FOR
XTO ENERGY INC.

FLORANCE 74

2250' FSL & 790' FEL SEC. 19, T. 27 N., R. 8 W., SAN JUAN COUNTY, NM

I. The well is on BLM surface and on BLM oil and gas lease (NMNM-0003380). The proposed location is nonstandard for the Blanco Pictured Cliffs South due to topography. A standard location must be at least 660' from the quarter line. This well is staked 270' further north than is standard. (Closest standard location would be 1980' FSL and 790' FEL.) The APD cover sheet is attached as EXHIBIT A.

II. A C-102 showing the well location and pro ration unit (SE4 Sec. 19) is attached (EXHIBIT B). Relevant parts of the BLM oil and gas lease (2,400.96 acres) are shown as solid lines on the attached (EXHIBIT C) copy of the Fresno Canyon USGS topo map.

The well encroaches on the NE4 Section 19. The Pictured Cliffs in that quarter section has been dedicated XTO's Florance D LS 12 which is 2,391' north and on the same lease. Pictured Cliffs acreage dedications (quarter sections) are shown on Exhibit D.

III. According to NM Oil Conservation Division records reviewed on January 16, 2005; the closest existing or planned Pictured Cliffs well is XTO's Florance D LS 12 well which is 2,391' north at 790' FNL & 1628' FEL 19-27n-8w and on the same lease. EXHIBIT E shows the proposed well site, Pictured Cliffs dedicated spacing units, and Pictured Cliffs wells (circled on map) within those dedications.

Registered letters were sent on January 15, 2005 to all of the offset interest owners. Copies of the postal receipts and letters are attached.

IV. A copy of the USGS map is attached (EXHIBIT F). The proposed well site is marked. Pro ration unit (dashed outline) for the Blanco Pictured Cliffs South gas is the 160.00 acre southeast quarter of Section 19, Township 27 North, Range 8 West, San Juan County, NM.

V. The nonstandard location is due to topography. The closest standard location is on the side of a ~500' high cliff on Blanco Mesa.

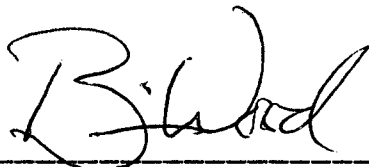

VI. Archaeology is not an issue.

VII. See item V. above and attached map (EXHIBIT G) for a description of the surface conditions.

VIII. Directional drilling is not feasible because it is not cost effective.

IX. I hereby certify notice (see attached EXHIBIT H) has been sent to the following lessees, lessors, operators of existing spacing units, or owners of undrilled leases which adjoin the applicant's spacing unit on one or more of the two sides or the single closest corner to the proposed well and that the information is current and correct.

As required by New Mexico Oil Conservation Division Rules, I am notifying you of the following nonstandard location (NSL) for a well. This letter is a notice only. No action is needed unless you have questions or objections.

XTO Energy Inc. is applying to drill its Florance 74 gas well. The minimum state distance for such a gas well is 660' from a quarter section line. The proposed well is 270' further north than is standard. Thus, it is a nonstandard location. The NSL is due to topography. It is 790' from the closest lease boundary.

Well Name: Florance 74 Total Depth: 7,675'

Proposed NSL Producing Zones: Blanco Pictured Cliffs South

NSL Acreage Dedication: 160 acres (= SE4)

Location: 2250' FSL & 790' FEL Sec. 19, T. 27 N., R. 8 W.,

San Juan County, NM on Federal lease NMNM-0 003380

Approximate Location: ≈13 air miles southeast of Blanco, NM

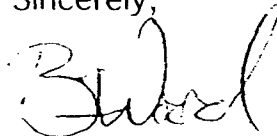

Applicant Name: XTO Energy Inc. (505) 324-1090

Applicant's Address: 2700 Farmington Blvd, Bldg. K-1, Farmington, NM 87401

Submittal Information: Application for a nonstandard location will be filed with the NM Oil Conservation Division. If they determine the application complies with the applicable regulations, then it will be approved. The New Mexico Oil Conservation Division address is 1220 South St. Francis Dr. Santa Fe, NM 87505. Their phone number is (505) 476-3440.
