No other changes. It will take a while to get surveyors back out to move but the 360 FNL & 1200 FEL will be the new footages. Cannot get an API number until I get the new plats to Paul and he resends the letters out to SLO & BLM.

Barry and Patty,

Any other changes? Only this new location shown below?

From the land plat sent earlier, there would be NO new owners to notice.

When do you expect to have an API?

Please confirm these questions and I will probably just do a corrected permit.

Will, yes the move of 700 ft. west would make it 1200 FEL (same quarter quarter). I just got off the phone with Jim Rutley (BLM) and he said the footage of 360 FNL & 1200 FEL would clear

through him.

Thanks

Barry

Hello Barry,

I may have already talked to Patty about this?

Take the C-108 application that was submitted earlier and turn the new location over to your landman or contract landman.

Ask that Landman to make another plat similar to the attached which was submitted earlier.

You will at least need to notice these new parties – and let me know who the new affected parties are.

If this location has moved from one qtr-qtr into another, you should immediately do the land work and send in another C-108 with new notices to all parties and new newspaper notice, even if they were noticed before.

If the location is still in the same qtr-qtr, it is possible that we can do an abbreviated C-108 with notice only to the newer parties identified by your landman and no newspaper notice.

Thank You,

Will Jones

Will

I had to reject XTO's proposed location for a new drill SWD well because it was within the ¼ mile buffer zone for the R-114-p potash area. From what I understand if they move it a short distance it will then be outside the buffer zone. I told Barry Hunt that he needs to contact you about what may be need to amend the SWD order for the new location. See below.

A new location may require a new admin application for SWD. You will need to contact Will Jones in Santa Fe. If the wells in the area of review for the new location does not change, Will may be able to amend the current SWD order. A new survey will be needed and I will need to send new letters to BLM & SLO.

Paul, if we move the proposed well to meet the 1/4 mile buffer requirements (not to far southwest is what I'm being told) can we just send in the new survey plats and have you change the footages on the APD cover page and get it out fairly quickly?

I'm meeting Jim Rutley, with BLM, this morning to get the actual footages.

Thanks!
Barry
