Subject: Request to Amend (PLC-192) the Current Surface Commingle (PLC-192-A)
Masden Gas Com #1E
Sec 28, T29N, R11W
San Juan County, NM

Dear Mr. Ezeanyim:

XTO Energy Inc. requests administrative approval to amend the current surface commingling order of natural gas produced from the following wells: Masden Gas Com #1E and the Hartman #1R. The Masden Gas Com #1E has received all necessary approvals to be recompleted in the Basin Mancos formation as well as Downhole Commingling approval for this well. The request is to add the Basin Mancos Formation in the Masden Gas Com #1E surface commingle. These wells are located in Section 28-Township 29N-Range 11W UL D, in San Juan County, New Mexico. XTO wishes to keep the current surface commingle order; however amend it to add the Basin Mancos pool.

Furthermore gas production shall be allocated to each well by lease by:

Gas Production from the Masden Gas Com #1E shall be determined by subtracting the metered production from the Hartman #1R from the total gas production from both wells metered at the sales point. Compressor fuel gas shall be allocated to each well according to that well's gas production rate. Each wells hydrocarbon and water production shall be kept separate not commingled.

It is XTO Energy's intent to produce the commingled gas through a central compressor, thus lowering operating expenses and extending the economic life of the wells. This increases the ultimate recoveries on all leases. The anticipated allocated fuel production and fuel usage for the compressor is noted in the attachments.

Each well will be equipped with allocation meters that will be maintained by XTO Energy in accordance with State and Federal Regulations. All interest owners have been notified via certified mail, return receipt, on June 5, 2013

The following attachments are included with this application:

- Form C107B (application for surface commingle; diverse ownership)
- Map of all wells and their associated leases
- Form C-102 for each well (plats)
- Table of well with lease and agreement information, spacing, permits, gravities/BTU, MCF
- Schematic diagram showing all flowlines, compressors & equipment
- Details of allocation formula
- Letter to WI, NRI & ORRI owners & list of owners
- Administrative Application Checklist

Sincerely,

Masden Gas Com #1E & Hartman #1R Gas Allocation Formula

The Masden Gas Com #1E's existing gas sales meter will be used as the central distribution point (CDP) gas sales meter for both wells. A new gas meter was set on the Hartman #1R to be used as its allocation meter. See the attached proposed gas surface commingle installation diagram. The Hartman #1R allocation meter will separately measure its gas production. The Masden Gas Com #1E gas production will be calculated by difference between the total sales volume from the CDP sales meter and the Hartman #1R's allocation meter volume. El Paso Field Service is the gas transporter for these leases.

Masden Gas Com #1E gas production will be calculated as follows:

$$\text{Gas Prod.} = [\text{CDP sales meter vol.} - \text{Hartman \#1R allocation meter vol.}] + \text{Allocated compressor \& separator fuel gas vol.}$$

Hartman #1R gas production will be calculated as follows:

$$\text{Gas Prod.} = \text{Hartman \#1R allocation meter vol.} + \text{Allocated compressor \& separator fuel gas vol.}$$

The total fuel gas usage is estimated to be 9 MCFD for the compressor. The compressor's fuel usage will be divided equally between the two wells. During the winter if the well's separator water bath is heated, the fuel gas usage is estimated to be 1 MCFD for the well.

RE: Notice to Working and Royalty Interest Owners
Application to Surface Commingle Gas Production
San Juan County, New Mexico

XTO Energy Inc. proposes to amend the current surface commingle order, which was previously filed with the New Mexico Oil Conservation Division (NMOCD). The amendment will add the Basin Mancos Formation in the Masden Gas Com #1E gas well. The current surface commingle order includes the Masden Gas Com #1E & the Hartman #1R. NMOCD requires that all interest owners be notified of plans to amend a surface commingle when ownership is different between wells.

Produced gas from each well will be measured separately prior to being commingled. We plan to produce the commingled gas through a shared compressor. Produced liquids will not be surface commingled. In the future, additional wells, pools, and acreage may be added to this surface commingle or this gathering system.

If you need additional information, or have any questions, please contact me at (505) 333-3206. If you have an objection to our application, you must file a protest in writing to the NMOCD Santa Fe office at 1220 South Saint Francis Drive, Santa Fe, NM 87505 within 20 days from the date of this letter. If there are no objections raised, an application will be submitted to NMOCD at that time.

Sincerely,

A handwritten signature in cursive script that reads 'Kristen D. Lynch'.
