RE: Application for Administrative Approval for Non-Standard Proration Unit and Non-Standard Location

Gallegos Canyon Unit 207E
API 30-045-23897
950' FNL and 1070' FWL
Unit D Section 14, Township 28N, Range 12W
San Juan County, New Mexico
Basin Dakota & Basin Mancos Pool Formations

Dear Sir or Madam,

BP America respectfully requests administrative approval for a non-standard proration unit and non-standard location for the above referenced well. Attached for your reference are the following exhibits:

1. Administrative Application Checklist •
2. Well Location Plat (C-102)
3. List of Offset Operators

The subject well was drilled and completed on April 03, 1980 in the Basin Dakota on a 320 acre unit. BP America would like to re-complete the subject well in the Basin Mancos formation, which is within the Basin Mancos Pool on a 200 acre lay down unit, and downhole commingle with the existing Basin Dakota. The Basin Dakota (71599) & the Basin Mancos (97232) pools are pre-approved for DHC per NMOCD Case No. 12520; Order No. R-11567 effective 04/26/2001. Although the interest owners are not identical between these two pools, this same order established approval for subsequent

applications for DHC of production in wellbores within the GCU without notice to the unit interest owners. BP America received DHC approval 02/19/2014 by ✓
order DHC 3856 AZ.

The rules state that the well should be located within 150 feet of the center of the quarter-quarter section and should be within the allowed acreage requirement of a standard proration unit in the Basin Mancos Pool. The existing location and proration unit acreage of 200 acres will not conform to the required footages or acres. A new well would not be economically feasible to drill for just the Basin Mancos formation. The current wellbore is in acceptable condition for the recompletion attempt with no additional work being required. By moving up the hole to the Basin Mancos formation, BP America would be able to minimize environmental impact in obtaining additional production and protection of correlative rights.

BP America Production Company, Burlington Resources Oil & Gas Co. LP, Glacier Park Co., Transrepublic Resources Inc., B. Charles Rogers Gas Ltd., Energen Resources, Las Colinas Minerals, George Umbach, Robert Umbach Cancer Foundation, and Production Gathering Company are offset operators in the Gallegos Canyon Unit, therefore notification of the non-standard proration unit & non-standard location application is required and has been sent by certified mail to BP America Production Company, Burlington Resources Oil & Gas Co. LP, Glacier Park Co., Transrepublic Resources Inc., B. Charles Rogers Gas Ltd., Energen Resources, Las Colinas Minerals, George Umbach, Robert Umbach Cancer Foundation, and Production Gathering Company. If you need any additional information, please feel free to contact me at 281-366-7148.

Sincerely,

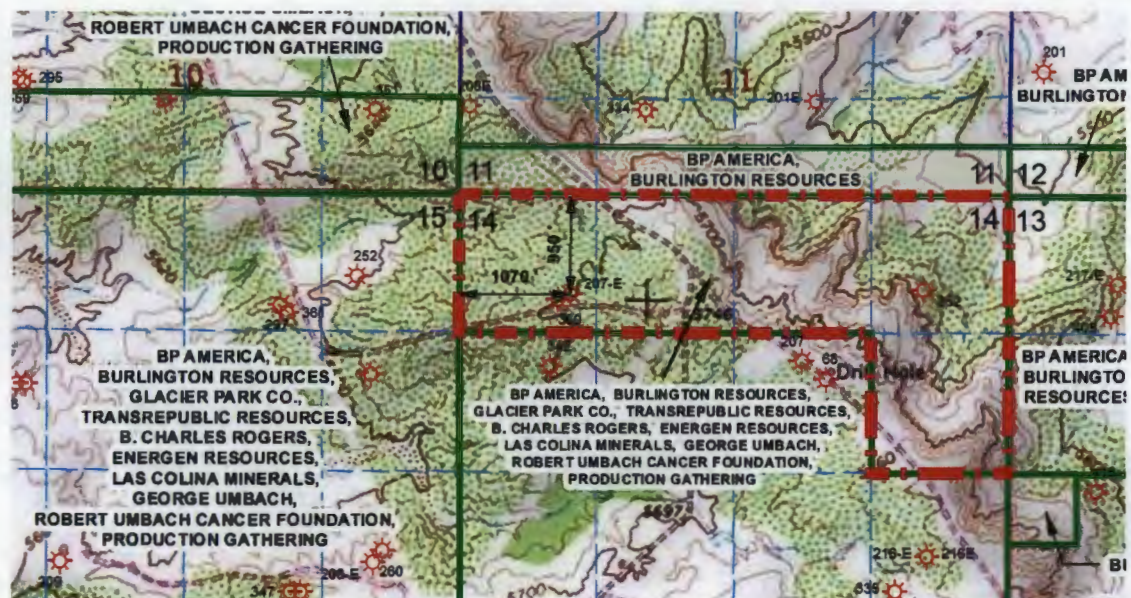

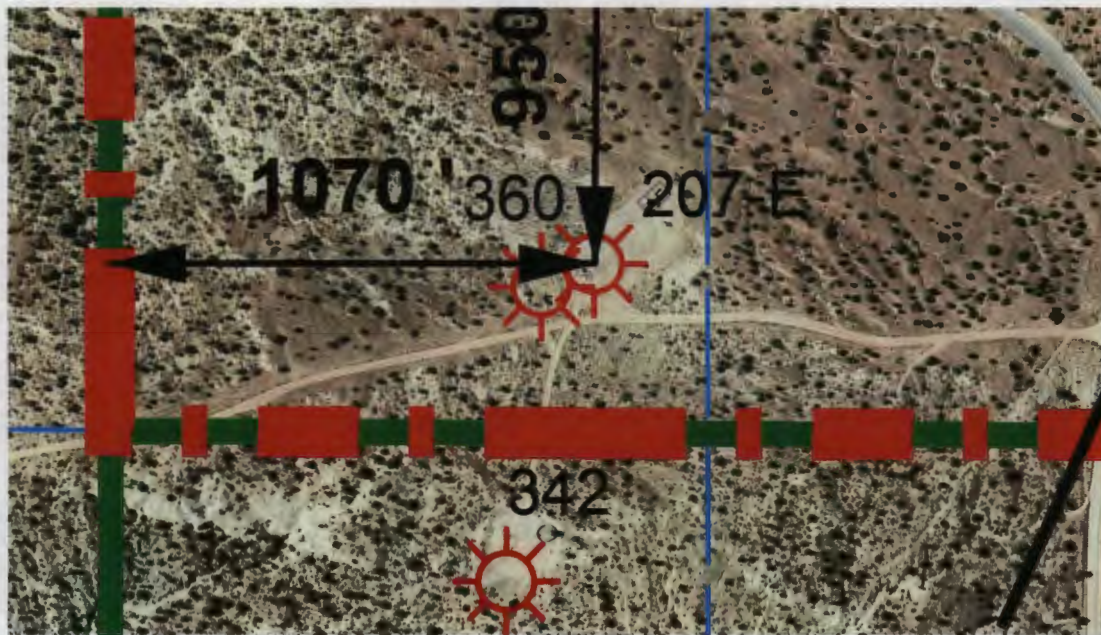

Toya Colvin

RE: GCU 207E Well – Non-Standard Size & Location
NW4 NW4 Section 14-T28N-R12W
San Juan County, NM
API #30-045-23897

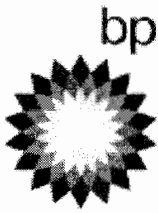

Ms. Colvin:

On behalf of BP America Production Company (“BP”), operator of the Gallegos Canyon Federal Unit, I have reviewed BP’s division order records and other Gallegos Canyon Federal Unit records concerning the Mancos ownership of both inside and offset of the GCU 207E’s 200 acre Basin Mancos Gas Pool non-standard proration unit being the N2 N2, SE4 NE4 of Section 14-T28N-R12W San Juan County, NM. The ownership within this of this 200 acre unit is common as listed below:

BP America Prod. Co = 75% WI
Burlington Resources = 25% WI

Please note that 80 acres of this 200 unit, being the N2NW4, is included in the Gallup “D” Federal Participating Area and does change the final division of interest for this 200 spacing unit to the following:

BP America Prod. Co. =	64.222324%
Burlington Resources =	19.040882%
Glacier Park Co. =	14.959071%
TransRepublic Res. =	0.707186%
B. Charles Rogers Gas =	0.707186%
Energen Resources =	0.214896%
Las Colina Minerals =	0.096548%

RE: GCU 207E Well – Non-Standard Size & Location
NW4 NW4 Section 14-T28N-R12W
San Juan County, NM
API #30-045-23897

Ms. Colvin:

On behalf of BP America Production Company (“BP”), operator of the Gallegos Canyon Federal Unit, I have reviewed BP’s division order records and other Gallegos Canyon Federal Unit records concerning the Mancos ownership of both inside and offset of the GCU 207E’s 200 acre Mancos spacing unit being the N2 N2, SE4 NE4 of Section 14-T28N-R12W San Juan County, NM. The ownership within this of this 200 acre unit is common as listed below:

BP America Prod. Co =	75% WI
Burlington Resources =	25% WI

Please note that 80 acres of this 200 unit, being the N2NW4, is included in the Gallup “D” Federal Participating Area and does change the final division of interest for this 200 spacing unit to the following:

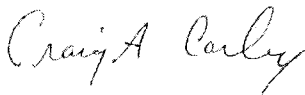

BP America Prod. Co. =	64.222324%
Burlington Resources =	19.040882%
Glacier Park Co. =	14.959071%
TransRepublic Res. =	0.707186%
B. Charles Rogers Gas =	0.707186%
Energen Resources =	0.214896%
Las Colina Minerals =	0.096548%

George William Umbach = 0.019465%
Robert Umbach Cnrc Fndn = 0.019465%
Production Gathering Co. = 0.012977%

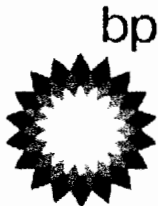

As you know, BP plans to recomplete the GCU 207E well from the Basin Dakota Pool to the Basin Mancos Gas Pool later in 2014. Under current NMOCD Order R-12984, this recompletion is considered to be a Basin Mancos Gas Pool recompletion since the well is located outside the Pinon Gallup Pool (frozen pool) and is to be commingled with the Basin Dakota Pool thus it is not a stand-alone oil well. The Basin Mancos Gas Pool spacing requirements require 320 acres. BP contemplated permitting this Basin Mancos Gas Pool recompletion on a 320 acre spacing unit being the N2 of Section 14-T28N-R12W. The N2 of Section 14 included 120 acres of the Pinon Gallup Pool and 200 acres of Basin Mancos Gas Pool acres. To avoid any downhole commingling (DHC) issues between the Pinon Gallup Pool and Basin Mancos Gas Pool, it was decided that the best course of action was to permit this recompletion as a Basin Mancos Gas Pool. In addition, to avoid any set-back issues and proration unit issues it was decided to permit and recomplete in the Basin Mancos Gas Pool since the wellbore is physically located in the Basin Mancos Gas Pool (outside the Pinon Gallup Pool) and then request approval for a non-standard proration unit and non-standard proration location. The SE4 NE4 has been include in the non-standard proration unit to avoid stranding this 40 acre tract that otherwise would have been stranded in a 160 acre proration unit or two 80 acre proration units. Although this will be a non-standard proration unit, BP would be allowed to drill/recomplete additional offset wells in this non-standard proration unit. Per Order No. R12984, additional offset wells within the spacing unit are allowed, "if no more than two wells are located within any governmental quarter section in a standard or non-standard spacing unit". 

Please contact me at x2761 if you have any questions concerning this topic.

Sincerely,

Craig A. Carley
