Mr. Brad Jones
New Mexico Energy, Minerals, and Natural Resources Department
Oil Conservation Division
1220 St. Francis Drive
Santa Fe, NM 87505

**Subject: Submittal of Proof of Public Notice of a Hydrostatic Test for
WEP III – Segment 6
Chavez County, New Mexico
Permit: HIP-127**

Dear Mr. Jones:

On behalf of Enterprise Products Operating LLC (Enterprise), Kleinfelder West, Inc. (Kleinfelder) is submitting this proof of public notice in support of the hydrostatic discharge permit for Segment 6 of Enterprise's Western Expansion Pipeline III (WEP III).

The Notice of Intent (NOI) to discharge hydrostatic test water from Segment 6 was deemed administratively complete by the New Mexico Energy, Minerals, and Natural Resources Department Oil Conservation Division (NMOCD) on October 23, 2013.

Attached to this letter are the following:

- Photo of public notice posted at the post office in Roswell, NM on October 28, 2013;
- Photo of public notice posted at discharge site, located in the SE/4; SE/4; Section 34, Township 6 South, Range 26 East on October 26, 2013, plus a better photo of the notice taken on October 31, 2013;
- Copy of return receipt postcards for public notice sent to landowner and the adjacent property owners; and
- Copy of the affidavit of publication of the Public Notice in the Roswell Daily Record on October 26, 2013.

Should you have any questions, please contact Eileen Shannon (Kleinfelder) at 505.344.7373 or Jimmy White (Enterprise) at 713.381.1785.

On behalf of Enterprise, I state that the above information is complete and true to the best of my knowledge.

Respectfully submitted,

KLEINFELDER WEST, INC.

Eileen L. Shannon, PG
Project Manager

a decision that led to a two-year quest to find the appropriate organization to operate the website and sponsors to finance its day to day maintenance. New Mexico Resources is a clone of his Massachusetts work.

A soft-spoken man, John's quiet humor lightened a drive from Albuquerque to Moriarty in a mild snowfall that threatened to turn ugly. The driver offered to turn back if the snow were making him nervous. "I'm from Boston," he quipped.

The New Mexico effort eventually led Dr. Buckner to the door of Diane Harrison Ogawa, executive director of PNM Foundation. Thanks to her work, PNM, Don Chalmers Ford, and Wells Fargo Bank put up the seed money to support the New Mexico website. Diane hired recruited Central New Mexico Community College to accept responsibility for operating New Mexico Resources.

"John Buckner invested in the future of New Mexico. He brought the Community Resources

website to our state and in doing so improved access for thousands and thousands of New Mexicans. Without fanfare or need for accolades, his investment connected people in need with the resources available to help them," Ogawa said.

The college now has full responsibility for the website and it continues to evolve under that leadership. It is soon to affiliate with Share New Mexico and will be a central part of that statewide data platform.

During one visit to work on the New Mexico project, John was dining at a Nob Hill restaurant when he was asked, "Here you sit 2,000 miles from Boston working to help New Mexico needy when you could be resting comfortably at home. What drives you?"

Dr. John Buckner answered with a reference to the Luke passage advising to whom much is given, much is expected.

Kind of nice when people actually live by the word, isn't it?

(Ned Cantwell - ncantwell@bajab.com - is a friend and business associate of Dr. John Buckner.)

Dr. K

of your feet, as high as possible. Hold briefly, then lower.

— Overhead press: Stand with your feet slightly apart. Hold a dumbbell in each hand on either side of your shoulders, at shoulder height, with your palms facing forward. Slowly lift the weights straight up until your arms are fully extended. Pause. Slowly lower the dumbbells to shoulder level. I've put additional

strength-training exercises, as well as illustrations of the exercises I've described above, on my website, AskDoctorK.com. You don't need to go to a gym; a small investment in buying exercise mats and weights allows you to do all the exercises at home. (Dr. Komaroff is a physician and professor at Harvard Medical School. To send questions, go to AskDoctorK.com, or write: Ask Doctor K, 10 Shattuck St., Second Floor, Boston, MA 02115.)

St. Mark's Lutheran Church hosts programs every fourth Sunday

Fourth Sunday

St. Mark's Lutheran Church will be celebrating the 25th Anniversary of ELCA in the United States all year by presenting programs on the fourth Sunday of each month. Each program will be a collaboration of the Creative Ministry, Fellowship and Outreach committees to encourage fun, fellowship, community outreach and ecumenical cooperation. The first program was Sept. 22, "In the beginning - Herbs" presented by Rev. Larry Sydow, herbalist and master gardener. It was a fascinating look into the world of herbs and how they have played a part in history and folklore. Upcoming presentations will be a spaghetti supper with live entertainment this Sunday at 5:30 p.m., a melodrama radio play Nov. 24, Advent worship and fellowship with St. Andrew's

Episcopal Church in December and a hobby show with demonstrations Jan. 22, 2014. The rest of the year will include a Southwest Songfest Feb. 23, 2014, a Hawaiian night May 25, 2014, a family fun water event June 22, 2014, and more! All events are open to the public. Please call the church office at 623-0519 for more information.

Day of the Dead

The Gallery is displaying a "Dia De Los Muertos" altar (Day of the Dead) in remembrance of Richard Cibak, Paul Ashby and Michael Van Rae. Three very fine artists

and members of the Roswell Fine Arts League and Gallery. The altar will be on display through Nov. 3. The Gallery is at 107 E. Fifth St., open from 10:30 a.m. - 4:30 p.m. For more information contact Nancy Phillips at 623-3213.

Coat donations

Lawrence Bros. grocery store is sponsoring the third annual coat drive for the Kids Closet at 111 E. Deming St. Please donate clean, gently-used coats for children in need now through November. Coats may be dropped off at the store.

PUBLIC NOTICE

The United States Department of Transportation (USDOT) requires periodic presubmittal tests on all USDOT-regulated pipelines. Enterprise Products Operating LLC (Enterprise) hereby gives notice that the following discharge permit application has been submitted to the New Mexico Oil Conservation Division (NMOCD) in accordance with Subsection B, C, E, and F of 30-2-2108 New Mexico Administrative Code. The local Enterprise facility address is: Enterprise Products Operating LLC, 1031 Andrews Highway, Suite 320, Midland, Texas, 79701.

The purpose of hydrostatic testing is to determine the extent to which potential defects might threaten the pipeline's ability to sustain maximum allowable operating pressure. The pipeline will be filled with water, and then pressurized to a pressure higher than the standard operating pressure for a specified duration of time.

Enterprise has submitted an application for hydrostatic test water discharge that will occur on the pipeline right-of-way and on adjacent private property. The location of the discharge is at latitude 33.748804°, longitude -104.277882° in the SE4 of the SE4 of Section 34, T8S, R28E in Chavez County, New Mexico.

The location of the hydrostatic discharge area is located approximately 26 miles northeast of Roswell, New Mexico. Directions to the discharge area from the intersection of N Main Street (US-285/US-70) and E 2nd Street (Highway 380) in Roswell, New Mexico are: head north on US-285/US-70 EAP toward W 4th St. for 5.2 miles; turn left onto US-70 EAP/US-70 W ramp to Portales/Ruidoso for 0.2 miles; keep right on ramp toward Portales; turn right on US-70 EAP/Highway E and continue for 13.9 miles; turn left onto County Road 140/State Road for 11.2 miles; turn left to stay on County Road 140/State Road for 2.8 miles; turn left onto Cloudcroft Road for 0.2 miles and the site is to the left. The hydrostatic test is scheduled to start on approximately November 13, 2013 with the discharge of the test water scheduled for approximately November 25, 2013.

The new piping, called the Western Expansion Pipeline (WEP) II, Segment 6, will be hydrostatically tested. Up to 500,000 gallons of unused water obtained from the Com well, the Wooten well and/or the Roswell Municipal Water System will be hauled to the site and pumped via hose into the pipeline. Once the test has been completed, and prior to discharge, Enterprise will collect and analyze a sample of the water obtained from the line and section of the pipeline. This sample will be analyzed for water quality. Once the results have been reviewed, the results will be forwarded to the NMOCD. Upon NMOCD concurrence that the discharge water meets the water quality standards of NMAC 20-2-2103, Enterprise will discharge the water in accordance with the approved discharge permit. If discharge to the ground surface is approved, the water will be released from a pipeline and the test water will be discharged to the disposal and discharge system and allowed to flow into ground surface within the ROW and adjacent property (landowner approved).

If test water exceeds discharge requirements, it will be treated using an electro-coagulation process to remove constituents that exceed the discharge requirements. 400-barrel used tanks will temporarily hold the treated water while a post-treatment sample is collected and submitted for laboratory analysis. The analyzed results will be sent to the NMOCD for approval and upon NMOCD concurrence that the treated water meets water quality standards of NMAC 20-2-2103, Enterprise will discharge the water in accordance with the approved discharge permit.

If after this treatment process, water still exceeds discharge requirements, it will be transported from the project site in DOT-approved tanker trucks to an approved water disposal facility.

Limited data on shallow groundwater conditions were available from wells located near the discharge area. In comparison with the closest wells to the site, the regional shallow groundwater likely to be affected by a test or accidental discharge is estimated to be at depths of 175 - 232 feet deep. Total dissolved solids concentrations in groundwater in the region range from 200 to 2,000 parts per million.

The notice of intent and discharge plan outlines how produced water and waste will be properly managed, including handling, storage, and final disposition. The plan also includes procedures for the proper management of tests, accidental discharges, and spills to protect the waters of the State of New Mexico.

For additional information, to be placed on a facility-specific mailing list for future notices, or to submit comments please contact:

Brad Jones, Environmental Engineer
New Mexico Energy, Minerals and Natural Resources Department
Oil Conservation Division
1220 South St. Francis Drive
Santa Fe, NM 87505
Phone: 505-475-3487

The NM Energy, Minerals and Natural Resources Department will accept comments and statements of interest regarding this hydrostatic test and will provide future notices for this pipeline upon request.

AVISO PUBLICO

El Departamento de Transporte de los Estados Unidos (United States Department of Transportation, USDOT) requiere pruebas presubmitidas periódicamente en todas las tuberías reguladas por USDOT. La compañía Enterprise Products Operating LLC (Enterprise) da aviso por esta medio que la siguiente aplicación de permiso de descarga ha sido sometida al New Mexico Oil Conservation Division (NMOCD) de acuerdo con las Sub-Sección B, C, E, y F del Código Administrativo de Nuevo México (New Mexico Administrative Code, NMAC, 20-2-2108). La dirección de correo postal de la compañía Enterprise es: Enterprise Products Operating LLC, 1031 Andrews Highway, Suite 320, Midland, Texas 79701.

El propósito de la prueba hidroestática (prueba con agua) en la tubería es para evaluar el potencial de defectos que puedan afectar la habilidad de la tubería de soportar la máxima presión de operación permitida. La tubería será llenada con agua, y luego presurizada a una presión mayor a la presión de operación estándar por un periodo de tiempo especificado.

Enterprise ha sometido una aplicación para descargar agua de pruebas hidroestáticas que ocurrirá en el área de la servidumbre de paso y sobre la propiedad adyacente. El lugar está a una latitud de 33.748804°, y una longitud de -104.277882° en el SE4 de la SE4 de la Sección 34, T8S, R28E en el Condado de Chavez, Nuevo México.

El lugar de la descarga hidro-estática está aproximadamente a 26 millas al noroeste de Roswell, Nuevo México. Direcciones al sitio de la descarga desde la intersección de N Main Street (US-285/US-70) y E 2nd Street (Highway 380) en Roswell, Nuevo México son las siguientes: viaje norte sobre US-285/US-70 hacia W 4th St. por 5.2 millas; tomar la rampa US-70 EAP/US-70 W ramp to Portales/Ruidoso por 0.2 millas; mantenerse hacia la derecha sobre la rampa hacia Portales; dar vuelta sobre US-70 EAP/Highway E y continuar por 13.9 millas; dar vuelta a la izquierda sobre County Road 140/State Road por 11.2 millas; dar vuelta a la izquierda sobre County Road 140/State Road por 2.8 millas; dar vuelta a la izquierda sobre Cloudcroft Road por 0.2 millas y el sitio está a la izquierda. La prueba hidro-estática será programada para comenzar aproximadamente Noviembre 13, 2013 con la descarga del agua de prueba programada para aproximadamente Noviembre 25, 2013.

La nueva tubería, llamada Western Expansion Pipeline (WEP) II, Segmento 6, será probada hidro-estáticamente. Hasta 500,000 galones de agua (sin presión) será obtenida del Pozo Com, el Pozo Wooten y/o el Sistema de Agua Municipal Roswell, y será transportada al sitio y bombeada con manguera a dentro de la tubería. Una vez que la prueba se haya completado, y antes de la descarga, Enterprise obtendrá y analizará una muestra de agua obtenida del sistema de la sección de tubería. La muestra será analizada para evaluar la calidad del agua. Una vez que se hayan recibido los resultados, los resultados serán enviados a NMOCD. Al NMOCD concuerda que el agua de descarga cumple con las estándares de calidad de agua de NMAC 20-2-2103, Enterprise descargará el agua de acuerdo con el permiso de descarga aprobado. Si descarga en la superficie del suelo es aprobada, el agua será liberada de una tubería y el agua de prueba será descargada al sistema de descarga y permitida fluir sobre la superficie del suelo en el área de la servidumbre de paso y sobre propiedad adyacente (aprobado por el dueño de la propiedad).

Si el agua de prueba excede los requisitos de descarga, será primero tratada usando electro-coagulación para remover componentes que exceden los requisitos de descarga. 400-bariles usados como tanque de almacenamiento temporalmente guardarán el agua tratada hasta que los resultados de muestra de tratamiento sean obtenidos y sometidos para análisis de laboratorio. Los resultados analizados serán enviados a NMOCD para ser aprobados y cuando NMOCD concuerda que el agua de descarga tiene las estándares de calidad de agua de NMAC 20-2-2103, Enterprise descargará el agua de acuerdo con el permiso de descarga aprobado.

Si después de este proceso de tratamiento, agua todavía excede los requisitos de descarga, será transportada del sitio del proyecto en camiones-pipa aprobados por el departamento de transporte por un tanque-trasporte aprobado por NMOCD a un lugar aprobado por NMOCD para disposición del agua de prueba.

Datos limitados acerca del nivel freático más cercano a la superficie del suelo estaban disponibles de pozos localizados cerca del sitio de descarga. En una comparación a los pozos más cercanos al sitio, el nivel freático regional que podría ser afectado por una fuga o descarga accidental es estimado a ser a profundidades de 175 - 232 pies debajo de la superficie. Concentración total de sólidos disueltos en el nivel freático en la región varían de 200 a 2,000 partes por millón.

El aviso del plan de liberación de descarga resume como el agua que se produce será manejada, incluyendo su almacenamiento y el proceso final para disposición del agua. El plan también incluye procesos para el manejo apropiado de fugas, descargas accidentales, y desechos para proteger las aguas del Estado de Nuevo México (New Mexico).

Para información adicional, por favor en una lista de correo específica a este proyecto para avisos futuros, o para someter comentarios, favor de contactar:

Brad Jones, Environmental Engineer
New Mexico Energy, Minerals and Natural Resources Department
Oil Conservation Division
1220 South St. Francis Drive
Santa Fe, NM 87505
Teléfono: 505-475-3487

El Departamento de Petróleo, Energía, Minería y Recursos Naturales (NM Energy, Minerals and Natural Resources Department) aceptará comentarios al respecto de esta prueba hidro-estática y proporcionará avisos futuros para esta tubería en base a petición.

NOTICE OF PUBLICATION

STATE OF NEW MEXICO
ENERGY, MINERALS AND
NATURAL RESOURCES
DEPARTMENT
OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Water Quality Control Commission Regulations (20.6.2 NMAC), the following discharge permit application(s) has been submitted to the Director of the New Mexico Oil Conservation Division ("OCD"), 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3440:

(HIP-127) Enterprise Products Operating, LLC (Enterprise), 1031 Andrews Highway, Suite 320, Midland, Texas, 79701, has submitted an application for an Individual Hydrostatic Test Discharge Permit to the New Mexico Energy, Minerals and Natural Resources Department, Oil Conservation Division to hydrostatic test a new 16-inch diameter natural gas gathering system transmission pipeline approximately 14.7 miles (77,496 feet) long, located approximately 28 miles northeast of Roswell, New Mexico. Enterprise will obtain water for the hydrostatic test from the Roswell Municipal Water System (NM 3520203), the Corn well (POD RA 08748/08749), and/or the Wooten well (POD RA 03127). Approximately 500,000 gallons of wastewater will be generated from the hydrostatic test, and tested prior to discharge or disposal. The discharge/ collection/retention site is within Enterprise's pipeline easement right-of-way and adjacent private property, located within Unit P of Section 34, Township 6 South, Range 26 East, NMPM, Chaves County, New Mexico. To reach the discharge location from Roswell, New Mexico: from the intersection of Main Street (US-285 /US-70) and E. 2nd Street (Hwy 380) head north on US-285 N/US-70 E/N toward W. 4th Street for 5.2 miles; take the US-70 E/US-70 W ramp to Portales/Ruidoso for 0.2 miles; keep right on ramp toward Portales; turn to right onto US-70 E (Clovis Highway E) and continue for 13.9 miles; turn left onto County Road 1 (Aztec Road) for 11.2 miles; turn left to stay on County Road 1 (Aztec Road) for 2.8 miles; turn left onto Cloudcroft Road for 0.2 miles; and the discharge area is on the left. Due to the pipelines being new construction and the source water to be used during the testing, the discharge water is expected to meet Water Quality Control Commission (WQCC) water quality standards of 20.6.2.3103 NMAC. If WQCC water quality standards are not met, the test wastewater will be treated and temporarily stored in frac tanks for sampling and testing. If after treatment the WQCC water quality standards are not met, the test wastewater will be transferred to trucks and hauled to an approved disposal facility. The shallowest groundwater most likely to be affected by an accidental discharge is at a depth of approximately 175 to 232 feet below ground surface with a total dissolved solids concentration of approximately 200 to 2,000 mg/l. The discharge plan consists of a description of the method and location for collection, testing and retention of fluids and solids, how products and wastes will be properly handled, stored, and disposed of, including how spills, leaks, and other accidental discharges to the surface will be managed in order

OCD has determined that the application is administratively complete and has prepared a draft permit. OCD will accept comments and statements of interest regarding this application and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments or requesting to be on a facility-specific mailing list for future notices may contact the Environmental Bureau Chief of the Oil Conservation Division at the address given above. The administrative completeness determination and draft permit may be viewed at the above address between 8:00 a.m. and 4:00 p.m. Monday through Friday, or may also be viewed at the OCD web site <http://www.emnrd.state.nm.us/OCD/env-draftpublicetc.html>.

Persons interested in obtaining a copy of the application and draft permit may contact the OCD at the address given above. Prior to ruling on any proposed discharge permit or major modification, the Director shall allow a period of at least thirty (30) days after the date of publication of this notice, during which interested persons may submit comments or request that OCD hold a public hearing. Requests for a public hearing shall set forth the reasons why a hearing should be held. A hearing will be held if the Director determines that there is significant public interest.

If no public hearing is held, the Director will approve or disapprove the proposed permit based on information available, including all comments received. If a public hearing is held, the Director will approve or disapprove the proposed permit based on information in the permit application and information submitted at the hearing.

Re: Hydrostatic Test Discharge Permit DRAFT
Permit: HIP-127
Enterprise Products Operating, LLC
Western Expansion Pipeline III, Segment 6
Locations: Unit P of Section 34, Township 6 South, Range 26 East, NMPM,
Chaves County, New Mexico

Dear Ms. Nolan:

The Oil Conservation Division (OCD) has received Enterprise Products Operating LLC's (Enterprise) notice intent, dated October 17, 2013 and received by OCD on October 23, 2013, for authorization to discharge approximately 500,000 gallons of wastewater generated from a hydrostatic test of a new 16-inch diameter natural gas gathering system transmission pipeline approximately 14.7 miles (77,496 feet) long, located approximately 28 miles northeast of Roswell, New Mexico. The proposed discharge/collection /retention location is within Enterprise's pipeline easement right-of-way and adjacent private property, located within Unit P of Section 34, Township 6 South, Range 26 East, NMPM, Chaves County, New Mexico. OCD acknowledges the receipt of the filing fee (\$100.00) and the permit fee (\$600.00) for the permit from a submittal dated October 17, 2013.

Based on the information provided in the request, the hydrostatic test water discharge is hereby approved with the following understandings and conditions:

1. Enterprise shall comply with all applicable requirements of the New Mexico Water Quality Control Commission Regulations (20.6.2 NMAC), the Oil and Gas Act (Chapter 70, Article 2 NMSA 1978), and all conditions specified in this approval and shall operate and close the project in accordance with the October 17, 2013 request;
2. Enterprise will be testing a new 16-inch diameter natural gas gathering system transmission pipeline approximately 14.7 miles (77,496 feet) long, located approximately 28 miles northeast of Roswell, New Mexico;

3. Enterprise will acquire the hydrostatic test water from the Roswell Municipal Water System (NM 3520203), the Corn well (POD RA08748/08749), and/or the Wooten well (POD RA 03127);
4. Enterprise will generate approximately 500,000 gallons of hydrostatic test wastewater from the test event. The hydrostatic wastewater will remain in the pipeline while being sampled and awaiting test results from a certified laboratory;
5. Enterprise shall analyze all samples of wastewater generated from the hydrostatic test to demonstrate the results do not exceed the standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC or background, whichever is greater, except for Combined Radium 226 & Radium 228 due to pre-test results;
6. Enterprise shall submit the test results via email or fax to the OCD for review and subsequent approval or disapproval for the test wastewater to be discharged;
7. If the final discharge of the wastewater is approved by the OCD, Enterprise will discharge the wastewater into a dewatering structure, constructed of non-woven geotextile and hay bales, to control erosion and contain the discharge is within Enterprise's pipeline easement right-of-way and adjacent private property, located within Unit P of Section 34, Township 6 South, Range 26 East, NMPM, Chaves County, New Mexico;
8. If final discharge of the wastewater is approved, no hydrostatic wastewater generated will be discharged to groundwater;
9. If final discharge of the wastewater is approved, no discharge shall occur:
 - a. within 200 feet of a watercourse, lakebed, sinkhole or playa lake;
 - b. within an existing wellhead protection area;
 - c. within, or within 500 feet of a wetland;
 - d. within an area overlaying a subsurface mine; or
 - e. within 500 feet from the nearest permanent residence, school, hospital, institution or church;
10. If the wastewater exceeds one the standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC or background, whichever is greater, Enterprise will use an electro-coagulation cleaning process and a separate filtration system to treat the wastewater, in accordance with Appendix G of the October 17, 2013 request.
11. Enterprise will slowly discharge the wastewater after treatment, via a system of flexible hoses and temporary piping, into thirty (30) 16,800 gallon frac tanks for temporary storage within Enterprise's pipeline easement right-of-way, in order to obtain samples and await test results from a certified laboratory;
12. Enterprise shall ensure that the temporary storage tanks shall have impermeable secondary containment (e.g., liners - geomembrane and berms – hay bales or a secondary containment tank), which will contain a volume of at least one-third greater than the total

volume of the largest tank or one-third greater than the total volume of all tanks that are inter-connected, whichever is greater;

13. If the final discharge of the wastewater is not approved by the OCD after treatment, Enterprise will transfer the wastewater, via a system of flexible hoses and pump, from the pipeline into water trucks and hauled by Dawn Trucking, Co. (C-133-31), M&R Trucking, Inc. (C-133-399), Three Rivers Trucking, Inc. (C-133-335), or Triple S Trucking, Co. (C-133-372) for injection and disposal at Basin Disposal, Inc.'s Class II injection well (API 30-045-26862/IPI-149-0), Agua Moss LLC's Non-Hazardous Class I injection well (UICI-005), or disposal at Gandy Marley Inc. (NM1-019);
14. Enterprise will ensure the transfer any spent filters and/or solids generated from the treatment of the hydrostatic test wastewater via an OCD approved C-133 water hauler to Gandy Marley Inc. (NM1-019), Lea Land Inc. (NM1-024), or R360 Permian Basin, LLC (NM1-006/Order R-9166) for disposal.
15. Enterprise will have personnel on-site to oversee and control the transfer and utilize collection pans placed below the collection points to prevent an unauthorized release;
16. Enterprise will not be analyzing the hydrostatic test wastewater prior to off-site disposal because of the following: the wastewater has been demonstrated to be RCRA exempt waste and the proposal is to transfer the wastewater to Basin Disposal, Inc.'s Class II injection well (API 30-045-26862/IPI-149-0) or Agua Moss LLC's Non-Hazardous Class I injection well (UICI-005) for injection and disposal, or disposal at Gandy Marley Inc. (NM1-019);
17. Enterprise will ensure the transfer the hydrostatic test wastewater via an OCD approved C-133 water hauler to Basin Disposal, Inc.'s Class II injection well (API 30-045-26862/IPI-149-0) or Agua Moss LLC's Non-Hazardous Class I injection well (UICI-005) for injection and disposal, or disposal at Gandy Marley Inc. (NM1-019);
18. Enterprise shall ensure that all waste (solids and/or liquids) are properly manifested and that a copy of the completed Form C-138 manifest accompanies the hauler and is provided to the OCD approved disposal facility operator upon delivery;
19. Enterprise shall remove all hydrostatic test wastewater from the collection/retention location within ten (10) calendar days of the completion of the hydrostatic test or treatment;
20. Enterprise shall restore any surface area impacted or disturb from the approved activities;
21. Enterprise shall implement best management practices to prevent unauthorized releases during the transfer/collection activities;
22. Enterprise shall ensure that the discharge/transfer/collection activities do not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC (the New Mexico Water Quality Control Commission Regulations);

23. Enterprise must properly notify the landowner(s) of the proposed discharge/collection location of the approved activities prior to the hydrostatic test event; and
24. Enterprise shall report all unauthorized discharges, spills, leaks and releases of hydrostatic test water and conduct corrective action pursuant to OCD Rule 29 (19.15.29 NMAC).

It is understood that the hydrostatic test will begin approximately November 15, 2013. This permit will expire within 120 calendar days of its issue date. This permit may be revoked or suspended for violation of any applicable provisions and/or conditions.

Please be advised that approval of this request does not relieve Enterprise of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve Enterprise of its responsibility to comply with any other applicable governmental authority's rules and regulations.

If there are any questions regarding this matter, please do not hesitate to contact me at (505) 476-3487 or brad.a.jones@state.nm.us.

Sincerely,

Brad A. Jones
Environmental Engineer
