Dear Ms. Bailey:

On behalf of Logos Resources LLC ("Logos") and pursuant to Division Rules 19.15.15.11.B(2) (a) and (b), 19.15.15.13 and the applicable rules governing the acreage and well location requirements for the Basin-Mancos Gas Pool (97232; Order No. R-12984), we request administrative approval for a 160 acre $\pm$ non-standard oil spacing and proration unit and horizontal drilling project area comprised of the S/2 N/2 of Section 4, Township 23 North, Range 8 West, NMPM for the Heros No. 2-H well to be drilled at the surface and bottom hole locations indicated above.

Logos seeks an exception from the applicable acreage dedication and well location rules for the following reasons: Order No. R-12984 established special

pool rules for the Basin-Mancos Pool as a gas pool with 320 acre spacing units and well location setbacks of 660'. The special pool rules also provide that oil wells located within two miles of certain Gallup oil pools or associated pools identified in Order No. R-12984 are to be drilled and spaced in accordance with the rules applicable to those pools. The spacing unit proposed in this case is located in close proximity to the Nageezi - Gallup Oil Pool (47540) and the well is expected to produce oil from a correlative stratum. The current rules for that pool reflect statewide rules and provide that wells shall be located no closer than 330' to the boundary of a unit, with 40-acre units dedicated to the wells. However, this pool is not among the pools specified in Order No. R-12984 and therefore, the Division has previously advised that the rules for the pool may not be extended to the proposed spacing unit and well location. Operator experience has established that oil wells located in accordance with the setbacks for gas wells won't efficiently recover all the reserves in the unit and for all these reasons, this application for exception is made necessary.

In this case the well's Completed Interval will be no closer than 330' to the outer boundaries of the S/2 N/2 unit and will be located entirely within the Producing Area for the Project Area. The well otherwise complies with statewide locational rules applicable to oil wells. The non-standard spacing unit and well location are also consistent with the established development pattern for horizontal Mancos oil wells in the area. In this regard, please note that the Division has previously approved non-standard location and a non-standard proration unit for a Basin-Mancos vertical oil well drilled by Logos in Unit P of Section 4. (See Orders NSL-6753 and NSP-1961) and three additional vertical wells soon to be drilled in Unit M (NSL-7047 and NSP 1978), Unit N (NSL 7044 and NSP 1977), and Unit O (NSL 7043 and NSP 1976), all in Section 4. The C-102 plat and area satellite map showing the S/2 N/2 Project Area, Producing Area and the proposed location for the Heros Well No. 2-H are attached as Exhibits A and B.

In accordance with Division Rules 19.15.4.12 A(2) and (3) notification is being provided to those offset interest owners or operators in adjoining Sections 3 and 5 T23N R8W reflected on Exhibit C. Logos Resources LLC is the operator of the adjoining units in Section 4 T23N R8W. Logos owns and operates all of Section 4 under a single federal lease (NMNM-109398). Royalty and overriding royalty interests in Section 4 are uniform. The Bureau of Land Management is being notified of this application, but no further notification is indicated under the Division's rules.

The Division's Administrative Application Checklist is enclosed.
