STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT

Oil Conservation Division 1220 South St. Francis Dr. Santa Fe, New Mexico 87505

FORM C-108 Revised June 10, 2003

APPLICATION FOR AUTHORIZATION TO INJECT

I.	PURPOSE: Secondary Recovery Pressure Maintenance XXX Disposal Storage Application qualifies for administrative approval? Yes No
11.	OPERATOR: BASIC ENERGY SERVICES, LP
	ADDRESS: P. O. BOX 1175, ARTESIA NM 88211
	CONTACT PARTY: BRIAN WOOD (PERMITS WEST, INC.) PHONE: 505 466-8120
111.	WELL DATA: Complete the data required on the reverse side of this form for each well proposed for injection. Additional sheets may be attached if necessary.
IV.	Is this an expansion of an existing project? Yes XXX No If yes, give the Division order number authorizing the project:
V.	Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
Vl.	Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
VII.	Attach data on the proposed operation, including:
	1. Proposed average and maximum daily rate and volume of fluids to be injected; 2. Whether the system is open or closed; 3. Proposed average and maximum injection pressure; 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and, 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
*VIII.	Attach appropriate geologic data on the injection zone including appropriate lithologic detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.
IX.	Describe the proposed stimulation program, if any.
*X.	Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted).
*XI.	Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
XII.	Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.
XIII.	Applicants must complete the "Proof of Notice" section on the reverse side of this form.
XIV.	Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
	NAME: BRIAN WOOD TITLE: CONSULTANT
	SIGNATURE: DATE: MARCH 17, 2014
*	E-MAIL ADDRESS: brian@permitswest.com If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstances of the earlier submittal:

III. WELL DATA

- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
 - (1) Lease name; Well No.; Location by Section, Township and Range; and footage location within the section.
 - (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
 - (3) A description of the tubing to be used including its size, lining material, and setting depth.
 - (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.
 - (1) The name of the injection formation and, if applicable, the field or pool name.
 - (2) The injection interval and whether it is perforated or open-hole.
 - (3) State if the well was drilled for injection or, if not, the original purpose of the well.
 - (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
 - (5) Give the depth to and the name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and,
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, New Mexico 87505, within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

PAGE 1

30-025-32003

- I. Goal is to re-enter a 13,612' deep plugged and abandoned (in 1994) dry hole and convert it to a saltwater disposal well. Well was plugged after unsuccessful attempts to complete it in the Morrow, Strawn, and Bone Spring. Proposed disposal interval will be 5,610' 7,463' in the SWD; Delaware (96100).
- II. Operator: Basic Energy Services, LP (OGRID #246368)

Operator phone number: (575) 746-2072

Operator address: P. O. Box 1375, Artesia NM 88211 Contact for Application: Brian Wood (Permits West, Inc.)

Phone: (505) 466-8120

- III. A. (1) Lease: New Mexico State Land Office lease VO76600000 Lease Size: 320 acres (see Exhibit A for map and C-102) Closest Lease Line: 660' Lease Area: S2 Section 32, T. 19 S., R. 32 E.
 - A. (2) Surface casing (13-3/8", 54.5#, K-55, ST&C) was set in 1993 at 504' in a 17-1/2" hole and cemented to the surface with 750 sacks Class C. Circulated 423 sacks to the pit.

Intermediate casing (8-5/8", 32#, K-55, LT & C) was set at 5,255' in a 12-1/4" hole. A DV tool was set at 3,514. Casing was cemented to the surface with 3,300 sacks. Circulated 630 sacks to the surface.

Production casing (5-1/2", 17#, N-80 & S-95, L T & C LSS) was set at 13,610' in a 7-7/8" hole and cemented to 9,000' (calculated) with \$\mu\$ 950 sacks. Casing was subsequently cut at 8,486' and 7,926' during plugging operations, but would not come free. It was ultimately cut at 7,486' and pulled out of the hole.

(A liner (7", 26#, J-55, SJ-2 flush joint) will be run from 5,000' to 5,600' and cemented.)

30-025-32003

Mitchell Energy plugged the well in May 1994 without selling any oil or gas. Seven cement plugs and one CIBP were set.

- A. (3) Tubing will be 3.5" J-55 interior plastic coated. Setting depth will be approximately 5,550'. (Disposal interval will be 5,610' to 7,463'.)
- A. (4) A 3.5" x 7" Arrow set plastic coated packer will be set at approximately 5,550' (60' above the open hole top of 5,610').
- B. (1) Disposal zone will be the SWD; Delaware (96100).
- B. (2) Disposal interval will be 5,610' to 7,463'. Top of the closest plug below is 7,463'.
- B. (3) Well was drilled as a Morrow gas well. It was plugged 9 months after TD was reached because it was uneconomical to produce in the Morrow, Strawn, or Bone Spring.
- B. (4) Disposal well will be completed open hole from 5,610' to 7,463'. Well is currently open hole from 5,255' to 7,463'. Morrow was perforated from 12,735' to 13,492'. Strawn was perforated from 12,202' to 12,320'. Bone Spring was perforated from 9,758' to 9,765'.
 - All three tested zones are isolated below a CIBP at 9,700' topped with 5 sacks cement. Three plugs are above the CIBP, and below the bottom of the open hole. A 25 sack plug was set at 8536', a 30 sack plug was set at 8012', and a 30 sack plug was set at 7545'.
- B. (5) Closest (1,980' east) Delaware pool is the Lea; Delaware, Northeast (37584). Closest (3,974' southeast) historic Delaware production was in the, now plugged and abandoned, 30-025-33325. Closest (4,545' east) current production is in 30-025-34119. See Exhibit B for Delaware pool boundary and Delaware wells.

BASIC ENERGY SERVICES, LP REDHAWK 32 STATE 2 1980' FSL & 1980' FEL SEC. 32, T. 19 S., R. 34 E. LEA COUNTY, NEW MEXICO PAGE 3

30-025-32003

There are no producing zones above the Delaware within the area of review. Two producing zones are below the Delaware within the area of review. They are the Bone Spring (8,284') and Morrow (12,735').

- IV. This is not an expansion of an existing injection project. It is disposal only.
- V. Exhibit C shows the four existing wells (1 saltwater disposal + 1 gas + 2 oil) within a half-mile radius. No plugged and abandoned wells are within a half-mile. Exhibit D shows all 120 existing wells (71 oil or gas wells + 43 P & A wells + 5 saltwater disposal wells + 1 water well) within a two-mile radius.

Exhibit E shows all leases and lessors (only State and BLM) within a half-mile radius. Exhibit F shows all leases and lessors (only State, fee, and BLM) within a two-mile radius. Details on the leases within a half-mile radius are:

T. 19 S., R. 34 E.	Lessor	Lease Number	Lessee
N2 Sec. 32	NMSLO	VO-7659-0001	Mewbourne

3002540040	Quail Ridge 32 State 3	Cimarex	0	32	10843	Apache Ridge; Bone Spring	1682
3002540041	Quail Ridge 32 State 4	Cimarex	0	32	8830	Apache Ridge; Bone Spring	1924
3002531888	Red Hawk 32 State 1	Basic	S	32	13660	SWD; Delaware	2490
3002530993	Chaparral 33 Federal 1	Pennzenergy	P & A	33	10300	Quail Ridge; Bone Spring, South	2952

- VII. 1. Average injection rate will be ≈3,500 bwpd. Maximum injection rate will be 5,000 bwpd.
 - 2. System will be open and closed. Water will be trucked to the Redhawk 32 State 1 (SWD-1408) battery and then piped to the Redhawk 32 State 2.
 - Average injection pressure will be ≈1,100 psi
 Maximum injection pressure will be 1,122 psi (= 0.2 psi/foot x 5,610'
 (top of open hole interval)).
 - 4. There have been no reports of problems disposing into the three closest active Delaware; SWD wells. At least 190,600 barrels have been disposed in 3 months in Basic's new Redhawk 32 State 1 (30-025-31888) that is 2,490' west. At least 191,749 barrels have been disposed in the Ling Federal 1 (30-025-28064) that is 5,492' west. At least 1,097,602 barrels have been disposed in the Gem 8705 JV-P 3 (30-025-30977) that is 17,219' southwest.

Main source of the disposal water will be produced water from Bone Spring wells. For example, of the 1,013,772 barrels of water produced in 2013 in 19s-34e, 57% (5878,011 barrels) was produced from the Bone Spring. However, water is also produced from the Yates, Seven Rivers, Queen, Grayburg, San Andres, Wolfcamp, Strawn, Lower Pennsylvanian, Morrow, and Delaware just in 19s-34e. A summary of water analyses is in Exhibit H.

30-025-32003

5. Closest (1,980' east) Delaware pool is the Lea; Delaware, Northeast (37584). Closest (3,974' southeast) historic Delaware production was in the, now plugged and abandoned, 30-025-33325. Closest (4,545' east) current production is in 30-025-34119. See Exhibit B for Delaware pool boundary and Delaware wells.

VIII. The Delaware (2,673' thick in this well) is fine-grained sandstone with some intervals of anhydrite, limestone, dolomite, and shale. There are rapid facies chnages.

Closest possible underground sources of drinking water above the proposed disposal interval are the Quaternary, Chinle, Santa Rosa, and Dewey Lake at and immediately below the surface. Bottom of the Dewey Lake lays on the anhydrite.

One water well (L 07213 in NWSE Section 31) is within a 1,522-meter (= 4,992') radius according to the Office of the State Engineer (Exhibit I). It is dry according to the landowner, Larry Hughes. Another dry water well was found in the SESE Section 31. A dry windmill was found just beyond the mile radius in the SWNE Section 31. The latter two wells are not in the State Engineer's database. Pictures and a map showing the 3, now dry, water wells are in Exhibit I.

No underground source of drinking water is below the proposed Delaware disposal interval.

Formation tops are:

Quaternary = 0'
Anhydrite = 1,512'
Yates = 3,745'
Seven Rivers = 3,870'
Queen = 4,637'
Delaware = 5,610'
Bone Spring = 8,284'
Wolfcamp = 11,217'
Strawn = 12,199'
Atoka = 12,499'
Morrow = 12,735'
PBTD = 13,030'
Total Depth: 13,612'

BASIC ENERGY SERVICES, LP REDHAWK 32 STATE 2 1980' FSL & 1980' FEL SEC. 32, T. 19 S., R. 34 E. LEA COUNTY, NEW MEXICO PAGE 6

30-025-32003

There will be 4,098' of vertical separation and >1,000' anhydrite interval between the bottom of the only likely underground water source (Dewey Lake) and the top of the Delaware. The Ogallala is not present. It is more than 25 miles northeast.

A minimum of 1,479,951 barrels of produced water has been disposed into the Delaware at three saltwater disposal wells within a 3.26 mile radius.

- IX. The well will be stimulated with acid to clean out scale or fill.
- X. GR/DLL/MSFL/BHC Sonic, GR/CNL/LDT, and GR/CBL/CCL logs have been run and are on file with NMOCD.
- XI. Based on a February 10, 2014 field inspection and a review of the State Engineer's records, two water wells are within a one-mile radius. Both are now dry (See Exhibit I).
- XII. Basic Energy Services, LP is not aware of any geologic or engineering data that may indicate the Delaware is in hydrologic connection with any underground sources of water. There are 175 active Delaware saltwater disposal wells and 88 active Delaware injection wells in New Mexico. Closest fault (Guadalupe) is more than 90 miles southwest (Exhibit J).
- XIII. Notice (this application) has been sent (Exhibit K) to the surface owner (NM State Land Office), lessors (NM State Land Office & BLM), lessees (Cimarex, Edward R. Hudson Trust 1, Edward R. Hudson Trust 2, Edward R. Hudson Trust 4, Francis H. Hudson, Hyde Oil & Gas, Delmar Hudson Lewis Living Trust, Lindy's Living Trust, Magnum Hunter, Mewbourne, Lee Wiley Moncrief Trust, Michael J. Moncrief, Richard B. Moncrief trust, W. A. Moncrief Jr., Read & Stevens, Zorro Partners Ltd.) and all leasehold operators or other affected persons within a halfmile. A legal ad (see Exhibit L) was published on February 21, 2014.

Will Jones NM Oil Conservation Division 1220 S. S. Francis Dr. Santa Fe, NM 87505

Dear Will,

I am replying to your comments on Basic Energy's Red Hawk 32 State 1 SWD (30-025-31888) application.

- 1. A table listing the source of the water samples is attached. (The source of the Diamante sample could not be determined. Please disregard that sample.)
- 2. Depth to bottom potential fresh water is 1,465' (Dewey Lake Formation). See attached report from Balleau Groundwater.
- 3. Affirmative statement from geologist David Powers is attached.
- 4. A complete copy of the C-108 application was sent to all affected persons on October 2, 2012. A copy of the green card signed by the State Land Office on October 5, 2012 is attached.
- 5. A map is attached showing the half-mile area of review and all wells in or nearby. Wells have been labeled on the map. Only one well (Quail Ridge 32 State 2) penetrated the Lower Delaware and is within 2,640'.
- 6. Mewbourne received the application package on October 3, 2012 and has not replied to Basic to date.
- 7. Formation tops are provided in the attached letter from Dennis Powers, Consulting Geologist.
- 8. While researching topic 5., it was discovered that there were 3 water wells within a mile. All three are now dry according to the landowner, Mr. Hughes. See attached photographs of each.
- 9. The north well was a windmill that is not in the State Engineer's database. It is now dry, rods removed, and water is piped to the stock tanks.
- 10. No evidence could be found of the middle well. According to the State Engineer, it was drilled to 160'. According to Mr. Hughes, it went dry and was plugged. Water is now piped to the stock tank.
- 11. The south well is not in the State Engineer's database. It was found and is plugged and abandoned.
