NATURE OF RELEASE

Type of Release: Produced water and condensate	Volume of Release: 95 bbls of produced water and less than 1 bbl condensate.	Volume Recovered: None
Source of Release: 300 bbl produced water tank	Date and Hour of Occurrence 6/4/11, between 5 pm and 11 pm	Date and Hour of Discovery 6/5/11 9:00 a.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher	
By Whom? Tony Savoie	Date and Hour 6/5/11 7:30 p.m.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

RECEIVED

JUN 16 2011

Describe Cause of Problem and Remedial Action Taken.* The 300 bbl water tank was struck by lightning the evening of 6/4/11, the pumper discovered it the next morning, all of the water had soaked into the ground inside the earthen containment. There was no evidence of fire anywhere at the facility. The well was shut in the morning of 6/5/11.

Describe Area Affected and Cleanup Action Taken.* Approximately 2100 sq. ft. inside the containment area and approximately 300 sq. ft. outside the containment area on the caliche well pad. Samples were collected a 2 ft. intervals to a depth of 12 ft. below ground surface on 6/8/11 and analyzed for TPH and Chlorides. It appears the vertical extent did not exceed 3 ft. below ground surface. A copy of the analytical results are attached. We plan on excavating the affected soil inside the containment area on 6/20/11. The soil remediation will follow the NMOCD recommended guidelines for the remediation of leaks and spills.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
