<u>Description</u>	<u>Acres</u>	<u>Pool</u>	<u>Pool Code</u>
S/2 of Section 15	320	Basin Mancos, Gas Pool	97232

Reference is made to your application received on January 10, 2018.

You have requested to drill and produce this horizontal well at an unorthodox gas well location described above in the referenced pool or formation. This location is governed by the Special Rules for the Basin Mancos Gas Pool, which provide for 320-acre units with wells to be located at least 660 feet from outer unit boundaries.

The well's completed interval at 330 feet, instead of standard will cause an encroachment toward the following locations:

Section 14, encroachment to the East  
Section 23, diagonal encroachment to the South East  
Section 22, southern encroachment to the South  
Section 21, diagonal encroachment to the South West  
Section 16, encroachment to the West

It is understood that you have given due notice of this application to all operators or owners who are "affected persons," as defined in Rule 19.15.4.12 A (2) NMAC, in all adjoining units towards which the proposed location encroaches.

It is our understanding that the Applicant is seeking this location to cooperate with the surface management agency of the BLM to minimize surface impact while allowing efficient development of the spacing unit.

Your application has been duly filed under the provisions of Division Rules 19.15.15.13 NMAC and 19.15.4.12.A (2) NMAC.

Pursuant to the authority conferred by Division Rule 19.15.15.13 (B) NMAC, the above-described unorthodox location is hereby approved.

The above approvals are subject to your following all other applicable Division rules.

Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.
