Re: Application of Devon Energy Production, LP, for administrative approval of an unorthodox well location for its Mr Potato Head 11-14 Fed Com 713H Well in the E/2 of Sections 11 and 14, Township 24 South, Range 29 East, N.M.P.M., Eddy County, New Mexico.

Dear Ms. Sandoval:

Devon Energy Production, LP ("Devon") (OGRID No. 6137) seeks administrative approval of an unorthodox well location for its **Mr Potato Head 11-14 Fed Com 713H Well** (API No. 30-025-pending) to be completed within the Purple Sage Wolfcamp Pool (98220) underlying the E/2 of Sections 11 and 14, Township 24 South, Range 29 East, N.M.P.M., Eddy County, New Mexico. This well will be drilled from a surface location 300 feet from the north line and 636 feet from the east line (Unit A) of Section 11 to a bottom hole location 20 feet from the south line and 990 feet from the east line (Unit P) of Section 14. The upper most perforation will be located 120 feet from the north line and 990 feet from the east line (Unit A) of Section 11 and the lower most perforation will be 120 feet from the south line and 990 feet from the east line (Unit P) of Section 14.

Pursuant to Division Order R-14262, this acreage is governed by the Special Rules for the Purple Sage-Wolfcamp Gas Pool which provide for wells in the Wolfcamp formation in Eddy County to be located no closer than 330 feet to the outer boundary of the spacing unit. The completed interval for the **Mr Potato Head 11-14 Fed Com 713H Well** will be unorthodox because it is closer than 330 feet to the northern and southern boundaries of the project area. Approval of the unorthodox completed interval will allow Devon to use its preferred well spacing plan for horizontal wells in this area and thereby prevent waste.

Exhibit A is a Well Location and Acreage Dedication Plat (Form C-102), which shows that the completed interval of the proposed **Mr Potato Head 11-14 Fed Com 713H Well** encroaches on the drilling and spacing units to the north and south.

Exhibit B is a land plat for Sections 2, 11, 14, 23 that shows the proposed **Mr Potato Head 11-14 Fed Com 713H Well** in relation to the adjoining spacing units to the north and south in Sections 2 and 23.

Exhibit C is a list of the parties affected by the encroachment to the north and south. Ownership is diverse between the subject spacing unit and the tracts to the north and south. The affected parties in the spacing units in SE/4 of Section 2 and the NE/4 of Section 23, include the Bureau of Land Management. A copy of this application with all attachments has been sent by certified mail to each affected party advising them that if they have an objection it must be filed in writing with the Division within 20 days from the date the Division receives the application.

Exhibit D is a statement from Devon's petroleum engineer confirming that Devon's requested unorthodox location is necessary to optimize well spacing, thereby preventing waste.

Your attention to this matter is appreciated.

Sincerely,

Kaitlyn A. Luck

712H, 713H, 731H, and 732H wells
Eddy County, New Mexico

Dear Mr. Lowe:

Devon Energy Production Company, L.P. respectfully requests administrative approval of a non-standard location for each of the Mr Potato Head Wells referenced above by decreasing the first and last take points from 330 feet to 100 feet from the horizontal plane outer boundary. The wells are located in the Purple Sage-Wolfcamp Gas Pool (Pool Code 98220). It is Devon's responsibility as a prudent operator to maximize lateral length and to minimize reserves left in the ground. Decreasing the first and last take point will increase the wells effective lateral length by 460 feet thereby increasing ultimate recovery of reserves and thereby preventing waste of natural resources.

Sincerely,
