---

Hello Dean.

On November 14, 2019, I submitted an application for a PLC for XTO Energy (OGRID 5380) for the Nash Deep East Tank Battery. The PO number is Y2R7T-191114-C-107B. Yesterday, I received several returned envelopes as "Undeliverable". Upon inspection of service list included with the application, it was discovered that all of the interest owners addresses were incorrect. A computer error attached the wrong city and state to each address.

Today, I sent a new notice to each of the individual on the attached certified mailing list. I realize this will cause the notice period to restart.

I apologize for this error. If you need any additional information, please do not hesitate to contact me.

Tracie
